American Railroad Journal.

Saturday, February 8, 1873.

Stock Exchange and Money Market.

Money has been generally quoted firm as to price, on the basis of 6@7 per cent, currency and coin, as the governing rates on call, through the week, with an active inquiry for aid, from speculative sources, chiefly for Stock Exchange purposes. The discount business has been comparatively moderate, and the prime grades of commercial paper were saleable at 8@10 per cent per annum. The city banks reported reduced averages in the specie and legal tender lines, with a limited increase in the deposit item, and an enlargement of their loans and discounts to the extent of nearly 4¾ millions. The U. S. Sub-Treasury added 1⅝ millions to its coin reserve. The aggregate receipts of the office from all sources in January were $60,573,635, including $11,037,491 in coin from customs, and the aggregate disbursements, on all accounts, same time, were $67,808,765, including $9,175,222 of coin interest, and $263,259 of currency interest.

The Syndicate opened the subscription books for the new funding $300,000,000 Five per cent Loan, on Tuesday both here and in London, and the prompt response in the form of proposals indicated a decisive and encouraging measure of success for the negotiation.

The city banks, in their latest return, show a falling off of $171,900 of legal tender notes, with a decrease of $1,759,500 of specie, and an increase of $497,700 in their deposits, an addition of $4,720,500 to their loan and discount averages, and a contraction of $28,200 in their item of circulation. The city bank exchanges, last week, averaged 110¼ millions. The banks now hold $3,246,925 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The clearances of the banks averaged through the week 110¼ millions a day, and amounted in the aggregate, for the whole week, to $661,411,941 as against $655,561,098 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance about 1⅝ millions, and its coin reserve moderately as the result of the week's business.

The specie reserve of the city banks according to the latest return is $18,612,200, against $23,986,100 same time last year. The city bank deposits are now $217,168,500 against $220,906,700, week ending Feb. 3, 1873. The legal tender reserve amounts to $45,802,100, against $46,565,800 same time last year. The circulation now stands at $27,501,100 against $28,218,700 same time last year. The loans are now $286,879,600 against $282,610,400 at this date last year.

The coin reserve of the city banks is now about 18⅝ millions as against about 25¾ millions on the 20th of last July; the legal tender reserve is about 45⅞ millions against about 55½ millions on the statement of June 15th; and the deposits are now about 217⅛ millions, against 247½ millions on the 20th of July.

Government revenues have been on a restricted scale, since our last. The excises yielded within the week about two millions and thus far in the current fiscal year beginning with July 1, 1872, $70,437,307. The customs at theport of New York, for the week, were $2,082,608, and at the outports, about $700,000 more, in coin or coin certificates.

The U. S. Sub-Treasury office last week received $3,877,479 of currency, and $3,287,724 of gold, the latter including $2,158,900 from customs; and disbursed $2,304,586 of currency and $3,100,138 of gold, the latter embracing $1,039,697 of coin interest.

Gold has been less confidently dealt in, since our last, the speculative element evincing less spirit, and buoyancy, in view of the prospective success of the Syndicate operations, in promptly marketing the new Five per cent. funding loan. The Customs call has been quite moderate and the export drain, insignificant. The later dealings indicated a much firmer market. The range of the price during the week has been from 112⅞ @114, and the closing quotation on Wednesday was 113¾ against 113⅞ of the preceding week. The specie outflow last week, was $591,579. The Gold Exchange Bank clearances have averaged about 40 millions per day during the week.

The customs demand for Gold last week, averaged $359,666 a day. The arrivals of specie from Europe, Havana and other foreign ports have been thus far in 1873, $86,049 against $94,052 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $78,620,789 against $93,044,095 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $54,676,948, against $56,298,378 during the same time in 1871-2.

The export drain of specie was $591,579 last week, against $500,000 same week preceding year. The shipments since July 1, 1872, have been $42,246,847 against $24,305,860 during the same portion of 1871.

Foreign Exchange has been in less demand and somewhat irregular as to price, closing weak. Bankers' sixty day bills on London closed at 109¼@109½; sight bills on London, at 110¼ @110⅜. The weeks exports of Domestic Produce have been to the currency value of $5,611,700.

Government proposes, under the Treasury programme for February, to sell, during the month, through the local office here, at least six millions of gold, as follows: Thursday, February 6—$1,500,000. Thursday, February 13—$1,500,000. Thursday, February 20—$1,500,000. Thursday, February 27—$1,500,000, And to buy in at least four millions of Five Twenties, as follows. Wednesday, February 5—$1,000,000. Wednesday, February 12—$1,000,000. Wednesday, February 19—$1,000,000. Wednesday, Febuary 26—$1,000,000.

Government securities have been in very good request and quoted rather firmer though variable, with comparatively small offerings of bonds of all issues reported. The last public debt exhibit shows a further increase in the national indebtedness of $406,243 in January. The Legal Tender circulation outstanding at the end of January is reported as $358,013,836, against $358,642,294 50 at the close of December; a reduction toward their authorized limit amounting to $629,458 for the month. The Treasury Balances, according to the Debt Statement, are $7,500,000 Currency, and $62,250,000 Gold, and of the Gold $24,250,000 is held against Coin Certificates in the hands of the public. The reason of the increase of the public debt in January is stated at the Treasury Department to be payments during the past month of the interest on the Pacific Railroad bonds over the amount retained from pay for services rendered of $1,826 274. There were also disbursed from the Treasury during January, in addition to the ordinary expenses, $1,240,000 to the Board of Public Works in Washington, and $1,000,000 on account of deficiencies in the postal service, making the total amount of extraordinary expenditures during January $4,066,294.

The Secretary of the Treasury calls in $660,000 in three per cent. certificates dated from January 25 to April 14, 1869, $5,000 each, numbered from 6 to 5,651 inclusive, and $10,000 each from 7 to 5,563. Interest will cease March 31, 1873. Only $715,000 of three per cents. remain uncalled.

Government bought in on Wednesday $518,250 Five Twenties, from 113 21@113 37 net out of an aggregate offering of $052,950 at 113 21 @113 37.

U. S. sixes of 1881 closed on Wednesday of this week at 118¾@119 U. S. Five-Twenties of 1862, 114¾@115¼; U. S. Five-Twenties of 1864 at 114¾@115¼; U. S. Five-Twenties of 1865, 115⅛@115⅜; U. S. Five-Twenties of 1865 consolidated

114⅜@114¾; U. S. Five-Twenties of 1867, 116⅝@116⅞; U. S. Five-Twenties of 1868, 116½@116¾; U. S. Ten-forties at 115@115¼; U. S. Fives of 1881 (Funding Loan) 113¼@113¾; ex February coupon Six per cent. currency Sixes from 115@115⅜.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 22.	Jan. 29.	Feb. 5.
Consols	92⅜	92⅛	92⅜
U. S. 5-20s, 1865	93¼	92⅞	92⅞
" 1867	92⅞	93	94¼
" 10-40s	91	92⅛	92⅛
New Fives of 1881	89¾	91	91@91⅛
Erie	50	51¾	52¼

State bonds have been in fair request at firmer rates in most instances, though Southern State bonds fluctuated widely.

A livelier inqury noted chiefly on investment account for the better class of Railway Mortgages, and prices have been on the advance. Central Pacific Sixes closed buoyantly at from 103⅛@104, ex the January three per cent. (coin) coupon, with small offerings of the bonds noted, and an active investment call for them. Chesapeake and Ohio Sixes have been in more request, at the higher rate of 86½ and interest. Western Pacific Sixes have been of ready sale, and quoted up to 92¼92¾. The Northern Pacific 7-30 Loan has been in good demand at par and interest.

Railway and Miscellaneous share property has been quite active, but variable as to values, influenced mainly by speculative manipulations of the favorite stock at the board dealings. The general market closed rather buoyantly.

The Metal trade has been active in only a few lines. There has been a brisk trade noted in Copper, largely for forward delivery, at firmer prices; sales, 1,000,000 lbs. Ingot at 34c.@34½c. cash, and 35c. for March deliveries; also, 200 tons English, to arrive and here at 30c.@30½c. Scotch Pig-iron, scarce, and held above the views of buyers; American firm; no important dealings reported. Lead dull and nominally unchanged. Spelter has been quoted stronger and more active; sales, 200 tons at 7c.@7¼c., gold. Of Regulus Antimony, 10 casks sold at 14¼c. Pig-Tin dull with Straits quoted at 31c., and English at 31¼c., gold. Of Tin Plates, sales were made of 1,000 I. C. Charcoal a $11@$11 12½, and 800 boxes Charcoal Terne at $10 12½, gold, per box; market somewhat irregular.

General business has been on a moderate scale, in most kinds of produce. Breadstuffs, closed firmly, Cotton, easier, Provisions irregular, Spirits of Turpentine higher, Petroleum, and Rosin, cheaper. Middling upland cotton, left off on Wednesday at 21⅛@22 cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,132,849 bales, against 1,963,609 bales same time in the preceding year; exports 1,265,070 bales against 1,016,551 bales in the previous year; stock at the ports at latest dates, 568,950 bales against 573,800 bales same date 1871.

Foreign goods have been comparatively slow of sale as yet, though quoted steady as a rule. The week's imports amounted to $9,661,598 including $3,411,220 of dry goods.

Ocean freights have been less active, and rates have been quoted irregular. Room has been very scarce, both on berth and charter.

At the Live Stock Markets, Beeves have been in fair supply and less demand at from 7⅛@14⅛; cts. Veals in good request at 6@11 cts.; Sheep active at from 4½@8 cts.; Swine at 5¼@5⅝ cts. per lb., all live weight. The week's receipts were 7,926 Beeves, 687 Veal Calves, 26,188 Sheep and Lambs, and 29,018 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

R., 20½@22½; George's Creek Coal, 105@120.

Jones' Falls Improvement.

The commissioners of Jones' falls are engaged in preparing plans and specifications for the construction of the eleven bridges required to span the stream of Jones' falls when the improved line shall have been completed. In response to published invitations for "plans for the bridges" there were offers from five prominent builders of patent bridges, which have been examined, and in order to reap the benefit of competition as between them in cost of construction, proposals will now be asked from each, based upon specifications now preparing by the engineer of the commission.—*Baltimore Sun.*

☞ A despatch from Toronto, dated February 1, says: "The *Mail*, a government organ, this morning announces that arrangements have been completed for the construction of the Canada Pacific Railroad. The formal charter will be issued on the return of the Governor-General to Ottawa. Ten millions of stock are ready to be subscribed, and stock books are to be opened in each of the provinces."

☞ The Hamilton and Lake Erie Railway has been finished to Caledonia, and the section from Coledonia to Jarvis will, it is expected, be completed by the 1st July, 1873. The Great Western cars now run from Hamilton to the Buffalo and Lake Huron at Caledonia.

☞ The following gentlemen have been elected directors of the Baltimore and Ohio Railroad Company on the part of the city; John F. Wiley, Wm. H. Cole, Robert T. Banks, John S. Bullock, John G. Medinger, Simon J. Kemp and James Webb.

☞ The Cayuga Lake Railroad, extending from Cayuga Bridge to Ithaca, 40 miles, has been completed. It is to be extended to Port Byron, where the valleys of the Central road and the Cayuga meet.

☞ The Central Mining Company of Lake Superior have declared an annual dividend of $8 per share, payable February 12 to holders February 1.

☞ A dispatch from Cincinnati says that the report of the committee favoring the construction of the Kentucky and Great Eastern Railroad has been adopted by the chamber of commerce. The road is to run from Newport, Ky., to a point on the boundary line between Kentucky and Virginia near Big Sandy river, 146 miles, at which point connection can be had with the Chesapeake and Ohio Railroad, thus completing a line from Richmond and Norfolk, in Virginia, to Cincinnati, Ohio.

☞ The first train eastward over the Chesapeake and Ohio Railroad through from the Ohio river arrived at Richmond, Va., on the 1st inst., bringing about fifty passengers, mostly West Virginians, and four loads of cannel coal, the first of the kind ever received in Richmond.

Statement of the Public Debt of the United States February 1, 1873.

BONDS ISSUED TO THE PACIFIC RAILROAD COMPANIES, INTEREST PAYABLE IN LAWFUL MONEY.

	Amount Outstanding.	Accrued Interest not paid.
Central Pacific bonds, 1862-64	$25,885,120 00	$129,425 60
Kansas Pacific bonds, 1862-64	6,303,000 00	31,515 00
Union Pacific bonds, 1862-64	27,236,512 00	136,182 56
Central Branch Union Pacific bonds, 1862-64	1,600,000 00	8,000 00
Western Pacific bonds, 1862-4	1,970,560 00	9,852 80
Sioux City and Pacific bonds, 1862-64	1,628,320 00	8,141 60
Totals	$64,623,512 00	$323,117 56

Interest paid by United States, $18,509,280 90; interest repaid by transportation of mails, &c., $4,118,432 75; balance of interest paid by United States, $14,390,848 15.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, Jan. 31, 1873.

GEO. S. BOUTWELL,
Secretary of the Treasury.

☞ The proprietors of the Trenton (N. J.) Vise and Tool Works have, within a year, added another branch of manufacture to the business, and are now building F. C. Lowthorp's Iron Bridges, of which they have furnished several for the Newark and N. Y. R. R. The tools made here are mostly picks, sledges, vises, &c. They give employment to 85 men, under the superintendence of Mr. J. Howard Murray.

☞ Messrs. Fisher & Norris, of Trenton, N. J. manufacture the "Double Screw Paralleled" Vises, that possess a powerful grip, and never get jammed. Eleven and one-half tons pressure applied at the lever screw of the largest size was required to break its jaw. Fisher & Norris, also manufacture the "Eagle" Anvils and Vises, and own the patent process for welding cast iron to the finest tool steel.

☞ The Pittsburg, Virginia and Charleston Railroad is now open and running daily trains from Pittsburg to Dravosburg, a distance of seventeen miles.

☞ Geo. H. French has been elected President, W. O. Barnes Vice President, and J. S. Connor Secretary and Treasurer of the Davenport and St. Paul Railroad Company.

Journal of Railroad Law.

RAILROAD COMPANIES—EXCEPTIONS TO LIABILITY OF COMMON CARRIERS—BURDEN OF PROOF—MEASURE OF DAMAGES.

The recent case of Winne *vs.* The Illinois Central Railroad Company, (31 Iowa, 583,) was an action to recover damages to 400 barrels of flour, alleged to have been sustained while the same was being transported from Waverly, Iowa, to Chicago, Illinois, on defendant's railroad.

The following is the opinion of the court delivered by—

MILLER, J.—I. Before the commencement of the trial below, the defendant filed a motion to strike out certain depositions taken by the plaintiff. The motion was overruled, and the defendant assigns such ruling as error. The objections to the testimony of the witnesses, as stated in the motion, are immateriality and irrelevancy, and it is urged in argument that as their testimony shows that they could not state the condition of all the flour when it was examined in Chicago; that as they saw only a part of it examined, their evidence should have been excluded.

The statements of the witnesses, that they saw a portion of the flour in controversy examined in Chicago, after it had been delivered by the defendant to the consignee, and that it was damaged by having got wet, was certainly relevant testimony, tending to show that the flour had not been delivered in good order, which was an essential part of the plaintiff's case; and that these witnesses did not see all of the 400 barrels examined, and could not therefore testify as to the condition of them all, did not affect the competency of their evidence in respect to the condition of the flour which they did see examined.

That these witnesses did not see all the flour examined afforded proper ground for argument to the jury upon the extent of plaintiff's right of recovery, but was no objection to the relevancy or competency of the evidence.

The other considerations urged by counsel for appellant in respect to the incompetency of portions of the testimony contained in plaintiff's depositions will be considered hereafter in connection with instructions relating to the proper measure of damages.

II. The second error urged in argument is, that there was error in the third and fifth paragraphs of the charge of the court, which were as follows:

3d. "If you find that plaintiff delivered flour to defendant, to be transported by defendant to Chicago, Ill., as claimed by plaintiff, it was the duty of the defendant to transport the flour to its destination, and deliver it to plaintiff's consignee or agent in as good a condition as it was when delivered to defendant for transportation, and the defendant will be liable for any damage resulting to the flour while in the custody or control of defendant."

5th. "If from the evidence you believe that plaintiff delivered the flour to defendant as claimed by plaintiff, and that such flour was damaged while in the custody and control of defendant, you will find a verdict for plaintiff."

The appellants insist that these instructions were erroneous, for the reason that "neither of them contain the exceptions to defendant's responsibility as a carrier—the acts of God and the public enemy." Whatever force there would be in this objection is destroyed by the fact these exceptions are embraced in the third and fourth instructions given at the request of the plaintiff. It is further objected by appellant, however, that these objections contained in these last instructions cast the burden of proving the exceptions upon the defendant.

Ordinarily the plaintiff makes out a *prima facie* case by showing that he delivered his goods to the carrier in good order, and that when the carrier delivered them to the consignee they were in bad order or in a damaged condition. The carrier may then show that the injury to the goods was caused by the act of God or the public enemy, and thus be exonerated from liability. It has been the settled law of England for ages, and of America since its first settlement, that a common carrier is responsible for all losses except those occasioned by the act of God or the public enemy, and that the loss of, or damage done to, property in his possession to be carried, is of itself sufficient *prima facie* proof of negligence. Angell on Common Carriers § 67, 148, 149; 2 Kent's Com. 597. And in all cases of loss or injury to property intrusted to a common carrier for transportation, the burden of proof is upon him, to show that the loss was occasioned by the act of God or by public enemies. 2 Greenleaf Ev., § 219, and cases cited in note 8; Angle *vs.* The M. & M. R. R. Co., 18 Iowa 555 and cases there cited.

If, however, the plaintiff's evidence should show the circumstance which excused the defendant from liability, the plaintiff would not be entitled to a verdict, although the defendant offered no evidence; such, however, was not the fact in this case; and there was, therefore, no error in the instructions under consideration.

III. The court below, in the ninth paragraph of the charge, directed the jury that, "if the plaintiff's consignee or agent received the flour in a damaged and unsaleable condition, and necessarily had to go to expense to put the flour in a saleable condition, plaintiff will be entitled to recover any reasonable expense thus incurred." The giving of this instruction is assigned as error, and appellants counsel urge that the true rule or measure of damages is the difference between the fair market value of the flour as delivered to the consignee, and what would have been its fair market value if it had not been injured while in the carrier's possession, at the date of delivery.

The rule contended for is undoubtedly the general rule. Its application, however, is not always just and proper. It might have operated in this case very severely and unjustly on the defendant, for there is evidence tending to show that when the flour came from the hands of the carrier to the consignee it was unsaleable; and it had no market value because it could not be sold at all in the market, whereas, by a trifling expense the flour was rendered saleable. Nor is this instruction in conflict with the rule contended for by appellant; for by means of the expense incurred in cleaning the flour and rendering it marketable the amount of such expense was added to the value of the flour in its damaged condition. If the flour in the condition it was delivered by the defendant to the consignee, was unsaleable, and it could be made saleable by incurring a reasonable and necessary expense for that purpose, such expense was for the benefit of the defendant.

Had the court given the broad general rule contended for by the counsel for defendant without qualification, and the jury been convinced that the flour when and as it was delivered by the defendant was unsaleable in the market, was of no value therein, they would have been warranted in assessing the damages at the full market value thereof in good condition, resulting in a verdict against the defendant of thousands instead of hundreds of dollars. By the trifling expense of 25 cents per barrel, the flour, before unsaleable, was rendered fit for market; and the evidence tends to show that this expense was necessarily the result of the injury to the flour, which the plaintiff had to incur in order that the flour be at all marketable. That such expenses under such circumstances may be given by the jury as damages we have no doubt. See Angell on Com. Carr. § 490 *a*; Pierces Railroad Law, 465.

IV. The appellant requested the court to instruct the jury that, unless plaintiff has proved to you that the defendant was a common carrier, and received or was to receive pay or pecuniary consideration for such carrying, he must prove that the flour was damaged while in defendant's custody and through gross neglect of defendant; or he must prove that the defendant did not use as great care and diligence in taking care of the same as a man of ordinary prudence takes of his own property of the same character under like circumstances." The refusal to give this instruction is assigned as error, and it is urged by appellant's counsel that, "unless the defendant was paid or offered compensation, it (defendant) was a gratuitous bailee and not an insurer, and hence not required to exercise more than ordinary care." The evidence sufficiently shows that the defendant is a common carrier, that the flour was delivered to it and transported in the usual course of business; and without any agreement for the price of conveyance, the carrier became entitled to the same, and if not paid might recover on the *quantum meruit*. When goods are delivered to a common carrier to be transported, a promise to pay freights will be implied, and it is not necessary to prove payment or tender of the charges in order to hold the carrier liable in his capacity as a common carrier. The law will not presume, without proof, that the bailment was gratuitous, and if the carrier claims exemption from liability on that ground, the burden of the proof is upon him. When the defendant is shown to be a common carrier, the law itself supplies the proof of the contract so far as regards the extent or degree of his liability, and if he would exonerate himself or modify his liability, the burden is upon him. The entire weight of the responsibility, rigorously imposed by law upon a common carrier, falls upon him contemporaneously with a complete delivery of the goods to him to be forwarded, if accepted, with or without a special agreement as to reward. As before remarked, the evidence shows that the plaintiff delivered the flour to the defendant; that it was accepted and forwarded in defendant's cars to the consignee, and the evidence is silent as to whether there was an express contract to pay freight or not, or whether the freight was paid or not. Under such circumstances it must be presumed that the property of

the plaintiff was carried for the usual and customary rates, which the plaintiff has either paid or is liable to pay the defendant.

V. Appellant assigns error on the overruling of his motion for a new trial on the ground that the verdict was not sustained by the evidence. We are of opinion that the verdict is sustained by sufficient evidence, and that the defendant's motion for a new trial was properly overruled.

The judgment of the circuit court must be affirmed.

Arkansas Railroads.

We have before us Mr. Auditor Berry's report to the Governor, extending over a period of two years, commencing October 1, 1870, and ending September 30, 1872.

We find by this report the number of railroad and levee bonds issued, up to the 1st of October last, to the different railroads, as follows:

L. R., P. B. & N. O. Railroad—		
State aid bonds	$1,200,000 00	
Levee bonds	233,573 36	
		$1,433,573 36
M., O. & R. R. Railroad state aid bonds		600,000 00
Arkansas Central Railroad—		
State aid bonds	$1,050,000 00	
Levee bonds	290,077 04	
		1,340,077 04
M. & L. R. Railroad state aid		1,200,000 00
L. R. & F. S. Railroad state aid		900,000 00

The above does not include over $200,000 levee bonds issued to the White River Valley Railroad.

The Commissioner of Public Works and Internal Improvements (Hon. Benj. Thomas) reports 186¼ miles levees built with the $3,000,000 appropriation by the last legislature. Out of this railroad companies received $610,922 93, divided principally between the Arkansas Central, and Little Rock, Pine Bluff and New Orleans Railroads.

The Commissioner reports the total amount of railroads graded in the state at 634½ miles; tied, 622½ miles; completed, 477 miles—showing an increase since 1870 of 311½ miles graded, 324½ miles tied, and 279 miles completed, as follows:

	Graded.	Tied.	Comp.
Mem. and Little Rock	131	131	131
L. R., P. B. & N. O.	72½	72½	36
M., O. & R. R.	110	110	32
Rittle R. & F. Smith	64	64	61
Arkansas Central	85	85	57
Cairo and Fulton	160	160	160

The Commissioner makes the following estimate of railroads certain to be finished within the next ten years:

	Miles.
Cairo and Fulton	300
Hot Springs Branch	40
Little Rock and Fort Smith	155
Little Rock, Pine Bluff and New Orleans	160
Mississippi, Ouachita and Red River	170
Arkansas Central	150
Memphis and Little Rock	120
White River Valley and Texas	135
Memphis and Shreveport	200
Total	1,430

☞ Gov. Walker has issued his proclamation notifying the holders of Virginia bonds that a conference between the creditors of the State and a special committee of the General Assembly will be held in Richmond on the 15th of February, to arrange if possible, some mode of settling the public debt question.

Michigan Central Railroad.

Mr. Isaac Livermore, Treasurer of the Michigan Central Railroad, in his semi-annual report shows the condition of the company, on the 1st of December, as follows:

The balance of the income account, this day, is $774,325 28. The net receipts of the road for the six months ending the 1st inst., after deducting operating and interest accounts, were $774,325 28. The gross receipts show an increase over those of the corresponding six months of 1871, of $238,295 16, but the net receipts show an increase only of $91,769 08. The bonded debt now amounts to $17,262,100, including the first mortgage sinking fund loan, due in 1882, $2,204,000; first mortgage loan, due in 1882, $558,000; and the 7 per cent. loan, due in 1902; $4,500,000. The capital stock amounts to $17,989,548. The sum invested in the sinking funds amounts to $1,595,198 65, which, deducted from the amount of sinking fund bonds outstanding, $2,204,000, leaves $608,801 94, and a net bonded debt of $5,666,801 34 upon the main line. The construction account has been increased $3,518,276 10, and now amounts to $22,623,875 61.

☞ The following statements are made in the report of the Boston and Lowell Railroad Comf pany in regard to certain Railroad leases:

The Peterborough Railroad is an extension o the Wilton road, and is now being constructed from Wilton, ten miles, to the town of Greenfield. The Nashua and Lowell Railroad leases this extension for joint account of the Boston and Lowell and Nashua and Lowell roads, for a period of twenty years, at six per cent. upon its cost, over and above certain gratuities to be paid in by towns in New Hampshire benefitted by its construction.

The Middlesex Central Railroad is an extension of Lexington branch, and is now being constructed from Lexington, eight miles, to Concord. It is to be leased by this Company for account of the Boston and Lowell and Nashua and Lowell Railroads, for thirty years, at six per cent. upon an agreed cost, and to be bought at that cost within the life of the lease.

☞ The Staunton (Va.) *Spectator* states that the Valley Railroad Company has executed a mortgage for $3,000,000 to complete the entire line. The bonds will be seven per cent. currency bonds, payable in thirty years. These bonds will be a first lien on the entire line of the road, running 113 miles through a part of the Valley of Virginia, and crossing two great east and west lines, the Chesapeake and Ohio at Staunton, and the Atlantic, Mississippi and Ohio at Salem. By the sale of these bonds, secured by this mortgage, the requisite amount of money (with the subscriptions amounting to $3,200,000 heretofore made) will be obtained to complete the road from Harrisonburg to Salem.

☞ The Ridge Copper Co. have declared a dividend of $2 50 per share, payable Feb. 24th.

For Sale—New Locomotives.

Soft coal burner, 4 ft. 8½ in. gauge, Cylinders 15x22, four 4½ ft. Drivers. Rogers Locomotive and Machine Works, Builders. Has swing truck, and all latest improvements. Been run three months only, and in perfect order. Address

ERIE RAILWAY COMPANY.

VICE-PRESIDENT'S OFFICE,

(P. O. Box 839.) New York, January 9, 1873.

To Bridge Builders.

THE ERIE RAILWAY COMPANY PROPOSE, as they renew the bridges upon their Road, to substitute iron for wood. They have a large number of bridges in spans varying from 20 to 200 feet.

With a view to determining the best plan to adopt, they invite you to make a proposal, based upon plans and specifications, to be furnished by you for bridges of various spans from 20 feet upward, with your price for the same.

Let your price be predicated upon the fixed price of iron and steel, to be varied as those materials may advance or decline in price.

Yours, &c.,
A. S. DIVEN,
Vice-President.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

THE WHARTON

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

American & English Rails,

LOCOMOTIVES and CARS,

FISH PLATES, SPIKES, &c., &c.,

SOLE AGENT FOR

Atkins Bros' Pottsville Rolling Mills.

Special attention given to filling orders for Small *T and Street Rails*, of every weight and description.

Old Rails Bought or Re-Rolled, as Desired.

P. O. Box 5222.

EDWARD J. ETTING,

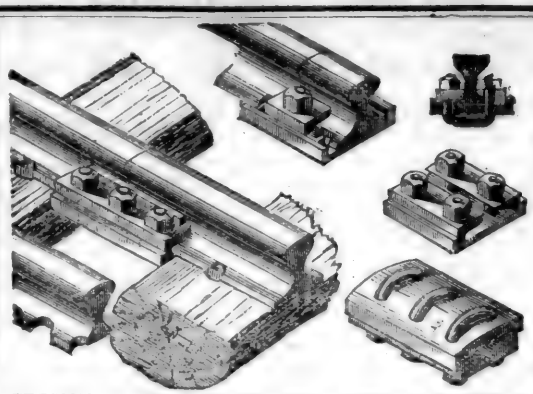
105 Walnut St., Philadelphia,

MANUFACTURERS' AGENT FOR THE SALE OF

AMERICAN AND FOREIGN

RAILROAD IRON

Of every Size, Weight and Pattern,



For Steam and Street Roads.

ROLLING STOCK & SUPPLIES.

Old Rails Re-Rolled & Exchanged for New.

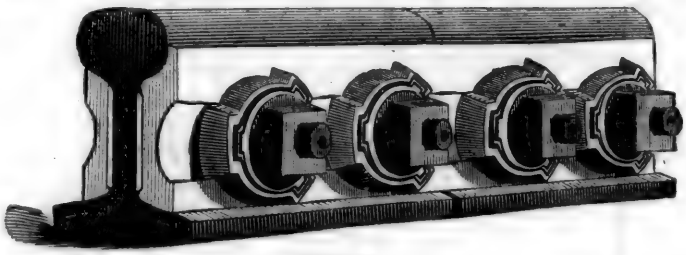
Special attention paid to the Purchase and Sale of Old Railroad and Scrap Iron.

CONSIGNMENTS SOLICITED.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. For sale by

S. W. HOPKINS & CO.,

Amount Paid the Union Pacific Railroad for Transportation.

In response to the House resolution calling for a statement of the amounts paid to the Union Pacific Railroad Company for army transportation, and an estimate of what said transportation would have cost if the railroad had not been constructed, the Secretary of War transmitted the report of the Quartermaster General, showing that the government has paid the Union Pacific Railroad Company for such transportation the following amounts, nanely:—

During the year ending June 30, 1867...	$111,401
During the year ending June 30, 1868...	969,286
During the year ending June 30, 1869...	478,535
During the year ending June 30, 1870...	487,288
During the year ending June 30, 1871...	701,246
During the year ending June 30, 1872...	481,930
During the year which will close June 30, 1873.....	121,354
Making a total of.....	$3,351,040

Of which one-half was paid in cash and one-half in credits on account of railroad bond indebtedness to the government. The Quartermaster General estimates that the cost of moving the same troops and supplies by stage and wagon would have been $8,950,185, showing an estimated saving to the government by the railroad transportation of $6,507,283, or about sixty per cent.

TO INVESTORS.

To those who wish to REINVEST COUPONS or DIVIDENDS, and those who wish to INCREASE THEIR INCOME from means already invested in other less profitable securities, we recommend the Seven-thirty Gold Bonds of the Northern Pacific Railroad Company as well secured and unusually productive.

The bonds are always convertible at Ten per cent. premium (1.10) into the Company's Lands at Market Prices. The rate of interest (seven and three-tenths per cent. gold) is equal now to about 8¼ currency, yielding an income more than one third greater than U. S. 5-20s. Gold Checks for the semi-annual interest on the Registered Bonds are mailed to the postoffice address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS.

JAY COOKE & CO.

New York, Philadelphia and Washington.

Novel Lubricant for Journals.

Mr. ALBERT BRIDGES, of New York, the well known Railway Supply Manufacturer, has recently patented a Powder Lubricant for Car Journals and other bearings which is found upon trial to possess invaluable qualities for counterbalancing friction and preventing hot bearings. It is a fine white powder made from a mineral of talcose magnesian character, and free from grit. It is mixed with oil into a paste, is easily applied to shafting or car journals. New car journals packed with this paste can be put into immediate use, without fear of heating. The patentee states that many delays can be prevented by carrying the paste on the train *ready for immediate use*; as soon as a hot journal is discovered, apply the paste to the journal as directed, and there will be no necessity for delaying the train to cool off and repack the journal. If the journal is very hot it may burn out the oil with which the lubricant is mixed, but it will not destroy in the least the anti-friction properties of the *lubricant* which is perfectly *incombustible*. On steamer journals and other heavy bearings, this lubricant has been found very efficient in preventing the heating of the surfaces where everything else has failed. Those who have trouble with hot journals had better make application to Mr. Bridges, who will supply the article, and full directions for use. Read the following testimonials:

ERIE RAILWAY CAR SHOP,
ELMIRA, N. Y., Feb. 1, 1873.

A. BRIDGES, Esq.,
46 Courtlandt St., New York.

DEAR SIR: For several months past your Lubricant has been used on the Erie Railway, and by what our several day and night car inspectors say, and what I know by personal observation, I can safely recommend it in every respect. I assure you it is a sure remedy for hot boxes. Our car inspectors now use no water to cool off journals—only your valuable remedy. It saves much labor for our men, and great detention of trains, as well as liners and axles detroyed. Besides the men on the trains, having the article with them, cure the hot boxes themselves, and we are not obliged to send men out on the road to fix cars half as much as we formerly did before using your Lubricant, as the conductors are not obliged to switch cars—which has been so common an occurrence. I never saw anything to compare with this material, although I have been in charge of the inspecting, oiling, etc., for the Erie Railway Company constantly for the last fifteen years, and have in that time used various kinds of lubricators for the prevention of hot journals; but this one of yours is far superior to them all. I can safely recommend it to every railroad to be a sure cure for hot boxes, making a saving of time and money. I have seen many instances, that are too numerous to mention, of blazing red hot boxes cooled by your Lubricant after running a short distance. The above statement will be confirmed by all our train men who have used it.

Yours respectfully,
WILLIAM MOFFET,
Foreman and Genl, Car Inspector, Elmira Car Shop, E. Ry.

I fully concur with the foregoing, and would say that I do not give out more than half the quantity of oil and waste since using your Lubricant that I did before.

WILLIAM WATTS,
Store Keeper in charge of Supplies of Car Depart. Susqua. Division and Jefferson Branch,
Elmira Car Shop, E. Ry.

FITCHBURG R. R. CAR SHOP,
CHARLESTOWN, October 25th, 1872.

ALBERT BRIDGES, Esq.,
New York.

DEAR SIR:—I have used your Patent Lubricant in our Car Boxes for about a year. I find that it is just what you claim for it, and I believe a trial of it will satisfy any man that it is so.

I have used a number of kinds of Lubricators, and I do not hesitate to say that yours surpasses anything I have ever had.

For packing new boxes it is invaluable, and I don't believe any man will run out a new car without it, after he has tried it once.

Yours, &c.,
ENOS VARNEY,
M. C. B. F. R. R. Co.

OFFICE CUMMINGS' CAR WORKS,
JERSEY CITY, Sept. 18th, 1872.

MR. ALBERT BRIDGES,
No. 46 Cortlandt St., N. Y.

DEAR SIR:—In relation to your Patent Lubricant, would say my experience with its use has been very satisfactory indeed, previous to the introduction of it to my notice, I packed the journals of all cars in the usual manner with waste and good Lubricating Oil, but was very much troubled by journals heating and in many instances the brasses would be entirely melted out, the car put in on side track, there to remain until new brasses could be put in before the car could resume its journey. This was a great annoyance and expense as it delayed the prompt delivery of our cars. Upon having my attention called to your Patent Lubricant I decided that I would give it a trial, and ordered a small quantity for that purpose the result of which was so satisfactory that I ordered it to be used in the boxes of all cars leaving this shop.

I would mention one case in particular where it was put to a very severe test, and one which proved to me its very great merits; I had some passenger coaches to go to Little Rock, Arkansas, a distance of about 1,350 miles. The journals were packed with the Lubricant when they left the shop and there was not a box cover removed until the cars arrived at their destination, and when the covers were taken off I was informed that the cars could have returned to Jersey City without disturbing the packing or adding a drop of oil to the journals.

I have no hesitancy in saying that it is the best Lubricant I have ever seen, as it not only *prevents a journal heating* but will *cool a journal when hot*; I also find it much cheaper *than* any good Lubricating Oil.

I would recommend the use of your Patent Lubricant to all parties having the management of railway rolling stock.

L. H. CUMMINGS,
Supt. C. Car Works.

Philadelphia, Wilmington and Baltimore Railroad.

The earnings of this road for the years ending October 31, 1871 and 1872, were as follows:

	1871.	1872.

For forgery by a passenger agent at Balt. in 1871	7,313 48	
For amount taken to renewal fund reserved to meet extraordinary expenses for the year 1873	150,000 00	
		167,982 78
Leaving balance to credit of revenue November 1, 1872		$510,478 43

The gross receipts as compared with those of 1871, show an increase of 4.98 per cent., while the expenses were less than those of 1871 by 4.25 per cent.

The miles run by locomotives were 1,065,517 in 1871, and 1,203,602 in 1872, an increase of 13 per cent. During the year the operating expenses were charged with new stations and rolling stock to the amount of $177,000 which is equal to eleven per cent. of the whole amount of this account. The new rolling stock consists of two locomotives, eight passenger cars, and one hundred and forty freight cars. The old rolling stock was replaced by new to a considerable extent. The passenger trains have been generally fitted with Air Brakes, and all cars built within a few years past, have been fitted with warm water heating apparatus. All of your passenger and baggage cars have, for several years, been fitted with the Miller Platform, and your track with Wharton Switches, and self-adjusting steel frogs; and no rails excepting of steel or with steel heads, have been laid in it. So often as the iron rails now in the track require renewal, we intend to substitute steel rails therefor.

Experiments with block and road crossing signals were commenced early in the year, and are still in progress.

The Peninsular system of railroads tributary to your road, has been extended, by the construction of the Worcester and Somerset Railroad, from Newtown on the Pocomoke River to the Eastern Shore Railroad, a distance of nine miles; and of the Worcester Railroad, from Snow Hill, fourteen miles to Berlin on the Wicomico and Pocomoke Railroad.

The construction of the new road of this company between Philadelphia and Chester was sufficiently advanced to allow of the running of passenger trains regularly since November 18th, last. The cost of it will be larger than was anticipated. Several causes have worked together for this result. Since the commencement of the work the cost of labor has increased over 20 per cent., and much of the material has become enhanced in value by a still larger per centage. The contractors were embarrassed by strikes and the demoralization of labor; and the company was obliged to assume much of the work, which had been covered by the contracts. The land damages have been very large, and a part of the line near Gray's Ferry was relinquished in favor of a better but more costly one. It has been thought judicious to build more and larger station houses than those originally planned, and to provide substitutes for several grade crossings.

It is too early to measure the effect to be produced upon the business of the company by the existence of the new line. But as already several associations have been formed to improve the lands contiguous to it; and large investments made for the purpose; there is good reason to expect that we shall have eventually a local traffic commensurate with the cost of the new line.

In view of the large outlay on the new line and of the other new investments made by this company, it was found necessary to issue and sell five hundred thousand dollars of six per cent. bonds, payable in 1892, which was satisfactorily done.

Since the close of the fiscal year, a serious accident happened to one of our passenger trains near Edge Moor, resulting in the loss of two lives and the injury of fifteen persons more or less seriously. It was caused by disobedience or neglect of the long-established road rules of this company, on the part of a conductor, who, finding his locomotive power failing, sent a signalman back, but not until a following train was in dangerous proximity. That conductor had been in

the service of this company for nearly nine years, and was promoted to a conductor's grade more than four years since. He had earned the approbation of the public, and the confidence of your executive officers by general good conduct; and once, at least by prompt obedience of the very road rules which in this case he disregarded, he averted a serious accident under circumstances similar to those which resulted so sadly in this case.

With the exception of one passenger slightly injured in 1867, on the night of the 15th August, in consequence of the destruction of a culvert by a freshet, no casualty has happened to a passenger upon your road, unless as a consequence of his or her own act, during eight years next preceding November, 1872. During which interval this company transported more than 448,000,000 of passengers one mile, or an equivalent to more than 4,500,000 persons over the whole length of the road.

In conclusion, your directors take pleasure in stating that they believe the road and its business to be in a safe and prosperous condition.

The earnings of the New Castle and Frenchtown Railroad were:

	1871.	1872.
Passengers	$25,014 22	$25,000 04
Freight	57,780 60	59,753 32
Mail	881 24	881 24
	$83,676 06	$85,634 60

The company have 64 locomotives, of which 62 are coal burners and 2 wood burners. The number of miles run by engines over the Philadelphia, Wilmington and Baltimore Railroad, including service on Port Deposit Branch was 1,203,602. Miles run on Delaware Division, between Wilmington and Delmar, by coal burning engines, 295,194; by wood burning engines, 21,867.

The car equipment consists of: 11 twelve-wheel passenger, 2 twelve-wheel chair, and 1 twelve-wheel baggage car; 73 eight wheel passenger, 22 baggage, 3 compartment, 4 chair, 10 smoking and baggage, 5 baggage and mail, 16 express, 2 postal, 2 milk, 1 pay, 652 house, 76 stock, 318 platform, 109 dump, 90 truck, 50 lime, and 11 tool, construction, etc., cars.

Secretary and Treasurer.—ALFRED HORNER.

Cost of the Hoosac Tunnel.

The Auditor of the State in his report recently submitted to the Legislature, gives the following account of the financial condition of the Troy and Greenfield Railroad and Hoosac Tunnel:

During the past year scrip to the amount of $1,178,540 has been negotiated, leaving £200,000—equal to $968,000—of the authorized issue still unsold.

As the Hoosac Tunnel is nearing its completion, more than seven-eighths of its entire length having been penetrated, and legislation is being called for with a view to the consolidation of the line from Boston to Troy, it may be useful to present, in brief, a statement of the cost of the enterprise.

The Commonwealth issued to the Troy and Greenfield Railroad Company, while the work was under the control of that corporation;

Sterling bonds, £114,500, at $4 84.		$554,180 00
Federal bonds		216,500 00
Federal bonds to purchase the Southern Vermont Railroad		200,000 00
		$970,680 00
Since possession was taken by the Commonwealth, there had been expended to January 1, 1872, including interest on scrip, less materials, rents and interest, as per ledger account		7,014,821 04
Payments in 1872:		
For interest on script, paid from the revenue		473,311 38
On the contract of W. and F. Shanly	$788,318 38	
Interest on conditional indebtedness	13,750 00	
On contract of McClellan, Son and Walker	54,250 27	
Engineering and other expenditures	35,877 94	
	$892,196 59	
Deduct receipts from sales of materials, rents and interest	49,666 17	
		842,580 42
Total cost to Jan. 1, 1873		$9,301,342 84

The Sinking Fund amounts to $1,232,549 82, a portion of which was created from a percentage on the original loans to the company, from rents, etc., with the accumulations thereon which will need to be deducted hereafter in determining the final cost to the Commonwealth.

Amount of contract with W. and F. Shanly		$4,594,268 00
Payments upon the contract:		
Paid in 1870	$732,547 31	
Paid in 1871	745,358 24	
Paid in 1872	788,318 38	
		2,266,223 93
Balance of contract		$2,328,044 07
Balance of cash in the fund Jan. 1, 1872		$1,025,767 49
Received from sales of materials in 1871	$5,523 26	
Received from sales of materials 1872	2,316 08	
Bonds negotiated in 1872	1,178,540 00	
		1,186,379 34
		$2,212,146 83
Payments in 1872	$892,196 59	
Cash advanced to W. and F. Shanly under resolves of 1872, chap. 47	100,000 00	
		992,196 59
Cash in the fund Jan. 1, 1873		$1,219,950 24

The payment to McClellan, Son & Walker, $54,250 27, has been made from this fund, as the scrip authorized for the construction of the railroad from the western portal of the tunnel to the village of North Adams has not been negotiated. When this shall be done the said amount will be repaid to the fund.

United States Rolling Stock Co.

To the Shareholders of the United States Rolling Stock Co.:

At the date of my first report I informed the Shareholders that the Board of Trustees had decided to issue the balance ($2,500,000) of the Capital Stock of the Company, originally subscribed for, in order to meet the payments falling due under the contracts already entered into for the construction of Stock, and which then amounted to $4,960,366 60, being an excess of $2,460,366 60 over the paid up capital.

I have to congratulate the shareholders upon the success which has attended the issue of the second half of the capital stock.

On the 4th instant Messrs. Bischoffsheim & Goldschmidt, the London Agents of the company, notified the board of trustees that all the shares had been taken, thus enabling them to place at the disposal of the company the amounts paid in as provided by the prospectus.

On the 20th of December last the board of trustees declared a dividend of 5½ per cent. payable on the 15th instant, making, with that previously declared and paid, a total dividend for the year of 8½ per cent, a very satisfactory result, as it must be borne in mind that that none of the stock has earned a full year's rental; a glance at the statements will give a clear and precise idea of the progression of the deliveries and of the rental earned therefrom.

The payments for stock amounted, on the 30th of June, 1872, to $735,861 60; while on the 31st of December they foot up $2,764,104 54.

The company owned on the same date:

28	Locomotives, representing a value of	$319,200 00
35	First class passenger cars	176,567 18
15	Second class " "	72,987 22
4	Combination cars	17,215 18
28	Baggage cars	51,940 25
2,735	Freight cars	2,173,754 21

The usefulness and complete success of this company is demonstrated by the fact that while on the 80th of June the Atlantic and Great Western Railroad Company was the only important lessee, the statements appended show ten other lessees, some of which have contracted for large quantities and find their contracts with this company so advantageous that most of them have applied for an extension of their leases.

I have to state in addition that numerous applications are under consideration while a great many have been entirely disregarded owing to the very distant location of the companies applying for stock.

I can with perfect confidence assure the shareholders of the company that, judging by the popularity of the enterprise and by the evident want felt by the majority of our railways for rolling stock adequate to the increase of traffic over their lines, any reasonable addition to the present capital of the company can be profitably invested.

The capital account of the company stands as follows on the 31st December:

Proceeds of first issue	$2,500,000 00
Instalments on second issue	500,000 00
	$3,000,000 00

The income up to the same date has been:

From interest	$35,025 93
" gross rentals	262,379 32
Total	$297,405 25
Out of which dividends (and expenses of paying the same) amounting to	$211,573 88

have been declared and paid.

The expenses during the year, including those incurred in the organization of the company amount to $51,851 71, which amount will be somewhat increased when some payments for which vouchers have not as yet been presented, are made.

No disaster of any kind has to be recorded; all the property of the company is fully insured, and though the premiums are payable by the lessees, the policies are held by the company and the interests of the shareholders are therefore perfectly secured.

The rentals have in all cases been promptly paid, with the exception of the rental due from the Cincinnati and Terre Haute Railway, which is being sued for in the Courts of the State of Indiana. The stock was withdrawn from said road in November last.

The statements furnished by the Superintendent's Department give all the important facts relating to the transactions of the year, and to them I beg to refer for all further information.

GEO. B. McCLELLAN, *President.*

New York, January 15, 1873.

STATEMENT OF ROLLING STOCK UNDER CONSTRUCTION ON THE 31ST OF DECEMBER, 1872.

	Approximate cost.
903 Box cars	$812,700
25 Coal cars	10,625
60 Gondola cars	44,000
227 Stock cars	204,300
16 1st class passenger cars	88,000
76 Locomotives	1,064,000
	$2,223,625

STATEMENT OF ROLLING STOCK DELIVERED SINCE DECEMBER 31ST, 1872.

99 Box cars, approximate cost	$90,000 00
50 Stock " " "	45,000 00
4 1st class passenger cars	22,000 00
2 Locomotives	24,500 00
	$181,500 00

Texas Railroads—Growth of Houston.

The total length of completed railroads centering in and tributary to Houston, Texas, is 1,083 miles. The Houston and Texas Central Railway commences at Houston, and will terminate 341 miles north, at Red River City, where it effects a junction with the Missouri, Kansas and Texas Railway. This road has already contributed vastly to the development of Texas. The Central offices, and the machine shops and car works, are located in the city of Houston. The main trunk line of the road is now completed. The Western branch of the road is completed from the main trunk at Hempstead to Austin, a distance of 115 miles. The Northwestern branch is completed from the main trunk at Bremond to Waco, a distance of 45 miles. These two branches bring Houston in connection with Austin, the State capital. The engineers are now engaged on the survey of the northwestern branch, which will leave the main trunk at same point north of Corsicana, and reach the Red River via Paris, Lamar county. The Houston, Great Northern and International Railway runs due north from Houston to the Red River via Clarksville, where it will secure northern connections via the line of the Memphis and El Paso Railway. The main trunk has been completed some twenty miles beyond Palestine, a distance of 172 miles, and will be opened to Tyler, 192 miles from Houston, in February, 1873. The road has already diverted to Houston an immense trade, formerly tributary to New Orleans via Red River. Sixty acres have been secured in south eastern Houston for the accommodation of the road. The road penetrates an extensive lumber region. Mills are springing up along its entire line, increasing the importance of Houston as a lumber depot. The Huntsville Branch of the Houston and Great Northern road is completed from the main trunk at Phelps to Huntsville, the site of the State Penitentiary; a daily train is run from Houston and returns carrying the way freight. The International Railway embraces the construction of a line from the terminus of the Cairo and Fulton Railroad, at Fulton, Arkansas, to Mazatlan, on the Gulf of Mazatlan, Mexico, thus securing a short line to the Pacific Ocean. The road has been completed to its connection with the Texas Pacific at Longview, a distance of 174 miles. The Houston and Rio Grande Railway, which penetrates the far-famed sugar and cotton region of the Brazos and Caney, is completed a distance of fifty miles. The New Orleans and Texas Railroad, now forming a part of the New Orleans, Texas, Mobile and Chattanooga Railway combination, has been completed to the Sabine River, 106 miles, but is now greatly out of repair. Contracts have been let to place it in a good condition. The Galveston, Harrisburg and San Antonio Railway is completed from the junction with the Houston Tap and Brazoria Railway, six miles from Houston, to Columbus, a distance of 80 miles. The Galveston and Houston Railway, 50 miles long, connects Galveston with Houston.—*Chicago Tribune.*

Lehigh Valley Railroad.

The annual meeting of the stockholders of this company was held in Philadelphia on the 5th inst. The report of the board of managers showed that the company's coal business the past year had not been attended with any violent fluctuations, and that the increase of tonnage was quite satisfactory, having reached the very large aggregate of 3,850,118 tons of anthracite, against 2,781,509 tons for the year 1871, an increase of 1,068,609 tons. In addition there was carried 27,601 tons of bituminous coal, making a total coal tonnage of both kinds for 1872 of 3,877,179 tons. The receipts of the company from all sources, including interest on investments, income from coal lands, etc., were $6,434,915, from which deducting $3,869,687 of operating expenses, leaves $2,565,228 of net income. The capital account of the company at the close of its last fiscal year consisted of 429,376 shares, of the par value of $21,468,800; scrip for installments received, $700,830; overdue Hazelton Coal Company bonds, $3,000; bonds due in 1873, $703,000; six per cent. registered and coupon bonds of 1868, $4,048,000: and seven per cent. registered bonds of 1910, $5,000,000—making a total of capital and funded debt of $31,923,630. The usual quarterly dividends, amounting to ten per cent. per annum, have been paid on the preferred and common stock. An election for officers was held, with the following result: President, Asa Packer, Vice-President, Charles Hartshorne; Directors—Wm. W. Longstreth, J. Gillingham Fell, John Taylor Johnston, Wm. H. Gatzmer, David Thomas, Ashbel Welch, Wm. L. Conyngham, Arlo Pardee, Wm. A. Ingham, Joseph Wharton and George B. Markle.

Providence and Worcester Railroad.

The income of this company for the years ending September 30, 1871 and 1872, was as follows:

	1871.	1872.
From passengers	$345,120 53	$367,060 54
" freight	464,830 81	508,552 66
" mails	3,880 00	3,989 95
" rents	3,422 86	4,303 55
" express	11,965 09	11,990 49
	$829,218 79	$895,897 19
Expenses, viz:

		19,259 98
Total, as above		$600,473 09

The length of road in Massachusetts is 25.51 miles; do., in Rhode Island, 17.90 miles—total, 43.41 miles. Length of double track, 28.15 miles. Length of branch, 1 mile. Length of sidings 26 miles. Length of roads belonging to other companies operated by this company, 3.877 miles. Total miles of road operated by this company, 47,287 miles. The report says:

It will be noticed by the foregoing statement there has been a gratifying increase in the receipts of the road, notwithstanding a reduction of ten per cent, was made in March last in both the passenger and freight tariffs.

The double track has been extended, and is in operation from Worcester to Farnumsville, a distance of about twelve miles, which, with the eighteen miles at this end, makes about two-thirds of the road double track. The remainder will be laid as the company is able to do it with its own labor, and in the mean time little or no inconvenience will be suffered for the want of this middle portion of the road.

The new and elegant passenger station at Pawtucket, built in connection with the Boston and Providence Railroad, has been finished, and is now being occupied. The passenger accommodations at Woonsocket have been much improved and enlarged; also the passenger station at Central Falls, and the new station at Ashton has been finished, and is being used. Six new passenger cars, four new and powerful locomotives, one hundred coal cars and ten platform cars have been added to the equipment, besides twenty-nine box and platform cars to cover depreciation. Four more passenger cars and two more locomotives are in process of construction, and will be placed upon the road during the coming spring, which will make the passenger and freight equipment very complete.

An arrangement has been made with the New Jersey Central Railroad and Pennsylvania Coal Companies, by which they are to build large and commodious wharves below India Point, for the landing and storage of coal, and this road is to connect therewith by a branch road to Valley Falls along the east side of Seekonk river, to be built on joint account with the Rhode Island and Massachusetts Railroad Company, which it is expected will be ready for operation during the present year, thus getting the coal traffic consigned to the company's wharves out of the streets of Providence.

The bridges in Massachusetts have all been widened for the double track and rebuilt at great expense, and the Orms street bridge in this city has also been finished and is being used.

An elevator for the storage of grain, of the capacity of nearly two hundred thousand bushels, has been constructed in Providence during the present year, which will relieve in a great measure the detention of cars for that purpose.

The usual maintenance of way has been fully kept up at an expense of more than one hundred and fifty thousand dollars, and altogether the road is in excellent condition for its business.

A semi-annual dividend of five per cent was declared payable in July last, and one of like amount has been declared payable at this time.

The Milford and Hopkinton Railroad is nearly finished. This, with the line from Woonsocket to Milford, will give us a connection with the Boston and Albany Railroad at Ashland.

A contract for a ten years lease of this road and to equip and run it has been made with this corporation, which it is expected will bring considerable additional trade to the city of Providence, and be another source of profit to this road.

To pay for the double track, the locomotives and cars, the erection of the new passenger stations at Pawtucket and Ashton, for the freight house at Woonsocket, the improvement on the passenger station at Woonsocket and at Central Falls, the grain elevator, &c., the company have incurred some additional debt which will no doubt be paid off at maturity from the surplus earnings of the road,—and now, gentlemen, your president, congratulating you on the prosperous condition of your road, and as his own private affairs require more of his time, and particularly having served you as president for a period of nearly thirteen years and as director from the opening of the road with a few years hiatus, he must be allowed to retire at the coming annual election.

The company have 27 locomotives, 29 passenger cars, 6 mail and baggage cars, 229 eight-wheel and 76 four-wheel merchandise cars, 128 eight-wheel platform cars, and 561 four-wheel coal cars.

Miles run by passenger trains, 216,506; by freight trains, 267,510; by other trains, 23,570—total, 507,586. Number of passenger carried, 1,605,257; do., carried one mile, 14,471,984. Tons of merchandise carried, 521,866; do., carried one mile, 15,864,734.

Our Philadelphia Iron Workers.

The *New York Times* of yesterday devotes several columns to a description of the leading foundries, rolling mills and other industrial establishments engaged in the manufacture of iron and steel and articles made from those metals, in this busy city. The writer seems to have been astonished at what his tour among these important industries developed. He has learned that our manufacturers turn out an annual product valued at four hundred millions of dollars, a large proportion of it being iron, and that we have twenty thousand workers in iron who represent at least a hundred thousand of the population. He is also willing to concede that "the arts of peace in the United States" have "found their greatest development, so far as manufacture is concerned, in the old peace-loving Quaker City." For New York to admit anything in favor of Philadelphia "is praise indeed." In the article there is a detailed account given of the works of A. Whitney & Sons, car wheel makers; the machine tool works of William Sellers & Co. and William B. Bement & Co., the foundry of the Leibrandt & McDowell Stove Company, J. P. Morris & Co.'s works, William Cramp & Sons' iron ship yard, S. Robins & Son's Philadelphia Rolling Mills, Morris, Tasker & Co.'s foundry, Henry Disston & Son's saw works, and several others. The Baldwin Locomotive Works are not described, the writer reserving them for a special article, and stating that they are of too "overshadowing magnitude" for a "quarter of a column paragraph." This great establishment and the Pascal Iron Works of Messrs. Tasker & Co. he describes as "jewels resplendent as the Koh-i-noor in the richly gemmed crown of the Goddess of American manufacture." Our great establishments were found in the full tide of prosperity, and as in each branch—foundry, forge, machine shop, locomotive building, wheel making, iron ship yard, saw factory, tool mill—they stand at the head of their respective classes, our Philadelphia "Goddess of American manufacture" is fully satisfied with her jewels.—*Phila. Ledger*, Feb. 3.

The Indiana and Illinois Central Railway Co.

Offers for sale its FIRST MORTGAGE 7 PER CENT. GOLD BONDS, 30 years to run, with ample Sinking Fund.

The Road runs due EAST and WEST from INDIANAPOLIS to DECATUR, 152 miles, through the richest settled country of the West. It crosses the BLOCK COAL FIELD of Indiana at its best point, and it cannot fail to have a LARGE LOCAL AND THROUGH BUSINESS, as it makes a great saving of distance and has low grades.

It is building for cash, by responsible stockholders, and is BONDED FOR MUCH LESS THAN ITS COST. Eighty five miles will be done and in profitable operation this Spring, the residue within the year. There is no better bond on the market. For pamphlets and information apply to

Walker, Andrews & Co.

No. 14 WALL-ST.

Redemption of United States Bonds.

The following is an official list of the numbers and denominations of United States 5-20 bonds, issued under the act of February 25, 1862, to be called in for redemption after three months' notice from March 1. This call includes all the remaining bonds of the second series, together with half the original third series and $10,000,000 of registered stock—the total amount being $100,000,000, on which interest will cease June 1, 1873:

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, February 15, 1873.

Stock Exchange and Money Market.

There has been an active inquiry for Money on speculative account throughout the week, and rates on call have been quite firm, as a rule, on the basis of from 7 per cent currency to the same figure gold, with, in some instances, a fractional commission added for accommodation from day to day to the more needy of the street borrowers. The supply has been manipulated to some extent in the interest of operators for lower values at the Stock Exchange, but not with anything like encouraging success. The leading firms had their wants provided for with comparative promptness at the ruling figures. The Government houses have been amply supplied at the minimum quotations of 6@7, generally 7 per cent currency, per annum. There has been a fair movement noted in the way of discounts within the range of 8@10 per annum on the best grades of commercial paper, which have been offered rather more freely, but not with noticeable urgency. The new Funding Loan reports, though not up to the more sanguine expectations of the advocates of the Syndicate process, are yet far from being unfavorable. Though no very definite particulars of the subscriptions have yet been disclosed, yet it has been somewnat authoritatively stated that the subscriptions amount to over $100,000,000. The Anglo-American Syndicate have placed this sum in Cash, (Gold,) at the disposal of the Secretary of the Treasury for the redemption of a corresponding amount of United States 5-20s, to be called in for redemption on the first of June—three months from the date of the forthcoming official notice of March 1. This is wholly independent of subscriptions to be settled by exchange of other United States 5-20s than the designated class and numbers, A Washington dispatch says that information has been received to the effect that about $170,000,000 of the new loan were taken during the three days last week in which the books were open. This—a little over half the amount—is not the complete and immediate success that was at one time anticipated. One reason assigned for it, and it is deemed an adequate one, is, that the notice of the opening of the subscription books was not given long enough beforehand to permit of the extended knowledge of the sale in this country and in Europe necessary to the taking of all the bonds. The syndicate having still ten months in which to locate the remaining $130,000,000 of the fives, considers its success to be in no wise jeopardized by the failure to place the whole amount in the specified three days. The city banks reported reduced averages in the legal tender line, while reporting an increase in there specie and deposit items, and an enlargement of their loans and discounts to the extent of over seven millions. The U. S. Sub-Treaury added nearly a million to its currency reserve.

The city banks, in their latest return, show a falling off of $694,400 of legal tender notes, with an increase of $423,200 of specie, and of $3,130,-700 in their deposits, an addition of $7,059,400 to their loan and discount averages, and of $19,-600 to their item of circulation. The city bank exchanges, last week, averaged 135⅛ millions. The banks now hold $2,188,150 of specie and legal tender notes more than the 25 per cent. of their liabilities required by the National Banking Act.

The clearances of the banks averaged through the week 135⅛ millions a day, and amounted in the aggregate, for the whole week, to $823,394,604 as against $661,411,941 the preceding week. The U. S. Sub-Treasury at this point enlarged its currency balance nearly a million, and its coin reserve slightly as the result of the week's business.

The specie reserve of the city banks according to the latest return is $19,035,400, against $21,-272,300 same time last year. The city bank deposits are now $220,299,200 against $221,019,500, week ending Feb. 10, 1873. The legal tender reserve amounts to $45,107,700, against $46,616,100 same time last year. The circulation now stands at $27,520,600 against $28,161,700 same time last year. The loans are now $293,939,000 against $285,422,200 at this date last year.

The coin reserve of the city banks is now a trifle over 19 millions as against about 25¾ million on the 20th of last July; the legal tender reserve is about 45⅛ millions against about 55⅛ millions on the statement of June 15th; and the deposits are now about 220¼ millions, against 247½ millions on the 20th of July.

Government revenues have been rather more prolific, since our last. The excises yielded within the week about 2¼ millions and thus far in the current fiscal year beginning with July 1, 1872, $72,682,209. The customs at the port of New York, for the week, were $3,230,999, and at the outports, about $1,100,000 more, in coin or coin certificates.

The U. S. Sub-Treasury office last week received $4,030,258 of currency, and $4,056,28 of gold, the latter including $3,285,000 from customs; and disbursed $3,114,180 of currency and $3,989,430 of gold, the latter embracing $1,460,-936 of coin interest.

Gold has been more active and quoted higher, though the speculation has been quite variable in temper and bearing as to price, during the week. The somewbat conflicting reports in circulation relative to the negotiation of the new Funding Loan served rather to inflate the premium. The Customs drain was on an enlarged scale, and the export movement was also heavier. The range of the price during the week has been from 113¼ @114⅛, and the closing quotation on Wednesday was 114⅛ against 113¾ of the preceding week. The specie outflow last week, was $1,642,370. The Gold Exchange Bank clearances have averaged about 52½ millions per day during the week.

The customs demand for Gold last week, averaged $547.500 a day. The arrivals of specie from Europe, Havana and other foreign ports during the week were $18,592, thus far in 1873 $126,525 against $113,489 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $82,107,743 against $95,-891,657 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $56,137,884, against $57,927,373 during the same time in 1871-2.

The export drain of specie was $1,642,370 last week, against $80,013 same week preceding year. The shipments since July 1, 1872, have been $43,889,217 against $23,930,812 during the same portion of 1871.

Foreign Exchange has been quoted weaker as to price, on a more liberal offering of bills, and a moderate demand. Bankers' sixty day bills on London closed at 109⅛@109¼; sight bills on London, at 110⅓@110¼. The weeks exports of Domestic Produce have been to the currency value of $5,357,750.

Government proposes, under the Treasury programme for February, to sell, during the month, through the local office here, Gold as follows: Thursday, February 20—$1,500,000. Thursday, February 27—$1,500,000, And to buy in Five Twenties, as follows: Wednesday, February 19—$1 000,000. Wednesday, Febuary 26—$1,-000,000.

There has been a fair demand noted for government securities, through the week, mostly on investment account, at generally well supported prices, on comparatively limited offerings of bonds.

Government bought in on Wednesday a million Five Twenties, from 113 73@113 85 net out of an aggregate offering of $4,046,100.

U. S. sixes of 1881 closed on Wednesday of this

week at 118¼@118½ U. S. Five-Twenties of 1862, 115¼@115½; U. S. Five-Twenties of 1864 at 115¼@115½; U. S. Five-Twenties of 1865, 115¼@115½; U. S. Five-Twenties of 1865 consolidated 114¼@114½; U. S. Five-Twenties of 1867, 116⅝@116¾; U. S. Five-Twenties of 1868, 116⅜@116⅝; U. S. Ten-forties at 114¼@114⅜; U. S. Fives of 1881 (Funding Loan) 113⅜@113¾; ex February coupon Six per cent. currency Sixes from 114⅞@115⅛.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Jan. 29.	Feb. 5.	Feb. 12.
Consols	92⅛	92⅜	92⅜
U. S. 5-20s, 1865....	92⅞	92⅞	92⅝
" 1867	93	94¼	93½
" 10-40s	92½	92½	91½
New Fives of 1881...	91	91@91⅛	90½
Erie	51¾	52¼	52¼

State bonds have been moderately dealt in at irregular, and at the close, less buoyant prices.

The better class of Railway Mortgages have been in good demand and on the advance. Central Pacific Sixes closed firmly at from 104@104¼, on a limited offering of the bonds, which have been in quite active request. The January earnings of the Central Pacific R. R. were $852,860, as against $592,233 in January 1872, and $536,498 in January 1871. Chesapeake and Ohio Sixes have been more sought after and have advanced to 87 and interest. Western Pacific Sixes have been selling quite freely and quoted up to 93¾94. The Northern Pacific 7-30 Loan has been in more demand at par and interest.

Railway and Miscellaneous share property has been actively dealt in, but prices have been fluctuating widely from day to day, and the general temper of the speculative movement has been less confident, influenced, in part, by the brisk inquiry for Money.

The Metal trade has shown more activity in the dealings in Copper at firmer prices; and in American Pig Iron, and in Iron Rails at full rates. Scotch Pig Iron held higher and quiet. Lead, Spelter, and Zinc, inactive but quoted steady. Tin Plates in fair demand and firm. Pig Tin, dull.

General business has been somewhat brisker in the line of domestic produce. Cotton, active, but variable in price. Breadstuffs, in moderate demand, the main inquiry having been for corn, and Oats. Provisions have been in fair request. Naval Stores closed heavily. Petroleum, firm. Middling upland cotton, left off weak on Wednesday at 20⅞@21¾ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,441,225 bales, against 2,053,951 bales same time in the preceding year; exports 1,345,366 bales against 1,069,915 bales in the previous year; stock at the ports at latest dates, 564,870 bales against 590,600 bales same date 1871.

Foreign goods have been in rather more demand and quoted generally firm. The week's imports amounted to $2,583,030 including $5,929,842. of dry goods.

Ocean freights have been more active, and rates have been quoted stronger, though yet somewhat irregular. Room has been in most request for Provisions, Grain, Petroleum, Cotton, Naval Stores and Tobacco.

At the Live Stock Markets, Beeves have been less sought after at from 7½@13½ cts. Veals in more demand at 7@11⅛ cts.; Sheep moderately inquired for at from 4@8 cts.; Swine at 5¼@5⅝ cts. per lb., all live weight. The week's receipts were 8,501 Beeves, 750 Veal Calves, 24,246 Sheep and Lambs, and 46,172 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Chesapeake and Ohio Railroad.

The Superintendent of the Chesapeake and Ohio Railroad reports that freight is offering for transportation over the road faster than his present facilities can move it. Among the applications is one from a Cincinnati firm for six car-loads of pork, destined for Charleston, S. C. The arrival of the first through freight train from the Ohio was celebrated at Richmond on the 11th inst., by firing of cannon, civic processions, and speeches. The Western connections of the Chesapeake and Ohio are making due headway. At Louisville the Chesapeake and Ohio Railway has an opportunity to make connection with—perhaps control—the new railroad to Elizabethtown and Paducah, which will be completed during the coming year. By this connection the outlets of the Cumberland and Tennessee rivers, where they empty into the Ohio, close together, will be tapped by the new stem line to the East, and those long river arteries of Tennessee and Alabama will swell the freights of the first great road opened from the sea through Dixie since the war. A little distance below Paducah, at Cairo, the Chesapeake and the Ohio connection may unite at once with the Illinois Central, the New Orleans, Memphis and Cairo, the Cairo and Fulton, and the St. Louis and Iron Mountain railways. It thus becomes an eastern conduit of roads from the Indian Territory, from Texas, and from Kansas. And it is not probable that a railway built at such cost, and by a class of capitalists of such keen perceptions, will fail to lay a shorter hand upon Chicago, where the great bridge at Louisville offers such facilities, and with a choice of three roads already established towards Lake Michigan.

BANKING-OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, Feb. 11, 1873.

☞ The **Chesapeake and Ohio,** the **Central Pacific and Western Pacific Bonds,** all of which have been negotiated by us, we believe to be among the best and most desirable investment securities in the market, which in time must become very scarce; especially as the Government will probably, soon pay off, in gold, $300,000,000 more FIVE-TWENTIES, and a large amount of money thus released from investment must find its way into this class of securities.

The **Chesapeake and Ohio Six Per Cent. Gold Bonds,** the total amount of which is only $15,000,000, are secured upon a property worth $35,000,000 to $40,000,000, and are fully equal in intrinsic value to the CENTRAL PACIFIC BONDS. They are issued in denominations of $100, $500, and $1,000, coupon or registered, and at their present market price, (**87** and accrued interest,) are very desirable.

The **Central Pacific Six Per Cent. Gold Bonds** are too well known to require description or commendation. Their total amount is $25,885,000; they have for a long time ranged in market price near or above par. Their price to-day is 104⅛@104⅜.

The **Western Pacific Six Per Cent. Gold Bonds** amount to $2,735,000. This road is now consolidated with the CENTRAL PACIFIC, and the payment of its bonds, principal and interest, is assumed by the latter. As they have recently been introduced on the Stock Exchange, we expect to see them rapidly rise to the price of CENTRAL PACIFICS, being substantially the same in character and value. Coupon Bonds, $1,000 each. Their market price to-day is 93¾@94.

We buy and sell, as usual, Government Bonds, receive deposits, on which we allow interest, make collections, and conduct a general banking business in all its branches.

FISK & HATCH.

Agricultural College Act.

The following is a copy of an act passed by Congress to amend an act entitled "An act to amend the fifth section of an act entitled 'An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts,' approved July second, eighteen hundred and sixty-two, so as to extend the time within which the provisions of said act shall be accepted and such colleges established," approved July twenty-third, eighteen hundred and sixty-six:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the time within which the several States may comply with the provisions of the act of July twenty-third, eighteen hundred and sixty-six, entitled "An act to amend the fifth section of an act entitled 'An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts,' approved July second, eighteen hundred and sixty-two, so as to extend the time within which the provisions of said act shall be accepted and such colleges established," is hereby extended so that the States which have not complied with the provisions of said acts in establishing colleges shall have the period of two years, after the first day of July, eighteen hundred and seventy-two, within which to provide at least one college, as described in the fourth section of an act entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," approved July second, eighteen hundred and sixty-two.

Approved January 23, 1873.

Erie Railway.

At a meeting of the directors of this company held in this city on the 11th inst., the Auditor submitted his report of the business, earnings and expenditures for the year ending December 31, 1872, which was read by the President. It is as follows:—

The gross earnings for the year ending December 31, 1872, may be stated in round numbers at		$18,694,096
Working expenses for the same period	$13,629,956	
Interest on funded & floating debt	1,814,043	
Rental of leased lines	1,223,712	
Total expenses		16,667,711
Net results for the year		$2,026,385
Less dividend paid on preferred stock to July 1, 1872		298,792
Leaving a surplus of		$1,727,593

The following resolutions were offered and adopted:

Resolved, That upon the statement of the earnings and expenses of the Erie Railway, as submitted by the President, a dividend of three and a half per cent upon the preferred stock of the company be and hereby is declared out of the earnings of the company for the six months ending December 31, 1872.

Resolved, That upon the statement of the earnings and surplus of the Erie Railway for the twelve months ending December 31, 1872, as submitted by the President, a dividend of one and three-quarters per cent. upon the common stock of the company be and is hereby declared.

Resolved, That the dividends of the preferred stock and common stock of the Erie Railway now declared be payable upon the 15th of March, and the books of transfer be closed on the 1st day of March, at two P. M., and remain closed until the morning of the 16th day of March.

The report set forth that over $4,000,000 had been expended during the year for new work and for iron purchased, included in the above statement of working expenses. No allowance was made for the property placed to the credit of the company by the recent action of Jay Gould.

The negotiation of the New 7 per cent. Convertible (Gold) Loan for $10,000,000 was successfully concluded in London on the 11th inst., the applications for the Loan being, it is stated, largely in excess of the sum offered.

The Youghiogheny Bridge.

The height of the proposed bridge across the Youghiogheny river at McKeesport, Penn., has been fixed by legislative enactment at fifty feet above low water. The Pittsburg *Chronicle,* in noticing the above fact, says:

Now that the difficulties have been removed it is to be hoped that the enterprise will be pushed forward to completion as rapidly as possible. No doubts were ever entertained that a bridge was not necessary, or that it would not aid materially in building up and developing the sections of country within reach of the improvement. The only objection, was that the the friends of the measure seemed determined to further there own interests by obstructing or destroying the interests of others.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY FOR DAMAGES FROM FIRE—LAW OF NEGLIGENCE.

The recent case of Jackson *vs.* The Chicago and North Western Railway Co., (31 Iowa, 176,) was an action to recover damages resulting from fire, upon plaintiff's land, caused by the alleged negligence of defendant's servants, and the careless and improper construction of an engine used upon defendant's road.

The following is the opinion of the court delivered by—

BECK, J.—The errors assigned in this case relate to instructions to the jury, given and refused, and the order of the court overruling a motion for a new trial, based upon the ground that the verdict is contrary to the law as given to the jury, and not supported by the evidence.

The question presented for our determination relate to the liability of defendant for the negligent and careless acts of its servants and the unskillful construction of an engine used by it, whereby fire was communicated to plaintiff's premises. The petition expressly charges that the damages, for which recovery is sought, resulted from carelessness in operating an engine upon defendant's road and from its unskillful and defective construction.

That a railroad corporation is liable on account of acts done in a negligent, careless or unskillful manner by its servants, in the prosecution of its business, whereby fire is communicated to the property of another, resulting in loss, cannot be doubted. And it is equally well settled that they are liable in such cases for the want of ordinary care and prudence exercised by their servants. The care exercised by a party whose act results in loss to another in order to relieve him from liability depends upon the character of the act done, the nature of the elements or instruments used, and all the surrounding circumstances. It is evident that one using a dangerous body or instrument, will be held to greater care and prudence than another using those of a less destructive character. What would be negligence in handling a loaded gun would not be carelessness in the use of a walking stick. Gunpowder or nitro-glycerine handled with no more care than an ordinarily prudent and cautious man exercises over harmless agents would be criminal negligence. Fire being a destructive element, persons using it are required to exercise all reasonably careful and prudent precautions against its spread. This rule applies in all cases where it may be used, without regard to the purpose of its use, and is held to extend to those operating railroad locomotives.

What will amount to negligence in such cases is a question for the jury. Fields *vs.* N. Y. C. R. R. Co., 32 N. Y., 339.

The care and prudence required by the law to prevent the spread of fire from a locomotive is not deemed to be exercised unless some proper precautions are used for that purpose. Lack. and Blooms. R. R. Co. *vs.* Doak *et al.*, 52 Penn. St., 379. Ordinary care and prudence require the use of the best contrivances known, and unless such are used, it will be considered negligence. One who fails to use the best means within his reach to prevent the destruction of property does not exercise the care of a man of common prudence. An ordinarily prudent man, in such a case, will resort to all expedients known to him to be efficient. The rule is not only just and necessary in its application to railroad corporations, for the preservation of property, but will stimulate discoveries of contrivances and the making of experiments, with a view to ascertain means that will most nearly remove all liability to fires communicated by railway locomotives. It thus tends to one direct benefit of railroad corporations, as well as of those whose property is exposed to destruction by their locomotives.

The instruction given by the court accords with the views above expressed; those refused are in conflict therewith.

Defendant insists that the verdict is not supported by the evidence. As we have seen, the question of negligence is one for the jury. There was evidence tending to establish negligence. It was shown that sparks and coals of unusual size were thrown out of the smoke-stack of the locomotive. They were of twice or thrice the size of those usually observed, and the jury were authorized to conclude, from the evidence, that if the engine had been in proper repair or proper contrivances were attached to it, such coals of fire could not have been emitted. There is no dispute that the fire originated from the coals so thrown out by the engine. The evidence introduced by plaintiff, in our opinion, fairly make out a *prima facie* case of negligence on account of defect in the engine, carelessness of those operating it, or want of proper attachments to prevent the spread of fire. The evidence for defendant fails to show that the engine was provided with such attachments or that proper care was used in running it.

The judgment of the district court is affirmed.

Charcoal Iron in Maryland.

Beyond those directly connected with the manufacture or use of car wheel iron, it is probably not generally known that the State of Maryland, and particularly Baltimore and vicinity, produces some of the very best charcoal pig iron in the country, and in such quantities that Baltimore may be considered the principal market for charcoal pig. Orders are received from all parts of the country, as far West as St. Louis. This may appear very much like carrying coals to Newcastle, but it only illustrates the fact that the varieties anduses of iron are as great as those of almost any other commodity, and that the very best iron for one purpose may be quite useless for another. There are eleven charcoal furnaces in the State that produced during the past year about 24,500 tons pig iron, viz:

	Tons.
Stickney Iron Company	3,100
Chesapeake	2,600
Cedar Point	2,500
Maryland (two furnaces)	5,000
Laurel	2,000
Locust Grove	1,000
Muirkirk	2,000
Hartford	1,800
Catoctin (two furnaces)	5,000

It will be seen the Stickney Iron Co.'s furnace manufacture the largest amount. The oldest now in operation is the Catoctin furnace, originally built in 1774, but rebuilt at its present site 1787. Messrs. Reed, Stickney & Co. show pigs bearing date of manufacture as old as 1751, but the first production of iron in Maryland dates considerably back of this. Iron was exported from this State to England in 1717, but at that time nothing more than pig was allowed to be made. Afterward (about 1737), the colonists were graciously permitted to make bar iron, the act providing, however, that they should build no "rolling mills, slitting mills, or forges for making plates, as that would interfere with the manufactures of Great Britain." Among the novel reasons for this restriction, was one advanced by the tanners of Sheffield, who petitioned the British Parliament not to remove the duty, as by reducing the amount of British manufacture, a panic would be produced in the bark trade, charcoal being the only fuel used for smelting in that day. In 1756 there were eight furnaces and nine forges in the State.

Along the lines of the P. W. and B., and the Washington Branch of the B. and O., Railroads for a distance of about 50 miles, there is a bed of ore six to eight miles wide, and in places 50 feet deep. This is a carbonate of iron running from 32 to 40 per cent. from the furnace, and existing in flattened nodules, which are peculiar to Maryland, imbedded in clay, in weight from a few pounds to 100 pounds or more. From its color it is known here as home and chocolate ore. This bed underlies the city of Baltimore, mining now being carried on to a limited extent within the city. One of the largest deposits is found near Fort McHenry. While there is no reason to anticipate a falling off in quantity, the ore is probably not sufficiently abundant to justify more active work. There has been no increase in the amount manufactured during the past 15 years.

In addition to the above, the Ashland Furnace Company manufactured during the past year about 17,000 tons anthracite pig iron.

The Abbott Iron Company has made during the past year about 5,000 tons plate iron. They have recently added a train of three high rolls to the plate mills, which they claim to be the largest chill rolls in use in this country. They were manufactured by Messrs. Garretson & Co. Pittsburg. They are able to roll plates 100 inches wide and girders 40 feet long. Their rail mills have a capacity of 40,000 tons per year, and they anticipate a lively business in this department the coming season. Besides the above there is one other small plate mill owned by Coates & Bro., and a bar iron mill run by Trego, Thompson & Co.—*Iron Age.*

Cincinnati and Indianapolis Junction R. R.

Hon. W. D. Griswold, receiver and commissioner to sell the C. & I. J. R. R., in the suit of Joseph Butler et al. vs. the Junction Railroad Company, has made a report to the court of his proceedings. From an abstract which appears in the Indianapolis *Journal* we gain the following facts:

Mr. Griswold took the road on Nov. 20, 1871, and conducted its affairs until December 2, 1872. He found it without moneys, supplies, or means. It had never been self sustaining, and during no month of his administration did the earnings equal the needs of expenditure. Thus there has accrued a large balance of debt which must be satisfied from the proceeds of the sale.

Of this debt, $21,249 75 arises from the payment of the labor roll of the old company running back two or three months. A part of it is due to the occurrence of several costly accidents which happened immediately after Mr. Grisworld's appointment, $20,000 being required to replace a bridge which was burned near Liberty in December, 1871. Other accidents also occurred from broken rails and other causes.

Since the filing of his report of sale, the receiver has been paid by the C. H. & D. Railroad the full amount of the purchase money. That company owning first mortgage bonds and coupons past due, of the Junction Railroad, to the amount of $1,315,030 the receiver took from that company their receipt on account of the purchase of the road for the proportion of the proceeds of the sale distributable to them as owners of these bonds and coupons. He has also paid out for his own debts and to the employes of the road the sum of $75,000. There still remain first mortgage

bonds and unpaid coupons to the amount of about $78,660, which will be entitled to a like proportional distribution of the proceeds of the sale. The proceeds of sales are held subject to order of court.

Claims are submitted to the court as follows: Receiver's salary, $10,000; Trustees under two mortgages, $2,000 each, $8,000; attorneys for the Trustees of several mortgages, $10,000 each, $20,000.

Mr. Griswold's general account current shows total receipts of $1,356,823 49, of which amount $1,000,000 came from the sale of the road; total credits for amounts paid for same time, $1,306,823 49, of which amount $925,000, is due from D. McLaren for balance of purchase money.

The following gives details of earnings and expenses.

DETAILS OF EARNINGS.

Freight earnings	$166,456 81
Passenger earnings	120,850 60
Express earnings	4,996 07
Mail earnings	5,088 04
	$297,320 52

OPERATING ACCOUNT—EXPENDITURES.

Operating expense	$319,688 16
Taxes	5,715 49
Interest	5,062 22
Legal expenses	60 00
	$330,525 87

RECEIPTS.

Gross earnings	$297,320 52	
Sale of scrap	9,633 88	
Mileage of cars	4,638 13	
Rent	965 66	
		312,558 18
Loss on operating		$17,967 69

Detroit, Lansing and Lake Michigan R. R.

The Grand Rapids *Eagle* thus refers to the prospects for the early completion of this road and its branches; also to its present and prospective business:

Undoubtedly the Detroit, Lansing and Lake Michigan Railroad will be finished west from Howard City to a junction with the Muskegon and Big Rapids Road, at Fremont Center, in Newaygo county the coming summer. It will pass the village of Newaygo, almost through it, on the high table lands across the river from the main portion of the village. The road will be nearer the business center there, if built on the probable line, than the D. and M. is to the business centre of this city. Whether it will be completed any further than Fremont Center or not, is a question that no one, except perhaps Messrs. Joy and Smith, has attempted to answer.

The Stanton Branch from Ionia, north will be completed to the former village, and the cars will run over the whole line in a very few days. Recently some hint has been given, though its correctness cannot be vouched for, of the route and final terminus of the road. It is said it will be built this summer to a junction with the Flint and Pere Marquette Railroad at a point about ten miles east of Evart. It is further rumored that the road will push on to the Straits of Mackinac which it will reach by January 1, 1875. Perhaps it will join the Jackson, Lansing and Saginaw road, when it gets far enough north, as both roads are practically under the same management, financially.

The road is said to be paying well already. One item of freight is 40,000 feet of saw logs, shipped to Ionia every day over it. There the logs are cut into lumber, seasoned and shipped out again over the main line or the D. and M. in about ten days from the time the trees are cut down, so it is said. Railroading and lumbering are "business" in Michigan. To a certain extent the same story might be told of some of the roads entering this city; and doubtless such traffic will increase,

The National Railway Controversy.

The opinion of Vice-Chancellor Dodd, in the case of the Pennsylvania Railroad Company against the Stanhope, was given at Trenton on the 5th inst. The decision is altogether in favor of the Pennsylvania Railroad Company. The Vice-Chancellor decided that, independently of the charge of fraud in procuring the passage of the Stanhope bill, the exclusive right conferred by the Camden and Amboy charter of 1830 still holds good as against any other road intended to injuriously compete with that company. The only remedy is the passage of an act granting a plain franchise for the construction of another road. The accommodation of the public, the Chancellor said, could have no place in court. That was a matter that rested solely with the Legislature. If that body will not charter a new road legally, it is their fault, and the fault of the people who elected them. The Pennsylvania company must be considered a party. The complainants have a clear title; the defendants none. The National Railway Company have no right to construct a road between New York and Philadelphia, and must be enjoined from any further proceedings in that direction. The injunction was made perpetual. The authority asserted by the defendants was derived from combining a number of separately granted charters, viz., for the National Railway Company, the Pepack and Plainfield Railroad, Millstone and Trenton Railroad, Elizabeth and New Providence Railroad, the New Jersey Trust Company, Narrow Gauge Railroad and the Stanhope Railroad.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

THE WHARTON

Safety Railroad Switch.

☞ **BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.** ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.

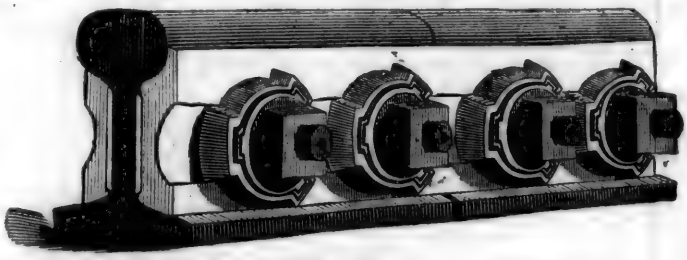
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

New York, Saturday, February 22, 1873.

Alabama and Chattanooga Railroad.

The Alabama newspapers are full of debate on the recent sale by the State government of the Alabama and Chattanooga Railroad. Governor Lewis has submitted to the legislature the provisional contract for the sale, which is executed to the New Orleans and Northwestern Railroad Company. The Montgomery *Mail* says:—

The company, represented by Mr. Ingraham and a set of highly respectable men, as we are informed on good authority, at New Orleans, are either actually constructing or preparing to construct a railroad from New Orleans to Meridian, Miss., and they desire to obtain possession of the Alabama and Chattanooga road with its terminus at Chattanooga, and there connecting with the Great Eastern and Western lines to Louisville, Cincinnati, and St. Louis in one direction, and Knoxville, Baltimore, Philadelphia and New York in the other. They wish to purchase the lands with a view to the development of its mineral treasures, and to use the road as a means of conveying the product of their furnaces and manufactories and quarries to market. The scheme is one full of promise to the purchasing company should their plans be consummated; and provided the company is a perfectly reliable one, with strong English backing, as is generally believed, it is perhaps as beneficial an arrangements as can be made by the State. The sooner the A. and C. Railroad is disposed of by the State, and put in the hands of a company which will properly stock and run it regularly for the convenience of the public, the better. The New Orleans Company pay no back interest, but they assume all interest for the future. This is about the best, we imagine, that can be done.

TO INVESTORS.

To those who wish to REINVEST COUPONS or DIVIDENDS, and those who wish to INCREASE THEIR INCOME from means already invested in other less profitable securities, we recommend the Seven-thirty Gold Bonds of the Northern Pacific Railroad Company as well secured and unusually productive.

The bonds are always convertible at Ten per cent. premium (1.10) into the Company's Lands at Market Prices. The rate of interest (seven and three-tenths per cent. gold) is equal now to about 8¼ currency, yielding an income more than one third greater than U. S. 5-20s. Gold Checks for the semi-annual interest on the Registered Bonds are mailed to the postoffice address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS.

JAY COOKE & CO.

New York, Philadelphia and Washington.

Indianapolis, Cincinnati and Lafayette Railroad.

A Cincinnati paper says: "The Indianapolis, Cincinnati and Lafayette Railroad Co. is regarded now as practically free from financial embarrassment. During the two years that Mr. Ingalls has held the receivership, the entire indebtedness of the (road excepting the regular bonded debt), amounting to over $2,000,000, has been paid, in addition to all current expenses, improvements, &c. The road has also in good running order 40 per cent. more cars and 30 per cent. more locomotives than ever before. The management will now take the necessary steps to relieve the road from bankruptcy, and turn it over to the stockholders, which it is confidently expected will be accomplished by the first of May. The stockholders will then regularly elect a new board of directors, who will choose executive officers. To keep from pecuniary embarrassment hereafter the road must only save enough to pay the interest on its bonded indebtedness outside of the current expenses. That it can easily do better than this, under proper management, is demonstrated by the last two years' experience. In the new management Mr. Ingalls will probably be chosen president."

Portland, Bath and Seashore Railroad.

A meeting of the corporators of the Portland, Bath and Seashore Railroad Company was held at Bath, Me., on the 12th inst. The special object of the meeting was to accept the charter, and effect the organization of the company. Out of the 49 corporators named in the charter 47 were present.

The meeting was organized by the choice of Hon. Charles Levi Woodbury of Boston as President, and A. G. Page, Esq., of Bath as Clerk. On motion of Arthur Sewall of Bath, it was voted unanimously to accept the charter. Hon. J. H. Hubbard moved the adoption of the following by-laws:

First. At the meeting of the corporators a board of nine directors shall be elected by ballot, who shall be the executive committee of the company, and elect one of their own number president, and have power to open subscription books for the stock of the company whenever a majority vote determines it to be for the interest of the company so to do. Previous to opening such subscription books the directors shall give notice of the time and place, when and where, said books shall be opened, by an advertisement at least seven days prior to the time fixed in one of the newspapers in Bath and Rockland. The powers generally vested in a board of directors are to be exercised by these directors, so far as the corporation may legally act.

Second. The Board of Directors prescribed by the previous section shall elect a Treasurer and Clerk. The Clerk shall be sworn to the faithful discharge of his duties and have his office in the city of Bath.

Third. The meeting of corporators shall be called together again at Bath by the President and Clerk at such time or times as the majority of the Board of Directors shall deem advisable.

These by-laws were adopted by a vote of 26 to to 21. The following board of directors was then unanimously elected, viz: Charles Levi Woodbury of Boston, D. Lovering, Jr., of Boston, E. L. Giddings of Boston, T. H. Hubbard of Biddeford, Arthur Sewall of Bath, Charles W. Larrabee of

Bath, Franklin Reed of Bath, Joseph Farwell of Rockland, A. R. Reed of Waldoboro'. Subsequently the following were elected: Charles Levi Woodbury, President; Chas. E. Fuller of Boston, Treasurer; A. G. Page of Bath, Clerk.

The meeting then dissolved, subject to the call of the President and Clerk.

Vermont and Massachusetts Railroad.

The earnings of this road for the years ending September 30, 1871 and 1872, were as follows;

	1871.	1872.
From passengers	$195,917 25	$190,503 93

Net earnings		$169,522 65
Balance of interest account		55,644 27
Net income		$113,878 38

The indebtedness of the company, as will appear by reference to the annexed statement, on the 30th of September, 1872, was $973,843; and the assets, (not including fuel, oil, waste, and stock materals on hand) $252,598 29—showing a balance of indebtedness of $721,244 71. The balance of indebtedness on the 30th of September, 1871, was $770,987 48—a reduction during the year of $49,742 77. The report says:

We have provided liberal accommodations for the public, but our business, as heretofore, has not been sufficient to pay a fair compensation for the capital invested. Our local business, however, is steadily increasing. Out of our income, the past year, we have kept our road safe and in good order, and our equipment sufficient for all the requirements of our business, and have paid to our stockholders during the year, two semi-annual dividends of two dollars each.

It will be seen that our rents furnished nearly enough to pay these dividends, and that substantially all we have received from the public, for freight and passenger business, has been expended for taxes, interest, and on the road and equipment, and in the operations thereof. With the same trains we could do a much larger business with little additional expense; but the convenience of the public will not warrant us in diminishing our trains.

We have commenced and nearly completed a new depot at Athol, which is designed to be of ample accommodations for the increased traffic of that station. It will also be used for a time by the Athol and Enfield Railroad, which has made its connection with our road at this place. We have made valuable improvements at this station in our supply of water.

The Ware River Railroad joins with our road at Baldwinsville Station, but this does not require much additional outlay for buildings for the accommodation of both companies at this place.

Some purchases of real estate at Lake Pleasant, adjoining our location, have been made. This place has been selected by the public for a summer resort for large parties, and our traffic in the warm season has been increased thereby. It was thought best that it should be under the control of the company, and we have secured thereby a large quantity of wood and timber easily accessible, and which will be of great value to the road.

Expenditures for station buildings at Gardner, where the Boston, Barre and Gardner Railroad joins us, will soon be needed. There should also be station buildings at Greenfield, but these will probably be built jointly with the Commonwealth, accommodating the Troy and Greenfield as well as our road.

Surveys for a double track from Fitchburg to Ashburnham have been completed, and it may be considered best to prepare and lay down the second track the coming season.

The certainty that the Hoosac Tunnel will be completed early the coming year, admonishes us that steps are soon to be taken all along the Hoosac Tunnel line of Railroad to prepare for the great changes this event will make. At that time, the lease from the Commonwealth, under which the Fitchburg R. R. Co. and our company operate the Troy and Greenfield Road, from Greenfield to the Tunnel, will expire, and the management and equipment thereof, as well as of the Tunnel, and some miles of railroad west thereof, will rest with the Commonwealth.

We have always hoped and supposed, the line of railroad, so long and so well known as the Hoosac Tunnel line, including the interest of the Commonwealth in the Tunnel, and in the Troy and Greenfield Railroad, would be consolidated into one corporation, in season to make preparation for the increased business which will follow the opening of the through line.

We regret that the Legislature of last year, before which the subject was started, did not see any necessity of action in this matter, but, on a report of a committee, referred the same to the next General Court. That the subject might then receive early attention, we have published notice of an intended petition to the Legislature of 1873, for consolidation of the whole or parts of the line. We deem early and definite action on the part of the Commonwealth of great importance, and renew our expressions of confidence, that the Commonwealth, which has always been a fearless friend of the Tunnel enterprise, will to the end take the wisest steps in relation thereto.

There are many improvements in the line, and much preparation for increasing business, which could be accomplishe usefully and satisfactorily by consolidation, and some of which could not be accomplished at all by the separate companies. For our local business, our road is generally sufficient and convenient, and changes of an expansive character thereon, if made at all, should be made by the whole line, with a view to be most generally beneficial.

Our present business would not warrant a great outlay on our route, as such outlay would impose upon us the burden of a largely increased debt, without a corresponding increase of income to ourselves, or convenient to the public.

The bridges on the line are under careful supervision and have been kept in complete order. The bridge across the Deerfield River and that across the Connecticut, in the branch, are new. Our road bed, sleepers, iron and equipment will compare favorably with those of other railroads. Within four years we have laid down over four thousand tons of new rails, with the most approved joints. This exceeds forty miles of track, or more than half of the whole road. The masonry is generally superior to that of most other lines, and, between Fitchburg and Ashburnham, is already completed for a double track. Very little additional outlay will be required on our present track to make it amply sufficient, so far as a single track is concerned, for the increased business we shall be likely to receive. The main outlay that will be required hereafter will be for additional equipment, a second track, and for contemplated changes of location, convenient to shorten distances and lessen the number of bridges, but of no immediate necessity.

If no consolidation takes place by the authority of this general court, it will remain for our company to carry out such arrangements, and make such expenditures, as the increased business of our road shall require. We have already, as announced in our last report, procured legislation authorizing the issuing of $1,500,000 in bonds and stock, that we may be prepared with the means of meeting all the demands of any reasonable increase of business. We have had the matter of these expenditures and improvements often under advisement. Our road is believed to be in good condition for a great increase of business, but before the completion of the Tunnel, double tracks may be laid in different parts of the road, and our equipment enlarged, furnishing further facilities.

Some new pieces of road have been authorized by law, such as the extension to Grout's Corner of our present Turner's Falls branch, so that our main line may pass through Turner's Falls, and changes in Ashburnham and Gardner; but we cannot now determine how soon such changes will be required, and how far the expenditures of money required therefor, would be warranted, before the actual completion of the Tunnel. The rapid increase of Turner's Falls will make an early change of our route in that quarter, of great public convenience.

We have made frequent and careful surveys of these improvements, and have had under consideration convenient and beneficial changes of this kind, but the estimates have seemed to require so large an outlay, that we have not yet felt authorized to adopt or enter upon them. They are in a condition to be taken up at any time, and the information we have procured concerning them, will leave the matter to be more easily settled, when the changes are required and warranted.

If it shall be the policy of the Commonwealth, that each company shall prepare its own line for the expected increase of business, we have arranged for ample means of performing our part of such preparation, in ample season, as we believe, and of entering upon other convenient, but not absolutely necessary, improvements at an early day.

But it will be seen at once that before any steps are taken by our company for large expenditures, on our part alone, we should know the policy of the Commonwealth as to the Tunnel, and the improvement and equipment of their part of the line, from Greenfield to the State boundary of Vermont. We have every hope that these matters will be settled early in the present session of the Legislature, leaving in any event, ample time for all improvements of road and equipment, on the part of our company, which necessity or convenience can require.

Our stockholders, who examine into the condition of our affairs, will find that they have a valuable property in good condition and carefully cared for, and of great value and importance to the public, in the changes which are about occur-

ring in the routes of railroad traffic in this Commonwealth. We see no reasons why they will not soon receive a fair return on their investment.

The earnings of the Vermont and Massachusetts Railroad were $481,217 58; of the Troy and Greenfield Railroad, $50,561 94; and of the Turner's Falls Branch, $25,387 06—total, as above, $557,196 58.

Boston and Albany Railroad.

The fifth annual meeting of the stockholders of this company was held in Boston on the 12th inst.

The meeting was called to order by Chester W. Chapin, Esq., of Springfield, President of the corporation. The call for the meeting was read by the Clerk and Secretary of the company, J. A. Rumrill of Springfield, who also read the records of the last annual meeting, which were accepted.

The President presented the last annual report, which has been published, and which, on motion of Mr. Samuel H. Russell of Boston, was accepted.

Mr. Seth Bemis of Watertown offered a resolution, in support of which he said that at a meeting of the Board of Trade some gentlemen formerly connected with this road said that the managers of this road were hardly filling the expectations of the public. But he defended the officers from the imputation, inasmuch as the facilities for the transaction of business had been increased and the rates of transportation had been reduced.

He thought that someaction should be taken to bring before the Legislature the subject of filling up the flats of the corporation at South Boston, in order to obtain additional legislation, and requested Mr. Chapin to state his views.

The President said that it was a distasteful matter to be obliged to go into the market and borrow money, and the bonds they were authorized to issue were a heavy load to carry. They had not been able to improve their property because neither the State nor the Boston, Hartford and Erie Railroad had improved their portion of the flats. It had been urged as an excuse that this company was doing all the business they could, but it was constantly increasing, and he thought the State ought to allow them to issue such stock instead of bonds.

They did not feel particularly proud of the depot accommodations in Boston, and hoped that they would soon be able to improve them.

The resolution of Mr. Bemis, which was adopted, is as follows:

Resolved, That a vote of thanks be given to the President and Directors of this corporation for the successful manner in which they have managed the business of the road for the five years of its consolidation from Boston to Albany, not only in our interests as stockholders, but also for the public good, showing by the report an increase of the through business of nearly two hundred per cent., and at a reduction of thirty-four per cent., whereby we are promoting the welfare of Boston and the whole Commonwealth, and fulfilling the most sanguine expectations resulting from the amalgamation of the two roads.

Mr. John M. Hunt of Arlington said there was great commotion in the State growing out of the efforts for the consolidation of the Fitchburg and Lowell Railroads, and he thought some action should be taken to prevent the creation of a great rival company. He offered a series of resolutions to that effect, and in favor of the consolidation into one line of Boston the and Albany Railroad and the Fitchburg and Hoosac lines to be called the Boston and Pacific Railrond, which, on motion of Mr. William Mixter of Boston, were laid upon the table.

Mr. Moses Kimball said that he thought the disposal of the resolutions offered by Mr. Hunt was very proper, although his motives were doubtless sincere. The directors of this road had all they could do to manage its business without interfering with the schemes of other corporations before the legislature. Never in his connection with this road and his experience in the legislature had he known of an instance where the directors had ever suggested that the president should take measures to oppose any of the so-called rival lines, the Boston, Hartford and Erie and the tunnel lines. He defended the company from the charges of attempting to control the grain trade by doubling the rates of storage after it had remained in their elevators for a certain time. The fact was that parties kept their grain in the company's elevators until they could create a rise. Shippers come and say we are stealing their grain when we refuse to deliver more grain than the way bill called for. Instead of putting only ten tons in a car, shippers load cars with sixteen tons, and all over the amount called for in the bill is retained by the company until the owner can prove his property.

An election was then held for a board of directors for the ensuing year, which resulted in the choice of the following gentlemen: Chester W. Chapin of Springfield; D. Waldo Lincoln of Worcester; Ignatius Sargent of Brookline; James M. Beebe of Boston; George O. Crocker of New Bedford; Ginery Twitchell of Brookline; Henry Colt of Pittsfield; Edward B. Gillette of Westfield.

Illinois and St. Louis Bridge.

The steel bridge at St. Louis, Mo., it is anticipated, will be completed by July 1st. The piers and abutments have already been built, and contain 110,000 cubic yards of stone, weighing 287,600 tons. The eastern abutment, which may be considered as a type of all the piers, has its foundations 100 feet below the natural bottom of the river, and rises to a height of 212 feet. The stone used is magnesian limestone and sandstone, and the piers from two feet below low water mark are faced with red and gray granite; of the latter 10,000 cubic yards were brought from Maine by way of the Gulf of Mexico and the Mississippi, at a cost of $40 per ton. The remainder of the granite used was taken from the fine quarries of red granite, discovered near Iron Mountain. The engineers are at present engaged in placing on the piers large hydraulic jacks, to be used in raising strongly-built wooden towers, on which the chains that support the arch cords are to rest while being put together. These chains are composed of links of one-eighth inch iron, six inches wide and thirty five feet long. Five strands of these links will be formed into each chain, which will be made of sufficient length to extend over the tower and hang down about one hundred feet on each side. The arch cords will be composed of staved tubes twelve feet in length, hooped like barrels and made of steel. The entire number of tubes will be 1,012, of which 900 are completed, and the remainder are being turned out at the rate of 200 a month. The tubes are made perfectly straight, and the arching is accomplished by slightly bowing the side ends. They are to be fitted together perfectly, the joints being secured by cast steel hammered clamps, with slats cut in the inside to correspond with a series of turned collars on the tubes. The St. Louis approach, composed of trestle and iron works will be completed in about three months.

The Peninsular Railway.

We learn from the Dowagiac *Republican* that an arrangement has been made between the Peninsular Railway Company and the Pennsylvania Company, under which the latter have agreed to advance to the former $375,000 upon receiving their bonds to the amount of $75,000. By this contract the passengers from the Peninsular Railroad will be taken into Chicago on the Fort Wayne road, saving the cost of constructing another line. It is thought that the traffic of the road will be increased $50,000 per month when it is completed to Valparaiso, and passenger cars can run without change between Chicago and Lansing.

☞ The Governor of Texas says that since his last regular message, two years ago, 567 additional miles of railroads have been completed and put in running order, measuring, together with 511 miles previously completed, a total of 1,078 miles within the State. Great progress in the construction of railroads is now making, and there is good prospect that within the present year 500 miles more will be finished.

☞ The last session of the Texas Legislature granted a charter to certain citizens of Tyler to construct a railroad to be known as the Tyler Tap road, to connect with any road within a radius of forty miles. This empowers it to establish a connection with either the Houston and Great Northern on the south at Palestine, or with the Texas and Pacific, at or near Longview.

Vermont and Massachusetts Railroad.

The annual meeting of the stockholders of the Vermont and Massachusetts Railroad Company was held at Fitchburg on the 12th inst., Daniel S. Richardson, Esq., President, in the chair. The annual report was presented, and printed copies offered for distribution. An election was then held for a board of directors for the ensuing year, and the old board, namely, Daniel S. Richardson, William H. Hill, James A. Dupee, George F. Fay, Francis Goodhue, Wendell T. Davis and Thornton K. Ware, were unanimously re-elected.

Mr. T. K. Ware presented a document from the Vermont Legislature, which confirmed every act passed by the State of Massachusetts in favor of the Vermont and Massachusetts Railroad. The document was received by the Secretary and placed on file.

Mr. Snow, of Fitchburg, offered a set of resolutions, with a brief explanation of the reasons he had for them. He said many years had passed since this road, in connection with the Troy and Boston road, contemplated in the future a through Western route. The faith of these corporations and that of the State was pledged to carry out this work. They have gone on, until now the prize seems almost at hand. It seems to me that we must go forward or prove false to our pledges of faith. The Vermont and Massachusetts Road should give out a full assurance that they intend to keep these pledges. Resolutions should be adopted upholding our President and Directors in their labors looking to consolidation, and also taking notice of those railroads who are interfering unasked in the matters of our road. I think it ill becomes these roads to interfere with our plans now, after we have in long struggles, bearing the burden and heat of the day alone, come to be able to stand on our own footing.

Mr. Snow's resolutions are as follows:

Whereas, For many years the faith of the Fitchburg, the Vermont and Massachusetts, and the Troy and Boston Railroads, together with the faith of the Commonwealth, have been pledged to each other for the construction and establishment of a consolidated route to the West, through the Hoosac Tunnel, and

Whereas, To that intent and purpose they have jointly and faithfully labored, and made large pecuniary sacrifices, it is now hereby

Resolved, That the Vermont and Massachusetts Railroad Company, having during so long a season of difficulty and uncertainty been true to its pledged faith, does not now, when the success of the undertaking has been made a certainty, propose in any particular to depart from it; but to carry out all its agreements faithfully and honorably, not to the letter only, but fully and in the spirit in which they were made.

Resolved, That we approve, and as far as we are able at this meeting, ratify and sanction the course thus far pursued by our President and Directors for a consolidated Western route. And that we authorize and sanction such further and similar measures as may tend to secure to us and to the roads that have been engaged with us, and to the Commonwealth, the return of so many years of labor and sacrifice.

Resolved, That we are willing to extend to all the roads connected with the proposed route its full advantages and benefits, and upon terms of full equality with ourselves.

Resolved, That this undertaking is not dependent for full and final success upon the unsolicited offers of assistance of any corporation by situation and position wholly unconnected with and alien to the proposed consolidated line; and that we rely on the same energy, perseverance, and liberality that have carried this great work to its present stage to insure its final completion.

Mr. G. W. Warren thought there should be a through Tunnel line, but believed the Vermont and Massachusetts road was likely to lose the control of the Tunnel, as there was such a clamoring for it. He offered the following resolution:

Resolved, That the doings of the Board of Director in presenting and prosecuting their petition to the Legislature for consolidating the Hoosac Tunnel Line be confirmed, and that they be further authorized to make such terms with the Commonwealth and other railroad corporations on such terms in behalf of the Vermont and Massachusetts Railroad as may seem to them to be just, fair and remunerative, subject to the ratification of the stockholders.

On motion of Mr. Crocker, the resolutions offered by Mr. Snow, with that presented by Mr. Warren as an amendment, were unanimously passed.

Texas and Pacific Railway.

The editor of the Texas *Iron Age* recently visited the shops now being erected by the California and Texas Railway Construction company for the use of the Texas and Pacific Railway. He says:

The company has some sixty acres of land in a contiguous body. The foundation for the Machine and Car Shops has been laid, the dimensions of which are 224x214 feet. The Machine Shop is to be two stories in height, and the Car Shop one story. The transfer table will be situated between the two buildings which are contiguous. On each side of the shops two round houses will be built to house the engines, one for the use of the Texas and Pacific and one for the Trans Continental. Blacksmith's shops will also adjoin each round house. The machine shop, car shop, and repair shop for locomotives will all be connected, so that it will be virtually but one building. Over a million and a half of brick have been used in constructing the foundations of the shops, it is estimated that from three to four million will be required to complete the buildings. All the brick used are manufactured here in Marshall by the Construction Company.

Location of Furnaces in Pennsylvania in 1871.

The following is the location of the Furnaces in Pennsylvania and the product in 1871, as reported under oath to the State Statistical Bureau at Harrisburg:

Furnaces:	Tons.
ALLEGHENY COUNTY.	
Shoenberger Furnace, Shoenberger, Blair and Co., Pittsburg	24,069
Eliza Furnaces, Laughlin and Co., Pittsburg	23,549
	47,618
ARMSTRONG.	
Brady's Bend Furnace, Brady's Bend Iron Co., Brady's Bend	10,905
Monticello Furnance M'Knight, Porter and Co., Monticello	7,631
Pine Creek Furnace, Brown and Morgan, West Valley Township	3,075
Mahoning Furnace, J. A. Colwell and Co., Mahoning	3,056
Stewardson Furc., F. B. and A. Laughlin	1,904
	26,573
BEDFORD.	
Kemble Furnace, Kemble Coal and Iron Co., Riddlesburg	15,879
Hopewell Furnace, Lawry, Eichelberger and Co., Hopewell	1,176
	17,055
BERKS.	
Henry Clay Furnace, Isaac Eckert, Reading	11,213
Keystone Furnace, Bushong and Co., Reading	10,692
Reading Furnace, Seyfert, McManus and Co., Reading	5,792
Temple Furnace, Clymer, McHose and Co., Reading	4,000
Monocacy Furnace, Wright, Cook and Co., Monocacy	5,274
	86,971
BLAIR.	
Juniata Furnace, Williamsburg Mfg. Co., Williamsburg	2,009
Sarah Furnace, E. Hamond, Greenfield township	2,000
Gap Furnace, Hollidaysburg and Gap Iron Co. (Johnson & Hempeace), McKee's Station	1,713
Springfield Furnace, John Boyer, Morrison's Cove	1,350
	7,073
CAMBRIA.	
Cambria Iron Works, Cambria Iron Co., Johnstown	21,202
Cambria Iron Works, Cambria Iron Co., Conemaugh	3,845
	25,047
CARBON.	
Carbon Iron Works, Carbon Iron Co., Parrysville	25,927
CHESTER.	
Phœnix Iron Co., Phœnix Iron Co., Phœnixville	
Isabella Furnace, Smith & Brother, Phœnixville	687
	18,077
CLARION.	
Red Bank Furnace, Reynolds, Madison Township	6,041
COLUMBIA.	
Iron Dale Furnace, Bloomsburg Iron Co., Bloomsburg	9,877
Bloomsburg Furnace, McKelvy & Neal, Bloomsburg	6,125
	16,002
CUMBERLAND.	
Carlisle Iron Works, C. W. & D. O. Ahl. Boiling Springs	1,250
Pine Grove Furnace, South Mountain Iron Co., Pine Grove	2,317
	3,567
DAUPHIN.	
Wister Furnace, J. and J. Wister, Harrisburg	6,756
Harrisburg Furnace, Price, Brother & Sharp, Harrisburg	5,794
Paxton Furnace, McCormick & Co.	4,700
Cameron Furnace, Cameron, Colder, Ely & Co., Middletown	6,508
Middletown Furnace, Meily, Bro. & Nutting, Middletown	2,064
	25,822
ERIE.	
Erie Furnace, Rawle, Noble & Co., Erie	8,292
FULTON.

YORK.

Aurora Furnace, Wrightsville Iron Co., Wrightsville	4,161
Total product	923,527

Total product in the United States in 1871, estimated at 1,900,000 tons.

☞ At the annual meeting of the stockholders of the Massillon and Cleveland Railroad Company, at Massillon, Ohio, on the 3d inst., the following gentlemen were elected directors: G. W. Cass, J. N. McCullough, Thomas D. Messler, Wm. Stewart, of Pittsburg, Kent Jarvis, and J. G. Warwick, of Massillon, and Daniel P. Rhodes, of Cleveland. At a subsequent meeting of the board, an organization was effected by the election of Thomas D. Messler as President, and F. M. Hutchinson, Secretary and Treasurer.

Exports of Railway Iron.

The exports of railway iron from the United Kingdom were pretty well maintained in December, having amounted in that month to 65,938 tons, as compared with 59,127 tons in December, 1871, and 75 174 tons in December, 1870. In these totals the exports to the United States figured for 31,686 tons as compared with 37,372 tons in December, 1871, and 5,174 tons in December, 1870. In the twelve months ending December 31 last year, the aggregate exports of railway iron from the United Kingdom were 947,548 tons as compared with 981,197 tons in 1871, and 1,051,392 tons in 1870. The exports have thus been progressively declining during the last two years, in consequence, no doubt, of the greatly enhanced prices current. The exports of railway iron to the United States last year were 472,760 tons, against 512,277 tons in 1871, and 421,824 tons in 1870. The exports increased last year to Russia, Sweden, Brazil, Peru, British America, and Australia; but they decreased as regards Germany, Holland, France, Spain, Austria, Egypt, the United States, the Spanish West Indies, Chili, and British India. The value of the exports in December was £809,686 as compared with £508,118 in December, 1871, and £623,678 in December, 1870; and in the whole of 1872, £10,237,768, as compared with £8,084,619 in 1871, and £8,756,552 in 1870.—*Herapath.*

The Indiana and Illinois Central Railway Co.

Offers for sale its FIRST MORTGAGE 7 PER CENT. GOLD BONDS, 30 years to run, with ample Sinking Fund.

The Road runs due EAST and WEST from INDIANAPOLIS to DECATUR, 152 miles, through the richest settled country of the West. It crosses the BLOCK COAL FIELD of Indiana at its best point, and it cannot fail to have a LARGE LOCAL AND THROUGH BUSINESS, as it makes a great saving of distance and has low grades.

It is building for cash, by responsible stockholders, and is BONDED FOR MUCH LESS THAN ITS COST. Eighty five miles will be done and in profitable operation this Spring, the residue within the year. There is no better bond on the market. For pamphlets and information apply to

Walker, Andrews & Co.

No. 14 WALL-ST.

☞ At Yedo, Japan, a suspension bridge two hundred and thirty-four feet long and seventeen feet wide has just been completed. It is designed for the use of the Mikado and his court, and crosses a deep ravine between the palace and the imperial park. The bridge has been built by Japanese workmen, under the superintendence of an English engineer, who is Surveyor General of the Empire.

☞ The exports from Philadelphia to foreign countries during the month of January amounted in value to $1,311,593. Of the total amount, $265,637 worth of goods were exported in American and $1,045,956 in foreign vessels.

☞ Two hundred and thirteen marine telegraphic cables have been laid up to the present time with an aggregate length of 43,783½ miles.

☞ After three months' suspension the running of through trains on the Alabama Central Railroad has been resumed.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An *asterick* (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, February 22, 1873.

Stock Exchange and Money Market.

Money has been decidedly active and close all through the week, with 7 cent. currency and gold as the minimum call loan rate, in most nogotiations, the Stock Exchange firms having been generally obliged to pay the gold prices, and, in several instances, a fractional commission, (1/32@ 1/16th of one per cent.) for the necessary aid. The banks have not been in a position to extend much help. Their deposits, legal tender reserve and specie hoard were all materially reduced; and, consequently, their loan and discount averages were cut down nearly 2½ millions, the last statement having been deemed the most unfavorable weekly exhibit of the year, thus far. The bank averages fell 1¼ millions short of the requisite 25 per cent legal tender reserve, as against their liabilities. The fact that they are now so poor in reserve is said to be due to the severe contraction last year of Three Per Cent. Certificates, and by the unusually heavy shipments of specie within the last six months, which in turn, was caused by the fact that Europe took few American securities during the latter part of 1872. Private lenders were more exacting in their demands. The discount market has been comparatively tame. The best grades of business paper have been in favor within the range of 9@12 per cent per annum. While Money is close and dear here, and in most of the domestic markets, the report from London, is of unusual ease, and very low rates for the temporary use of funds.

The city banks, in their latest return, show a falling off of $2,329,400 of legal tender notes, $2,574,400 of specie, and of $5,685,800 in their deposits, with a contraction of $2,418,300 in their loan and discount averages, and an addition of $19,200 to their item of circulation. The city bank exchanges, last week, averaged 139⅞ millions. The banks now hold $1,299,000 of specie and legal tender notes less than the 25 per cent. of their liabilities required by the National Banking Act.

The clearances of the banks averaged through the week 139⅜ millions a day, and amounted in the aggregate, for the whole week, to $835,845,447 as against $823,394,604 the preceding week. The U. S. Sub-Treasury at this point reduced its currency balance more than a million, and its coin reserve about ⅞ths of a million as the result of the week's business.

The specie reserve of the city banks according to the latest return is $16,461,000, against $19,589,400 same time last year. The city bank deposits are now $214,613,400 against $217,697,200, week ending Feb. 17, 1873. The legal tender reserve amounts to $42,778,300, against $45,620,800 same time last year. The circulation now stands at $27,539,800 against $28,149,200 same time last year. The loans are now $291,520,700 against $284,911,300 at this date last year.

The coin reserve of the city banks is now a about 16½ millions as against about 25¾ million on the 20th of last July; the legal tender reserve is about 42¾ millions against about 55⅛ millions on the statement of June 15th; and the deposits are now about 214⅝ millions, against 247½ millions on the 20th of July. Last week the city banks fell $1,299,000 short of the required 25 per cent reserve of legal tender. In the corresponding week last year they held $3,700,000 above the 25 per cent reserve; in 1871, $19,100,000 above; in 1870, $32,900,000 above; in 1869, $21,300,000 above; in 1868, $25,000,000 above; and in 1867, $23,700,000 above. So that it will be seen the banks are considerably lower in reserve than last year, and very far below the next preceding five years.

Government revenues have been more liberal since our last. The excises yielded within the week about two millions and thus far in the current fiscal year beginning with July 1, 1872, about 74¾ millions. The customs at the port of New York, for the week, were $4,027,556, and at the outports, about $1,400,000 more, in coin or coin certificates.

The U. S. Sub-Treasury office last week received $3,889,636 of currency, and $5,528,903 of gold, the latter including $4,087,000 from customs; and disbursed $4,898,092 of currency and $6,418,023 of gold, the latter embracing $1,066,907 of coin interest.

The U. S. Treasury balances at the close of business on Monday were: of coin, $64,759,775; currency, $5,223,510; legal tenders, special deposit for redemption of banking certificates, $29,570,000. Coin certificates are outstanding for $23,392,000.

Gold speculation has been decidedly strong and buoyant, through the week, on an enlarged volume of dealings at the Gold Board. The Customs drain has been much heavier, having exceeded four millions. The export movement has been moderate. The range of the price during the week has been from 114@114⅞, and the closing quotation on Wednesday was 114⅝ against 114⅛ on Wednesday of the preceding week. The specie outflow last week, was $759,802. The Gold Exchange Bank clearances have averaged about 64¼ millions per day during the week.

The customs demand for Gold last week, averaged $681,167 a day. The arrivals of specie from Europe, Havana and other foreign ports thus far in 1873 have been $126,525 against $113,489 in 1872. The total customs revenue of the Government in coin, at this port, since July 1, has been $86,197,500 against $99,299,527 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $57,204,781, against $58,503,394 during the same time in 1871-2.

The export drain of specie was $759,802 last week, against $154,730 same week preceding year. The shipments since July 1, 1872, have been $44,649,019 against $24,085,542 during the same portion of 1871.

On Wednesday, the specie export was $289,557, all in silver.

Foreign Exchange has been offered with comparative freedom, to the depression of rates, on a moderate call for even prime bills. Bankers' sixty day bills on London closed at 108⅞@ 109⅛; sight bills on London, at 109¾@110. The week's exports of Domestic Produce have been to the currency value of $5,641,336.

Government proposes, under the Treasury programme for February, to sell, during the month, through the local office here, Gold as follows: Thursday, February 27—$1,500,000, And to buy in Five-Twenties, as follows: Wednesday February 26—$1,000,000.

Government securities have been in very good demand, and have held their own well as to values, despite the continued activity in Money. There has been an improved export inquiry for the gold-bearing bonds, especially the six per cents of 1881, and the later issues of the Five-Twenties, largely on German account. The offerings of all issues have been comparatively moderate.

Government bought in on Wednesday a million Five Twenties, from 113 70@113 85 net out of an aggregate offering of $5,128,150.

U. S. sixes of 1881 closed on Wednesday of this week at 118¼@118½ U. S. Five-Twenties of 1862, 115½@115⅝; U. S. Five-Twenties of 1864 at 115½@115⅝; U. S. Five-Twenties of 1865, 115½@116; U. S. Five-Twenties of 1865 consolidated, 114⅜@114⅝; U. S. Five-Twenties of 1867, 116⅛@116⅜; U. S. Five-Twenties of 1868, 116¼@116½; U. S. Ten-forties at 114¼@114½; U. S. Fives of 1881 (Funding Loan) 113½@113¾; Six per cent. currency Sixes from 114⅝@114⅞.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 5.	Feb. 12.	Feb. 19.
Consols	92⅜	92⅜	92⅝
U. S. 6-20s, 1865....	92⅞	92⅝	92¾
" 1867	94¼	93½	93¼
" 10-40s	92⅛	91½	89½
New Fives of 1881...	91@91⅛	90½	90½
Erie	52¼	52¼	51½

State bonds have been comparatively quiet, as a rule, with more than ordinary irregularity as to values.

In the better class of Railway Mortgages an increased business has been transacted at firm and buoyant rates. The inquiry has been mostly for investment purposes, in good part, on foreign account. Central Pacific Sixes closed strong at from 104⅛@104¼, with a limited amount of the bonds available, and a good demand noted. Chesapeake and Ohio Sixes have been in better request, and closing firmly at 87 and interest. Western Pacific Sixes have been more sought after and quoted up to 94¾@95. The Northern Pacific 7-30 Loan has been of ready sale to investment purchasers at par and interest.

Railway and Miscellaneous share property has been quite active, and, notwithstanding the Money stringency, values have been well maintained, as a rule, though the later dealings indicated rather less buoyancy.

The Metal trade has been less active, but held with increasing confidence; sales, 150,000 lbs. at 34½c.@35c., cash, and 50 tons best selected English at 30c.@30⅜c. Scotch Pig-iron held at high figures on light offerings, checking business; sales, 100 tons Eglinton at $55@$56; 50 tons Glengarnock at $58; 25 tons Gartsherrie at $60. American Pig-iron steady and in demand; 300 tons Allentown and Cold Spring sold at $50 and $49, and 400 tons White Mottled on private terms. Iron Rails and Wrought Scrap-iron quoted as before on a dull market. Lead quiet at 6 37½@6 50, gold, for ordinary foreign. Spelter sold to the extent of 25 tons Silesian, at 7⅜c., gold; market firm. Pig-iron inactive, with Straits quoted at 32c.@32⅜c., on sales of 250 slabs, at 32c., and English, at 31¾c.@33c., gold, here and to arrive, with sales of 10 tons. Tin Plates in fair request, at full rates; sales 2,500 boxes charcoal, at $11 50@$11 62 ; 1,000 boxes Coke, at $10 25; and 800 boxes Charcoal Terne, at $10 50, gold, per box. Zinc quiet at previous figures.

General business has shown less animation in the line of domestic produce. Breadstuffs, Cotton, Wool, Hay, Hops and Seeds closed less firmly. Provisions and Petroleum stronger. Middling upland cotton, left off tamely on Wednesday at 21@21⅞ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,540,183 bales, against 2,132,775 bales same time in the preceding year; exports 1,273,524 bales against 1,146,948 bales in the previous year; stock at the ports at latest dates, 524,500 bales against 587,100 bales same date 1871.

Foreign goods have been somewhat brisker. The dry goods movement has been more animated. Groceries have attracted more attention; Sugars quoted less firm. The week's imports amounted to $11,364,868, including $5,095,845 of dry goods.

Ocean freights have been moderately active, at generally firm rates, though Grain to Liverpool was taken by steam at easier figures. Vessels yet quite scarce.

At the Live Stock Markets, Beeves have been in good request at from 8@14½ cts.; Veals at 7@12 cts.; Sheep at from 4½@8 cts.; Swine at 5¼@5⅝ cts. per lb., all live weight. The week's receipts were 7,388 Beeves, 660 Veal Calves, 14,168 Sheep and Lambs, and 36,712 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—South Carolina 6s, new, Apl. and Oct., 25; do. Jan. and July, 21¼; Georgia 7s, end., 85; N. Y. State 7s, B. ☞ The Hillsboro (N. C.) *Recorder* publishes the proceedings of a meeting held at Leasburg, N. C., in behalf of the prosecution of the Danville and Fayetteville Railroad, and represents that the people in the vicinity of the proposed line are waking up to its importance, and mean to give it a helping hand. It calls for a meeting of the people of Hillsboro to take the subject into consideration.

☞ The Pittsburg and Bellefontaine Railroad Company has been organized, with a capital stock of $1,000,000, to construct a railroad from Loudonville, in Ashland County, Ohio, through Ashland, Richland, Knox, Morrow, Marion, Delaware, Union and Logan Counties, to Bellefontaine. The corporators are G. W. Kemp, E. J. Howenstine, H. Cassell, E. Dix, T. P. Cratty, N. B. Wigatt and I. N. McBeth.

☞ It is expected that the Portland and Ogdensburg Railroad will be finished to within eight miles of the White Mountain Notch the coming summer.

☞ The survey of the Lyme and Colchester (Conn.) Railroad is completed. The estimate of the whole cost of the road and equipment does not much exceed $500,000.

☞ The coal tonnage of the Columbus and Hocking Valley Railroad in January was 64,752 tons. The total earnings of the company for January were $86,782 90.

☞ The Ridge Copper Company has declared a dividend of $2.50 per share, payable February 24th.

Toledo and St. Louis Air-Line Railroad.

The Toledo, Thorntown and St. Louis Railroad has been consolidated with the St. Louis, Shelbyville and Detroit line, under the name Toledo and St. Louis Air Line Railroad. At a recent meeting held at Indianapolis the following officers were elected: R. Gardner, Kalamazoo, Michigan, President; Colonel Thomas S. Sprague, Detroit, Michigan, Vice-President; Mr. Cowgill, Wabashtown, Indiana, Treasurer, and Hal. McNeal, Detroit, Secretary. Mr. M. B. Garten was made General Agent for the Indiana division. The proposed road will run through a level and very productive country, rich in agricultural and mineral wealth, and will open up to the world the rich veins of coal and iron in Fountain and Vermillion Counties, Indiana, through which it will run. The total length of the road will be 393 miles from Toledo to St. Louis. Forty miles of the road from Shelbyville, to Arcola, Illinois are graded and ready for the iron. This enterprise was projected in June, 1871, and it is intended to have the road built and the cars running over the entire line by January, 1875.

☞ Mr. J. A. Adamson, Superintendent of ties Texas and Pacific Railway, reports the work generally progressing rapidly. Roe, Zoebringer & Co., contractors for track laying, have commenced laying iron at Dallas. There are seven miles of iron at that point. At Sherman the warehouse of the company is nearly completed, and the grading of the road through that town finished. The prospects for a rapid pushing forward of the work are very favorable, and renewed activity will be manifested as the Spring opens.

☞ The officers of the California and Texas Railway Construction Company are as follows: B. H. Bristoe, of Philadelphia, President; Judge E. B. Hart, of New York, Secretary; Geo. D. Krumbhaar, of Philadelphia, Treasurer; Gen. G. M. Dodge, Chief Engineer; J. M. Eddy, Assistant Superintendent; M. H. Goble, Auditor; C. L. Frost, Cashier; D. C. Adams, General Supply Agent.

☞ In pursuance of the general railroad law of 1872, articles of incorporation have been filed with the Secretary of State of Wisconsin, and a patent has been issued organizing the Wisconsin and Superior Railway Company. The capital stock of the company is fixed at $2,000,000. It authorizes the company to construct a road from Oshkosh northerly to Lake Superior.

☞ A Company has been incorporated to build a broad gauge railroad from Salt Lake City to the Union Pacific at Echo, through Parley Park Canon, with a capital of $2,000,000. Jacob Lawrence is president of the company.

☞ Work on General P. E. Connor's Salt Lake, Sevier and Pioche Narrow Gauge Railroad has been commenced. He expects to have the cars running to Ophir in July.

☞ Mr. E. B. Ward, proprietor of the rolling mill at Detroit, has taken the contract to build the Texas extension of the Mobile and Chattanooga Railroad.

☞ There was 15,000 tons of iron shipped from the Davis iron ore mine in Salisbury, Conn., in 1872.

☞ The Treasurer of the State of Maryland has subscribed $163,000 to the capital stock of the Southern Maryland Railroad Company. The road will extend from Point Lookout, in St. Mary's to some point in Prince George's county, and, it is said, thence continuously to Washington city, to connect either with the Baltimore and Ohio or Potomac Road. The Baltimore and Drum Point Railroad Company has also received a subscription of $152,000. It is stated that both of these roads are prosecuting the construction of their lines vigorously. The sums subscribed are payable from the State Treasury.

☞ The Alexandria (Va.) *Gazette* states that the surveys for the Piedmont and Potomac Railroad, the proposed connection between Washington and Staunton, have been pressed forward with energy, and but for the severity of the winter would have now been finished. The route is favorable, and when completed it will form part of a new line from the Pacific to the Atlantic seaboard, *via* the national capital.

☞ The Coal River and West Virginia Mining and Railroad Company was organized in Cincinnati a few days since. They purpose to mine coal on Coal river and its tributaries, and to transport it to the mouth of Coal river, where their railway will strike the Chesapeake and Ohio Railroad, and also the Kanawha river, giving the advantage of transportation by water and rail.

☞ The charter of the Elkton and Oxford Railroad Company has been filed at Annapolis Md. The termini of the road are Oxford, in Chester county, Penn., and Middletown, Del. The road is to run near or through Elkton, Md. The capital stock of the company is $250,000.

☞ The Chicago *Tribune* announces that Yankton has secured all-rail connections with that city, the Dakota Southern Railroad supplying the link. The line runs northward from Sioux City, Iowa, along the east bank of the Missouri River, a distance of sixty-two miles to Yankton.

☞ The Green Bay *Advocate* says that the first consignments of wheat from St Paul are now on the way there over the Green Bay and Lake Pepin and the West Wisconsin Railroads. The distance from Green Bay to St. Paul over these lines is 282 miles.

☞ The Little Rock (Ark.) *Republican* of February 11th says track laying on the Little Rock and Fort Smith road is progressing at the rate of one mile per day. Trains will run to Russellville within two weeks, and to Clarksville the last of the coming month.

☞ Mr. James B. Hodgskin, treasurer of the Atlantic and Great Western Railroad Company, has been elected vice-president, and will hereafter fill the double position of vice-president and treasurer.

☞ The Marysville, Washington and Denver City Road is projected to start at Marysville, Marshall county, Kansas, and run westward through the Northern tier of counties.

☞ The Cheyenne, Iron Mountain and Pacific Railroad has been organized, with Dr. H. Latham as president, and Governor J. A. Campbell as vice-president.

Journal of Railroad Law.

RAILROAD COMPANIES—INJURY TO ANIMALS—CONSTRUCTION OF STATUTE.

The facts of the recent case of The Jeffersonville, Madison and Indianapolis Railroad Company *vs.* Parkhurst, (34 Ind., 501,) are fully and clearly stated in the following opinion by

PETTIT, C. J.—This suit was brought before a Justice of the Peace, by the appellee, against the appellant, for killing a cow by its train of cars, There was a judgment for the appellee before the justice, and appellant appealed to the said Court of Common Pleas. Trial and judgment for appellee in that court, from which it is brought to this court by the appellant.

The first assignment of error is the giving of instructions, which are as follows:

"1st. This is an action by the plaintiff against the defendant to recover damages for the killing of a cow on the track of the defendant, in Johnson county, and the plaintiff sets up in his complaint two grounds of recovery.

"2d. The first paragraph of the complaint alleges that the cow was killed at a point on the railroad where it was the duty of the defendant to fence against stock, and that the defendant had not so fenced in her track, by reason of which the cow strayed upon the track, and was thus killed.

"3d. The second paragraph of the complaint alleges, that the defendant so carelessly and negligently ran her locomotive and cars over the road, that the cow was killed by reason of such negligence in the defendant.

"4th. To enable the plaintiff to recover on the first paragraph of the complaint, he must show that the place where the cow strayed upon the railroad was at a point where the company were bound to fence the road, and that such point was not so fenced, or that such point was where the company were bound to maintain a cattle guard, and that such guard was not in proper condition to keep stock off the track of the road.

"5th. If you should find from the evidence in this case that the place where the cow got on the track was inside the corporate limits of the city of Franklin, you must further find that such place was not at the crossing of any street or alley, or at a point where, from the necessary use of the grounds, it would be unlawful or unreasonable to require the railroad company to maintain a fence, before the road would be liable for not fencing.

"6th. The railroad company would not be bound to erect and maintain cattle guards at the crossings of the public streets and alleys inside the corporate limits of the city of Franklin, nor would said road be bound to fence the lots lying on either side of her track between the crossings of such streets or alleys over the railroad; but beyond such crossings the road would be bound to maintain her fences and guards, the same as if running outside the corporation."

We think and hold that there was no error in giving these instructions and that they were clearly the law of, and proper in, the case. The appellant could not complain of them.

The judgment is affirmed, with ten per cent, damages and costs.

☞ The Metropolitan Branch of the Baltimore and Ohio Railroad, extending from Washington to Point of Rocks has been completed. ‖

☞ The Reading Coal and Iron Company have issued a circular indicating the course it proposes to pursue under its new scheme to regulate the trade. It promises that no mixture of different grades of coal will be permitted, and a rigid system of inspection is to be carried out at different points to insure the coal being delivered in a proper condition. Once a month the Company will issue circulars fixing the price of coal for the ensuing month, and contracts may be made subject to these circular prices. Thirty-one collieries are named that are worked by the Company, and twenty-six others are quoted whose product will be disposed of through their agency. This circular inaugurates the first active step in the new policy, which has already been somewhat widely discussed, and the practical workings of the system will soon be exemplified.

☞ The Philadelphia *Ledger* of 17th inst. fixes the total anthracite tonnage for the week ending 15th inst. at 288,661 tons, and for the coal year at 1,390,859 tons, against 1,619,265 tons to corresponding time last year, being a decrease of 42,124 tons. The bituminous tonnage for the week is 26,857 tons, and for the year 168,078 tons, giving a total of all kinds for the week of 265,518 tons, and for the year 1,787,343, being an increase as against production to same time last year of 18,237 tons.

☞ From the returns of the coal trade of Nova Scotia for 1872, the following figures are culled: Sold round, 716,329 tons; slack, 69,585 tons; consumed at the collieries, 95,036 tons; total quantity raised, 880,950 tons, being an increase of 207,708 tons over 1871. The increase in the sales of 1872 over 1871 was 189,496 tons.

Anthracite Coal Trade of the United States.

Last year the quantity of Anthracite sent to market was 15,198,103 tons, and the estimated consumption in the coal regions was put at 2,720,000, making the whole quantity mined 17,918,103 tons, as follows:

	Sent to market. Official.	Home consumption. Estimated.	Total. product'n.
Schuylkill and Columbia	5,124,780	900,000	6,024,780
Northumberland..	*628,866	170,000	798,866
Lehigh Region	2,249,356	400,000	2,649,356
Wyoming Region.	6,713,773	1,200,000	7,913,773
Lykens Valley	481,328	50,000	531,328
	15,198,103	2,780,000	17,918,103

* Only a portion of the trade for Northumberland County. The balance is reported elsewhere.

The whole quantity mined and sent to market in 1872, was as follows:

	Sent to market. Official.	Home consumption. Estimated.	Total. product'n.
Schuylkill	4,186,953	875,000	5,011,593
Columbia	319,260	25,000	344,220
Northumberland..	1,221,527	170,000	1,391,327
Lehigh Region	3,610,074	500,000	4,110,374
Wyoming	9,191,171	1,500,000	10,691,171
Lykens Valley	450,328	40,000	490,328
	18,929,313	3,110,000	22,039,313

The total supply of Anthracite Coal sent to market sums up as follows:

In 1872	18,929,313
In 1871	15,198,103
Increase in 1872, tons	3,731,210

Notwithstanding the large increase in 1872, we believe the market will take an increase of about 2,000,000 tons Anthracite in 1873.

OFFICIAL TABULAR STATEMENT.

Of the whole product of Anthracite Coal, and that portion of Bituminous Coal moved toward the seaboard in 1872, compared with 1871:

	1871. Tons.	1872. Tons.

Lykens Valley Region	481,328	450,328
	450,328	
Decrease in 1872	31,000	
Total Anthracite	15,198,103	18,929,313
		15,198,103
Increase in 1872		3,731,210

The supply of Anthracite Coal sent to market in 1871 and 1872 was furnished as follows:

* The whole coal tonnage of the Reading Railroad and branches in 1872 was 6,185,434 tons, including 221,146 tons of Anthracite and 452,835 tons of Bituminous coal received at Harrisburg and other points, all of which is reported elsewhere.

† The total coal tonnage of the Lehigh Valley Railroad, was Anthracite 3,850,117, and 27,061 tons of Bituminous, in all 3,877,179 tons, part of which is reported by other companies in their tonnage.

‡ The total coal tonnage of the Lehigh and Susquehanna Railroad in 1872, was 2,527,069 tons. The balance is reported elsewhere in detailed statement.

‖ The total tonnage of the Delaware and Hudson Canal Company, was 2,749,965 tons—but 233,400 tons is reported *via* Lehigh.

§ The whole product of the Northumberland County Coal Trade in 1872, was 1,221,327 tons. The balance is reported by other companies.

	1871. Tons.	1872. Tons.
Schuylkill & Columbia Co's.	5,124,780	5,107,451
Northumberland	628,866	569,689
Wyoming Region	6,713,773	9,191,171
Lehigh	2,249,356	3,610,674
Lykens Valley	481,328	450,328
	15,198,103	18,929,313
		15,198,103
		3,731,210

Since 1860 we give below the quantities of coal sent to market from the three principal Regions—the Schuylkill, the Wyoming, and the Lehigh:

Year.	Schuylkill.	Wyoming.	Lehigh.
1860	3,270,516	2,941,817	1,821,774
1861	2,607,489	3,055,140	1,738,377
1862	2,890,198	1,145,770	1,351,054
1863	3,443,265	3,759,610	1,984,713
1864	3,642,218	3,960,836	2,054,669
1865	3,735,802	3,256,658	1,822,535
1866	4,633,487	3,786,616	2,128,867
1867	4,334,820	5,328,322	2,062,446
1868	4,414,356	5,989,813	2,507,582
1869	4,748,960	6,068,395	1,929,583
1870	3,720,103	7,599,902	1,040,303
1871	5,124,780	6,481,171	2,249,356
1872	5,107,451	9,191,171	3,610,674

This table shows where Schuylkill County is drifting, and also the necessity of energetic measures of some kind to rescue it from its downward tendency. In 1866, the Schuylkill Region sent to market 4,633,487 tons, and the Wyoming and Lehigh sent 5,865,483 tons, an excess of only 1,231,996 tons. In 1872 the quantity furnished by the Schuylkill Region was 5,107,451 tons, an increase of only 473,964 tons, while the Wyoming and Lehigh Regions furnished in 1872 12,801,845 tons, an increase of 6,936,362 tons. Under such circumstances it was absolutely necessary that a change of some kind should take place—but whether the change proposed will prove to be beneficial or not to the Regions and its business, remains to be tested. One thing is certain that corporations and individuals side by side, and both engaged in the same business, never have succeeded together, nor never will—one or the other must go under. Such has been the result in the Wyoming Region, and such will be the result in this Region. It is a question of power; and unless the Railroad Company can be stripped of all mining privileges, and confined to transportation alone, it is not difficult for any person to judge of the result. One thing, however, is certain, that the Railroad Company must build up the Region in order to build up itself, and we heartily sympathize with those who are affected in their business relations by the radical change that is taking place in order to rescue the Region from its downward career.—*Pottsville Miners' Journal.*

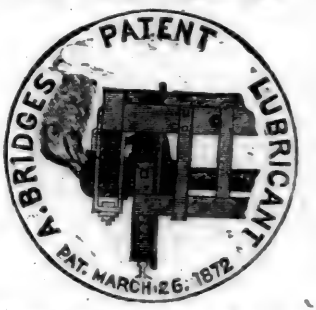
☞ The Delplos, Ohio, *Hrrald* says that the managers of the Toledo, Delphos and Indianapolis Railroad are working persistently and spending a good deal of money, that the best of feeling exists all along the line, and that right of way and local aid is being augmented quite rapidly. The directors have before them proposals for building a good part of the line, and may at any time place a portion under contract.

☞ S. W. Dorsey has been elected president; T. M. Mahan, vice-president; Frank S. Davis, treasurer, and C. C. Waters, secretary of the Memphis, Pine Bluff and Shreveport Railroad Company.

☞ The tunnel on the Albany and Susquehanna Railroad, distant three miles from Binghamton, has been completed. Trains have been running through for nearly four years, but the arching was not finished until quite recently.

☞ The Davenport and St. Paul Railroad now has 146 miles of track laid and in use. On the main line, the iron is laid up to two miles north of Strawberry Point. Beyond that point the grading is nearly completed to Fayette, and iron sufficient to lay the track to that place has already been received. From Fayette north fully two-thirds of the grading for forty-five miles of road has been done, while the entire work has been let to the Minnesota line. On the opening of the spring, work will be resumed and pressed forward until Cresco is reached, by midsummer.

☞ The rails for the Wisconsin Valley road, from Tomah to Grand Rapids, a distance of forty five miles, have been purchased. Passenger, express and baggage cars, and 300 freight cars, for this line, have since been ordered. This road is being built, or at least assisted, by the Dubuque and Minnesota Railroad, and it is designed to form one of the principal feeders for that line. The southern terminus will be at some point below La Crosse.



☞ Surveys have been made for a double-track iron bridge for the Troy and Greenfield Railroad over the south branch of the Hoosac, at North Adams, and the tunnel through Robinson's is to be enlarged so as to admit of another track.

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

THE WHARTON

Safety Railroad Switch.

☞ BOTH RAILS of the main track absolutely immovable, continuous and unmutilated. ☜

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.,
28 South 3d St., Philada., Pa.
P. O. BOX, 2353, Phila.

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

CHAS. J. PUSEY,

78 BROADWAY,

NEW YORK.

American & English Rails,

LOCOMOTIVES and CARS,

FISH PLATES, SPIKES, &c., &c.,

SOLE AGENT FOR

Atkins Bros' Pottsville Rolling Mills.

Special attention given to filling orders for Small *T and Street Rails*, of every weight and description.

Old Rails Bought or Re-Rolled, as Desired.

P. O. Box 5222.

EDWARD J. ETTING,

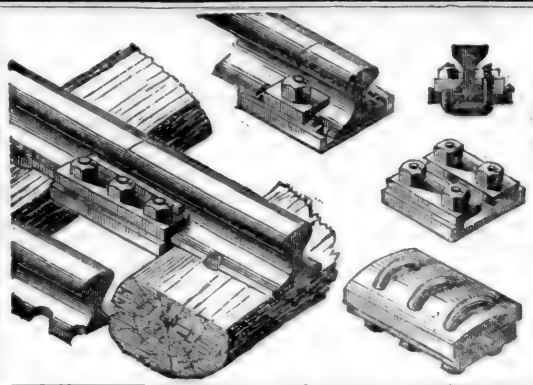
105 Walnut St., Philadelphia,

MANUFACTURERS' AGENT FOR THE SALE OF

AMERICAN AND FOREIGN

RAILROAD IRON

Of every Size, Weight and Pattern,



For Steam and Street Roads.

ROLLING STOCK & SUPPLIES.

Old Rails Re-Rolled & Exchanged for New.

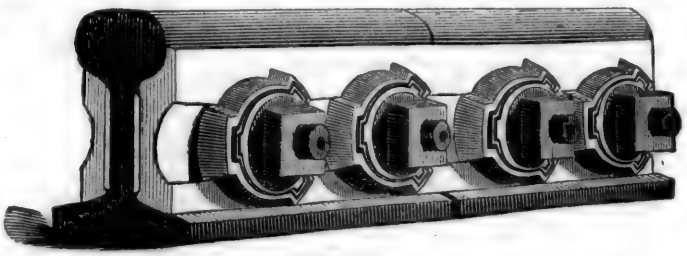
☞ Special attention paid to the Purchase and Sale of Old Railroad and Scrap Iron.

CONSIGNMENTS SOLICITED.

FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

RAILROAD IRON.

ENGLISH and AMERICAN Railroad Iron for delivery in New York and other markets in the United States and England. For sale by

S. W. HOPKINS & CO.,

New York, Saturday, March 1, 1873.

Philadelphia and Reading Railroad.

The Philadelphia and Reading Railroad Company has fifteen classes of bonds, namely—the 6 per cent coupon mortgage loan of 1893 for $1,189,500, the 7 per cent debenture coupon bonds of 1890 for $28,000, the 6 per cent mortgage coupon bonds of 1896 for $96,000, the 6 per cent mortgage coupon bonds of 1880 for $1,521,000, the 6 per cent sterling coupon mortgage bonds of 1880 for $976,800, sterling 5 per cent mortgage coupon bonds of 1880 for $182,400, sterling 7 per cent mortgage coupon bonds of 1874 for $43,200, sterling 7 per cent mortgage coupon bonds of 1877 for $134,400. All the foregoing bonds have their semi-annual interest periods in January and July. Besides these it has a 7 per cent dollar mortgage coupon bond of 1893 for $2,700,000, the semi-annual interest on which is payable in April and October; a 7 per cent coupon consolidated mortgage loan of 1911 for $7,696,000, the semi-annual interest periods of which are June and December; a 6 per cent mortgage sterling or gold loan of 1911 for $7,000,000, a 6 per cent dollar loan of 1911 for $376,000, a 7 per cent registered mortgage loan of 1911 for $3,414,000, and a 6 per cent gold mortgage bond of 1911 for $624,000, the semi-annual interest periods of which are also June and December. The new consolidated 7 per cent bonds, to the amount of ten and a half millions, have the privilege of conversion into capital stock at par, and this privilege, in the opinion of many, gives them a preference at present prices over the other bonds of the company.

TO INVESTORS.

To those who wish to REINVEST COUPONS or DIVIDENDS, and those who wish to INCREASE THEIR INCOME from means already invested in other less profitable securities, we recommend the Seven-thirty Gold Bonds of the Northern Pacific Railroad Company as well secured and unusually productive.

The bonds are always convertible at Ten per cent. premium (1.10) into the Company's Lands at Market Prices. The rate of interest (seven and three-tenths per cent. gold) is equal now to about 8¼ currency, yielding an income more than one third greater than U. S. 5-20s. Gold Checks for the semi-annual interest on the Registered Bonds are mailed to the postoffice address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS.

JAY COOKE & CO.

New York, Philadelphia and Washington.

☞ The Troy and Albia Railroad is about three miles long, and was maintained and operated during the past year at a cost of $16,647, while the total receipts were $20,728. The company have seven passenger cars and thirty-five horses. Capital stock $50,000, $44,700 of which has been paid in. The funded and floating debt amounts to $35,410. 245,124 passengers were carried during the fiscal year.

☞ The work upon the road for rapid transit in Brooklyn will no doubt be commenced in a short time, as the 5,000 shares of the Steam Transit Company have all been taken up, and the first instalment of ten per cent on the shares was paid in at the Nassau National Bank on the 25th ult.

Chicago and Northern Pacific Air-Line Railway.

Chicago is about to grapple with the resources of a new, vast territory that has not yet paid it tribute. The project has assumed a definite shape, and is nothing less than the construction of an air-line railroad to Duluth. It was some months ago that the project was first agitated among New York capitalists and railroad men. A glance at a railroad map showed that the Nothern Pacific Railroad had not been properly provided for in respect to an eastern terminus, as long as Chicago had been left out of consideration. The necessity for a road which should traverse the country between Chicago and Duluth was readily seen. Some time since, a party of New York gentlemen, who had given financial encouragement to the proposed new road, went to Chicago, accompanied by surveyors and engineers. The right of way, as far as the State of Wisconsin is concerned, was determined upon and purchased, and work was begun immediately. The company has been formed in this city, with a capital stock of $10,000,000, and an additional $10,000,000 in bonds. The officers are: George E. White, formerly President of the Western Union Railroad, President; George M. Graves, formerly a director of the Erie Railway, Vice-President; John C. Barnes, Treasurer; H. A. Warren, Secretary; Nelson Luddington and J. R. Young, of Chicago, and James L. Anthony of New York, a gentleman largely interested in railroad operations, Directors. After the formation of the company a number of Chicago parties became interested in the proposed new railroad and invested largely.

The route through the State of Wisconsin has been decided upon, and already about forty-five miles of road is graded, ten of which is in operation. The road at present starts from Richmond, on the Wisconsin State line, and the grading operations have reached Jefferson. It will thence extend to Portage City, crossing the Wisconsin River, the Yellowstone, thence continue through Nealsville and Neenah, and afterward proceed in a due north-westerly direction to Duluth. The course to pursue in constructing the Illinois portion of the line has not yet been determined. The new line, as its course indicates, will be called

the Chicago and Northern Pacific Air Line Railway. It will indeed be virtually an extension of the Northern Pacific Railroad, making Chicago the eastern terminus.

Boston and Lowell Railroad.

The receipts from operations of this road for the years ending September 30, 1871 and 1872, were as follows:

The increase of traffic revenue over last year is $88,338 25, and the increase in traffic expenses $72,191 06. The report says:

The average increase of traffic revenue for the last five years is 6 per cent. per annum. For the past year it amounts to 7 per cent.

The traffic expenses of the past season are charged with some extraordinary items, which are not likely to occur every year. A lawsuit with the town of Woburn to recover for injuries caused to a person from stepping into a post-hole, dug by an employee of the railroad at the side of the highway to accommodate private persons in moving a building, was decided against the town, and the damages paid were recovered from the railroad, amounting, with costs, to $22,642 67.

Unusual expenditures have been made upon the bridge structures and wharves about the Charles River. These structures are now put in such thorough repair, that, with the exception of a new draw required by the Legislature to be made in the freight bridge, they will demand but small comparative outlays for many years to come.

In constructing the new station-house, at Boston, while occupying the same grounds for passenger traffic, there has been a very considerable cost for temporary structures and tracks, and of removals, which has gone to swell the current expense. The permanent structures are now so far completed that further outlays of this character will be comparatively small.

The equipment of the joint roads has been kept in good repair, and all depreciations covered by the construction of new cars and engines in place of such as had become unserviceable, besides which, large additions have been made, to meet the growing wants of the business. Since 1868, the number of locomotives has been increased from 40 to 54; of passenger and baggage cars from 66 to 93; of freight and gravel cars from 1026 to 1360.

In the same time the freight handled per annum, including that taken in cars belonging to other roads, has increased from about 600,000 to 928,000 tons, and the passenger hauled one mile in our cars and others, increased from 22,718,000 to 37,053,000.

The amount charged by this company to construction account, for their proportion (69 per cent) of the increase of equipment above named, is $69,000.

As authorized by you at the last annual meeting, an issue has been made of bonds of this company, bearing 7 per cent interest, and having 20 years to run. Of the one million to be issued, there had been sold on the first day of October, $686,500. These sales were effected in our own office, without brokerage and at a premium of 6 per cent.; yielding a bonus of $41,190. Since the first of October, other sales of considerable amount have been made, indicating the probability that the entire lot will be disposed of at the same rate.

Arrangements have been entered into with the Nashua and Lowell Railroad Company, under which the interest accounts on our investments in the Lexington and Arlington Branch, the Stoneham Branch, the Mystic River Branch, improvements and real estate in Boston, Charlestown, and Winchester, and purchases of stock in the Lowell and Lawrence and Salem and Lowell Roads, amounting in all, at the present time, to about one million eight hundred and forty thousand dollars, is paid out of the joint moneys of the Boston and Lowell and Nashua and Lowell Roads.

Since the date of the last annual report, the improvements in Boston have been carried on vigorously. The train-house of the new passenger station is very nearly completed. The walls of the head-house are up, and the roof is now being put in place. The entire completion of the structure and its approaches may be expected during the coming summer.

At East Cambridge a large tract of our flats is being walled and filled for the wants of our growing business.

At the Mystic River we have under contract, and in progress, the walling and filling of about five acres of land, and also the dredging and pier wharfing requisite for about one thousand feet of water front, suitable for docking the largest ocean steamships. By next midsummer we expect to have ample accommodations for the European traffic for which these improvements are designed. Negotiations are now progressing with several foreign steamship lines for occupation of these docks when completed.

For a large portion of the coal traffic of our roads we have heretofore been dependant upon temporary arrangements with the proprietors of Phillip's Wharf, in Salem, to furnish dockage facilities and terminal handling. The precarious nature of these arrangements seemed so prejudicial to the interest of our company as to induce us to look for a more permanent and sure means of access to the water at that point. We have accordingly leased the wharf, including about nine acres of solid land, for a period of twenty years, with the privilege of buying at a fixed price, and the business there is now under our direct control.

Some complaint has, at times, been made of demurrage charges by vessels arriving at our wharves with coal, in such numbers as to render their prompt discharge impossible. To meet this difficulty, we have been induced to enter into arrangements with the Central Railroad of New Jersey and sundry extensive coal companies of Pennsylvania, whereby large deposits of coal are to be made on our wharves at Salem and Mystic River, and the coal companies are to contract to deliver in purchasers' yards at Lowell or elsewhere, at fixed prices, covering all costs of production and transportation. In this way the purchaser is enabled to relieve himself from all risk of demurrage and all trouble of transportation. The contracting parties have leased of us for ten years, about six acres of wharf at Mystic and Salem, for this purpose, at remunerative prices.

We shall ask you at the annual meeting to ratify and approve the following leases and contracts for new lines now being built to connect with and extend our roads:

THE PETERBOROUGH RAILROAD.

This road is an extension of the Wilton Road, and is now being constructed from Wilton, ten miles, to the town of Greenfield. The Nashua and Lowell Railroad leases this extension for joint account of the Boston and Lowell and Nashua and Lowell Roads, for a period of twenty years, at six per cent upon its cost, over and above certain gratuities to be paid in by towns in New Hampshire benefited by its construction.

THE MIDDLESEX CENTRAL RAILROAD.

This road is an extension of Lexington Branch, and is now being constructed from Lexington, eight miles, to Concord. It is to be leased by this company, for account of the Boston and Lowell and Nashua and Lowell Railroads, for thirty years, at six per cent upon an agreed cost, and to be bought at that cost within the life of the lease.

THE MASSACHUSETTS CENTRAL RAILROAD.

This road, which is being constructed from Boston to Northampton, about 100 miles, has contracted with us to furnish them, for twenty years, with terminal facilities and service in Boston, and the use of a track to be built by us on our lands, between Boston and Somerville or Arlington at a compensation fixed for five years, and thereafter subject to periodical revision as the business increases.

These several contracts will be submitted to you in full at the annual meeting.

The details of the financial condition of the company are exhibited to you in the accompanying balance sheet. They show us to be in easy circumstances; the demand for our bonds and stock being yet in excess of our requirements for expenditures. The notes payable account is largely made up of notes having some years to run, and some of them are without interest, having been given for purchases so conditioned. We are not, therefore, likely to be disturbed by any temporary pressure of the money market, and if our road continues to maintain its steady growth of business as heretofore, we may hope for reasonable and permanent returns upon the investment.

Canadian Pacific Railway.

We give elsewhere an abstract of the text of the contract between the Government and the Pacific Railway for the construction of a road described in the Act of last Parliamentary Session: "From some point on or near Lake Nipissing on the South shore thereof, to some point on the shore of the Pacific Ocean." Subsidies for branches to Lake Superior and from Pembina to Fort Garry are authorized to be included in the contract. It is understood that the road is to be quite equal to the Union Pacific Railway; in case it should not be, the matter to be referred to the arbitration of three Engineers—one appointed by Government, one by the company, and the third by these two. It is to be divided into five sections, as follows:—1st, from the Eastern terminus to Red River; 2d, from some point on the Eastern section to Lake Superior; 3d, from Red River to a point in the longitude of Fort Edmonton; 4th, from the main line in the Province of Manitoba to the boundary of the United States; 5th, from a point in the longitude of Fort Edmonton to the Pacific Coast. The fourth section is to be completed 31st Dec., 1874; the third, Dec. 31st, 1876; the work on the Eastern and Western sections to be prosecuted simultaneously, and to be completed on the 1st of July, 1881, unless the company be allowed an extention of time by Parliament. The following summary is from the Montreal *Gazette*, in which paper the contract is published in full, occupying five and a half solid columns:—

The capital stock of the company is fixed at ten millions of dollars, ten per cent of which is to be paid in to the Government within one month from the date of signing the contract. This stock, as inferred from the terms of the contract, is to be received as the guarantee for the completion of the road. The company is not required to make any further calls, or rather has not the power to make any other calls, except for the completion and equipment of the line. No transfer of stock can take place within six years, except by the consent of the Government, and the ninety per cent remaining unpaid will be held as security, to be called up only by consent of the Government, and instalments not exceeding ten per cent. Persons subscribing the ten millions of dollars do so with the full responsibility of the construction of the railway, and the Government has not only the one million which is actually deposited with them, and upon which they are required to pay the company five per cent interest, but the other ninety per cent as security for the completion of the road.

The land grant is to be along the line of the railway, twenty miles deep on either side, and from six to twelve miles wide, in alternate lots. Care is taken in the contract to preserve the rights of settlers upon any lands which might otherwise be ceded to the company, pre-emption claims and other reservations, such as those of the Hudson's Bay Company, being excepted, and in lieu of the land an equal amount is given to the company from the other wild and ungranted lands of the Crown. It is also provided that lands which are unfit for settlement need not be taken by the company, except to the extent of one mile deep along the line of the railway and that the lands generally are to be selected from between parallels 49 and 50 north latitude east of the Rocky Mountains and to be of the average quality of land best fitted for settlement. It is further agreed that the company are to have the right of way free through the Dominion lands. The grants are to be made each six months, on the basis of the work actually completed. As to the alternate blocks retained by the Government, is is agreed that the Government shall not sell them at a price less than $2 50 per acre, but they may sell them at a higher price, if there should be an agreement between the Government and the company to that effect, provided always that the price to be fixed must have special regard to the settlement of the country. The Government undertake also to extinguish the Indian titles to lands ceded to the company. These are the general features with respect to the land grants. The price fixed is that at which all lands on American Railways, and retained by the Government are sold, and the results of this policy will be to much more than indemnify the Government for the cash subsidy which they have to pay to the railway. This cash subsidy amounts to thirty millions of dollars. It is to be paid monthly as the work progresses, the expense of the surveys made, and yet to be made by the Government, being deducted from the gross amount.

For the administration of these securities of the company a board of trustees is to be appointed, one to be named by the company, one by the Government, and one by the bond-holders, the duties of the trustees being to receive the Government subsidy as designed to receive the profits of all land sales, and to invest the funds thus realized, and to provide for the payment of interest on bonds and redeem them as they fall due. The company may in addition, appoint commissioners for the management of the land grant, who will render annual accounts of their proceedings to the board of trustees. Authority is given to the company to issue scrip, redeemable in land, and also to make promissory notes for sums not less than one hundred dollars, the latter, however, not to be payable to bearer and not to circulate as money.

It will be seen that the road is practically to be built on bonds to be issued on security of the land grant and on the railway itself, that is at least for so much as is required over the thirty millions of money to be given by the Government. The company is authorized to issue bonds to the amount of sixty thousand dollars a mile, should as much be required; but they may agree with the bondholders for the restriction of the issue, and in such case the agreement is to be absolutely binding upon the company. In brief, therefore, the financial scheme is first, to secure the proper management of the lands through duly appointed commissioners; next, to secure the proper administration of the funds arising from their sale or lease by the appointment of trustees, the Government and the bondholders jointly appointing the majority of these; and, finally, to issue bonds upon the securities thus obtained. The company is authorized to appoint an agent in London for the management of its affairs there, an arrangement which follows as a matter of course upon the general terms of the charter.

Connections for the interchange of traffic, and for general running arrangements, are authorized to be made with any railway company either in the Dominion of Canada or the United States of America. The company is required to make full returns to Parliament every year of the traffic upon the railway, of the bonds sold by them, of price obtained, and generally of all the proceedings connected with it. It is authorised to use the telegraph which is required to be constructed for the transmission of ordinary messages, so that it becomes, in reality, a telegraph as well as a railway company. In the construction of the railways the plans of all bridges over navigable streams must be submitted to the Government before the bridge is built. The directors now appointed are merely provisional directors, the regular directors of the company being named by the shareholders as soon as all the stock is subscribed, the qualification being the holding of two hundred and fifty shares. Ottawa is made the chief place for the business of the company, and it is provided that in the event of arrangements not being completed for the commencement and progress of the work before the first of January, 1874, the Government may in the May following cancel the charter and arrange with other parties.

The Virginia Debt Compromise.

The following is the exact text of the bill reported in both houses of Assembly to carry out the agreement entered into with the bondholders in regard to the interest on the State debt for the year 1873:

1. Be it enacted by the General Assembly, That it shall be the duty of the Auditor of the Public Accounts to pay into the public treasury, subject to the warrant of the Second Auditor, so much of the public revenue as the Second Auditor may certify to be necessary to pay the interest on the public debt as herein provided.

2. There shall be paid when demanded after the passage of this act, and on the first day of July, 1873, two per centum interest upon the principal of the public debt, bearing an interest of six per centum per annum, as evidenced by bonds issued under the provisions of the act approved March 30, 1871, and upon that part of the public debt bearing an interest of five per cent. there shall be paid at the same time one and two-thirds per cent, and upon two-thirds of the debt, the securities representing which have not been changed since the 30th of March, 1871, there shall be paid a like interest; provided that the interest herein directed to be paid shall be limited to such interest as has or will fall due during the year 1873.

3. It shall be the duty of the Second Auditor, upon the payment of the interest herein provided for to the creditors of the State, to issue and deliver to such creditors non interest bearing certificates for that portion of the interest due and remaining unpaid, and where interest shall be paid and certificates given for interest due upon coupon bonds, it shall be the duty of the Second Auditor to take in, cancel and file away in his office the interest coupons so paid or redeemed.

4. Every interest certificate issued by authority of this act shall state upon its face the number and kind of bond upon which the interest accrued and the time it was due and payable, for which such certificate is given.

5. This act shall be in force from its passage.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending February 22d at 256,886 tons, and for the coal year 1,912,134 tons, against 1,886,696 tons to corresponding time last year, being an increase of 25,438 tons. The bituminous tonnage for the week is 28,469 tons, and for the year 203,105 tons, giving a total of all kinds for the week of 284,355 tons, and for the year 2,075,239, being an increase as against production to same time last year of 46,795 tons.

Canadian Pacific Railway.

The contract for the construction of the Canadian Pacific Railway was finally signed at Ottawa on the 5th February. The preamble recites the Canadian Pacific Railway Act wherein it is declared that the line "should extend from some point on or near Lake Nippissing and on the south thereof, to some point on the shore of the Pacific Ocean; both the same points to be determined by the Governor in Council." It is also declared that two branches shall be constructed from points on the main line—one to some point on Lake Superior in British Territory, and another to the line between the United States and Manitoba. Reference is also made to the fact that the two companies originally incorporated for the construction of the line failed to form one company, and the Government did not think it advisable to give the contract to either. They, therefore, deemed it advisable to have a company incorporated by charter, as in the said act provided. The contract then goes on to state that the various gentlemen whose names we have already published as directors on behalf of the various Provinces have formed a company and agreed to construct the road, and have subscribed a capital sum of ten million dollars secured to the satisfaction of the Governor in Council, and have so subscribed the same in the proportions following, that is to say: $3,846,000, or nearly five-thirteenths, in the Province of Ontario; $3,076,800, or nearly four thirteenths, in the Province of Quebec; and $769,300, or upwards or one thirteenth in each of the Provinces of Nova Scotia, New Brunswick, Manitoba and British Columbia respectively. The said company is therefore formally incorporated, under the name of "The Canadian Pacific Railway Company," with corporate seal and the usual powers and privileges.

Section 2 of the contract provides that the capital stock of the company shall not be increased above $10,000,000, except by the act of Parliament; that it shall be in shares of $100 each, and that ten per cent. thereof shall be paid into the hands of the Receiver-General, to be held by him under orders of Parliament as security for the fulfilment of the contract.

Secs. 3 and 4 provide for the transfer of the shares and the payment of the calls thereon; each call not to exceed ten per cent., and 90 days' notice to be given.

Secs. 5 and 6 provide that the gauge of the railway shall be four feet eight and a half inches, and that the line and branches shall be as already mentioned.

Sec. 7 provides that the railway shall be divided into sections as follows:—1. *The Eastern Section*—Extending form the Eastern Terminus to Red River. 2. *The Lake Superior Section*—Extending from some point on the Eastern Section to Lake Superior. 3. *The Central Section*—Extending from Red River to a point in the longitude of Fort Edmonton. 4. *The Manitoba Section*—Extending from the main line in the Province of Manitoba to the boundary of the United States. 5. *The Western Section*—Extending from a point in the longitude of Fort Edmonton to the Pacific coast.

Section 8 provides "That the company shall, within two years from the twentieth day of July in the year 1871, commence simultaneously the construction of the railway from the Pacific Ocean towards the Rocky Mountains, and from a point in the Province of Ontario, hereafter to be determined by the Government, towards the Pacific Ocean, to connect the seaboard of British Columbia with the railway system of Canada; and further, shall construct the Manitoba section by the thirty-first day of December, 1874; the Lake Superior section and such portion of the main line as should be required to complete communication between Lake Superior and Red River, by the thirty-first day of December, 1876; shall proceed with and construct the eastern and western sections simultaneously; shall prosecute the work of constructing the railway with all due diligence; and shall complete the whole railway within ten years from the said twentieth day of July, 1871; unless the last mentioned period be extended by Parliament, in which case the company shall complete the whole railway within such extended period."

Sec. 9 declares that the construction and equipment shall be according to specification to be agreed upon between the Government and the company. The choice of three engineers as arbiters on disputed points is provided for, and the Union Pacific Railway of the United States is fixed as an approximate standard whereby such matters may be regulated so far as the nature of country will admit of without undue expenditure.

Sec. 10, 11, 12, 13, provide for the immediate opening for traffic of any part of the line of over twenty miles that may be finished; for the appointment of Government inspectors; for the construction of a line of telegraph, and for periodical reports of progress.

Section 14 grants the company fifty million acres of land in Manitoba, British Columbia and the North-west in blocks not exceeding twenty miles in depth on each side of such main line, and not less than six nor more than twelve miles in width, alternating with blocks of like depth and width on each side thereof, reserved by the government. For the branch lines the company are to receive 25,000 acres per mile for that to Lake Superior, and 20,000 acres per mile for that in Manitoba; the company to have the right of way through Dominion lands. The lands thus appropriated to the company shall be granted from time to time, at intervals of six months, as any portion of the railway is proceeded with, in quantities proportionate to the length, difficulty of construction and expenditure upon such portion. Sec. 15, 16, 17, provide for the sale and subdivision of the blocks of land belonging to the company and government respectively, and for the extinction of the Indian title on the company's grants.

Sec. 18 grants the company a subsidy of $30,000,000, payable in monthly instalments in proportion to the work done. Sec. 19 conditions that the expense of the surveys for the line in 1871-72 and 73 shall be included as part of said subsidy. Sec. 20 provides that the company may accept subsidies from any local Government or municipality.

Section 21 to 25 provides for the appointment of a board of trustees—to consist of three persons—one to be elected by the Government, one by the directors, and the third by the bondholders of the company, their duties being to receive and deal with the moneys and investments of the concern.

Sections 26 and 27 provide for the appointment of agents to manage and dispose of the company's lands.

Sections 28 to 33 provide for the keeping of Stock and Bond Registers; for payment to shareholders of five per cent. on their paid up capital, pending the construction of the line; for issue by the company of promissory notes, bills of exchange, and scrip redeemable in land; for making agreements with incorporated railway companies in the United States; for branches, junctions, or running powers so as to facilitate mutual interchange of traffic; for submission to Parliament of yearly reports of the amount of expense, traffic, &c., on the line or parts of it after being opened, and for the transmission of messages for the public along the company's lines of telegraph, with charges therefor, and power to lease said telegraphs.

Sections 34 to 43 relate to the directors and their powers. As already mentioned Sir Hugh Allan, Adams George Archibald, Joseph Octave Beaubien, Jean Baptiste Beaudry, Egerton Ryerson Burpee, Frederic William Cumberland, Sanford Fleming, Robert Newton Hall, John Sabastain Helmcken, Andrew McDermot, Donald McInnes, Walter Shanly, and John Walker, have been appointed provisional directors of the company. These hold office till the election of their successors. It is provided that the annual meeting shall be held at Ottawa, which is declared the chief place of business of the company, on the first Wednesday of February, when the election of directors and other business shall be proceeded with. Each director shall be a subject of Her Majesty, and a holder of at least 250 shares of the stock. The president of the company, and a majority of the directors shall reside in Canada.

The directors are to be thirteen in number, seven of whom shall form a quorum, the directors shall retire in the following order; four at the end of the first and second years respectively, and five at the end of the third year, and so on in similar proportions, during succeeding years. The directors are empowered to issue bonds to the extent of $40,000 per mile, to form a first charge on the assets of the company. An agency may be established in London, England, for transaction of the company's business. The remaining sections of the contract (which contain 56 in all) contain a variety of miscellaneous provisions usual in Railway Acts, and it is provided that in the event of arrangements not being completed for the commencement and progress of the work before the 1st of January, 1874, the government may in the May following cancel the charter and arrange with other parties.

Boston, Hartford and Erie Railroad.

FORECLOSURE OF THE BERDELL MORTGAGE.

Since the appointment of the present trustees of the Boston, Hartford and Erie Railroad, Messrs. Hart, Clark and Oliphant, by the Supreme Court in 1871, the corporation has been beset with but few legal difficulties, and the general impression has been that on the 16th of March inst. the trustees would quietly proceed to foreclose the Berdell mortgage, and that the bondholders would at once organize a new corporation and place the road on a sound basis. But now the Erie Railway company, which claims that great injustice would be done them by the closing up of the affairs of the Boston, Hartford and Erie Railroad as proposed, has filed a bill in equity in the United States Circuit Court of Massachusetts to restrain the trustees of the Boston, Hartford and Erie Railroad and others from causing to be published any notices for the calling together the holders of Berdell bonds at any time before the 16th of March, 1873, for the purpose of forming a new corporation under the terms of the Berdell mortgage, or the organization of any such company, and that until the further order of the court the status of the title and rights of any and all parties to the franchises and property held by said trustees under the Berdell mortgage, and the property itself, shall be held as the same now are; also, to restrain George M. Barnard, Charles S. Bradley and Charles R. Chapman, assignees appointed in bankruptcy, from selling, assigning or otherwise disposing of the franchises or property of the Hartford and Erie Road.

The bill, after reviewing the history of the Norfolk County Railroad Company, the Boston and New York Central Railroad Company, the Southern Midland Railroad Company, the New York and Boston Railroad Company, and the Hartford, Providence and Fishkill Railroad Company, of all which corporations the Boston, Hartford and Erie Railroad Company became possessed subject to certain mortgages now existing, sets forth that on the 8th of December, 1865, the Boston, Hartford and Erie Company applied to the Erie Railway Company and asked because of the benefits to be by it derived from the completion of the Boston, Hartford and Erie Railroad, that the Erie Company would aid such completion both by counsel and with money and pecuniary credit; that said application was granted, and Messrs. Daniel Drew, H. L. Pearson, A. S. Murrey, Robert H. Berdell, Dudley S. Gregory, A. S. Diven and Wm. Evans, all directors in the Erie road, were named as candidates for election as directors in the Hartford and Erie road, and were duly elected and acted as such. That before and after Dec. 8, 1865, various discussions were had between

the directors, officers and counselors of the orator company and those of the Boston, Hartford and Erie Company, and by them various plans devised for the taking up and retiring the then existing mortgage debt and other claims resting on the property of the last named company, and for the construction and equipment of its railways; and also as to the mode and form in which the Erie Company could lawfully and with reasonable financial safety aid in such completion and equipment, and that such conferences resulted in the making of a mortgage or deed of indenture, dated, executed and acknowledged March 19, 1866, to Robert H. Berdell, Dudley S. Gregory and J. C. Bancoft Davis, as trustees to secure certain bonds to be issued under and secured by the same, and in and by such deed conveying to said trustees all the franchises and property of said grantor, then by it held, or any to be thereafter acquired. It was estimated that to complete and equip the Boston, Hartford and Erie road from Boston to the Hudson river would require between $8,000,000 and $9,000,000, and the Erie Company aver that $8,000 000 was a sum amply sufficient to construct and reasonably equip the road between Boston and Fishkill, and it was agreed by Drew and others, the committee, that if the Boston, Hartford and Erie Company would secure at least $3,000,000 of cash from other parties, the committee would recommend to the Erie Railway Company to guarantee the payment of the interest of $4,000,000 to $6,000,000 of the Berdell bonds.

Acting upon this declaration it was agreed between the orator company and the Boston, Hartford and Erie Company that the latter should apply to the Legislature of Massachusetts for aid, and an act was passed loaning the credit of the State to that company to the amount of more than $2,000,000. On the 27th of February, 1867, Mr. Berdell ceased to be a trustee under the mortgage long before any bonds were issued under the same, and that John S. Eldridge, a respondent to this bill, was on October 24, 1867, appointed a trustee in place of Mr. Berdell, and accepted said trust. That Davis and Gregory resigned and ceased to be trustees on December 1, 1868, and that on August 16, 1869, Mark Healy and Henry N. Farwell were appointed in their stead. Among the provisions in the Berdell mortgage were the following: (1.) Any outstanding bondholders might convert their bonds into new bonds. (2.) The trustees shall reserve sufficient bonds for the entire exchange of the old bonds. (3.) No contract for the completion of the road should be valid unless approved by the trustees. (4.) The trustees should by one of their numbers supervise the expenditure (in the construction and equipment of the road) of the proceeds of any bonds that might be sold.

On the 8th of October, 1867, the Erie Company executed the contract to the Hartford and Erie Railroad Company to guarantee the payment of Berdell bonds, with a provision that it should form a lien upon all money derived from Berdell bonds. On the 9th of July, 1868, the indorsement of the Erie Company was placed on five thousand of the Berdell bonds which were delivered to the trustees under that mortgage. The Erie Company also purchased 537 bonds then out as a collateral loan by Mr. Eldridge, and which became the property of the company. The amount paid by the Erie road to the Boston, Hartford and Erie Company on the 9th of July, 1868, was $2,000,000 in cash, and accepted drafts of the last named company as by the terms of the contract agreed to the amount of $1,574,000; and that afterward, and before January, 1869, said acceptances were sold by and realized upon by the Hartford and Erie Company, netting the face of such acceptances, less $150,000, and that these drafts were paid by the Erie Company in full. At the time of the sale and delivery of the indorsed bonds to the Erie road it was a part of the agreement, in consideration of the contract of purchase, that said indorsements or guaranty should stand and remain, while said bonds should remain the property of the orator company, and be treated in all respects as if sold by the Boston, Hartford and Erie Railroad Company to parties other than the orator company.

It is then alleged that the conditions of the Berdell mortgage were violated, and that, with the exception of the bonds sold to the Erie Company, no trustee under that mortgage ever supervised the sale of bonds, and no trustee ever gave written assent to the use of any means derived from said bonds, or as trustee supervised the expenditure of such money, and that all the trustees from the first to the last issue of said bonds and the use of money derived therefrom, did suffer the Boston, Hartford and Erie Railroad Company to do as it pleased with said bonds and money.

After the Berdell bonds to the amount of $3,600,000 were placed as collateral for that amount of scrip loaned by the State to the Boston, Hartford and Erie Company, it is claimed that there remained of the Berdell bonds over $3,000,000 in principal, which were sold for a sum exceeding $1,500,000; and that there was between July 8, 1868 and January 1, 1870, received more than $8,000,000 by the sale of Berdell bonds which properly expended under the then existing contracts and properly otherwise used, would have completed and reasonably equipped said railroad from Boston to Fishkill before October 1, 1870.

The bill further alleges that some time between July 9, 1868, and January, 1870, some or all of the trustees in office surrendered and gave up to the Boston, Hartford and Erie Company all of the twenty thousand bonds, reserving and keeping none to pay underlying bonds, which then amounted to more than $2,500,000; that instead of devoting the proceeds of the sale of Berdell bonds to the construction of the road, as they were bound to do, the trustees expended more than $5,000,000 for other purposes, and that in consequence of the wrongful diversion of money derived from the sale of Berdell bonds the Erie Railway Company has been deprived of a net profit of $500,000 per year which it would have derived had the Hartford and Erie road been completed as it might have been.

The Erie Company further claim that the Hartford and Erie Company have not paid any of the coupons on the bonds guaranteed by the first-named company, and that unless relief is granted, it will be held and obliged to pay all coupons matured since July, 1869, and to mature to and including January, 1900. Demands have been made since July, 1869, for the payment of more than $1,200,000, and the company has taken up and now holds of the same to the amount of $734,005 54. All said bonds are believed to be a good and valid lien upon the property and franchise conveyed under the Berdell mortgage, and cannot in equity be ignored or divested from the orator company, or in any manner canceled or discharged, as it is proposed to do by the present trustees of the Berdell mortgage. When the hearing on the bill shall take place, the complainants aver that they will show that 2,500 Berdell bonds were wrongfully and unlawfully issued, none of which can be held included in and among bonds secured by and under the Berdell mortgage.

The Erie Company further alleges that it is the owner of more than one thousand of said Berdell bonds, other than the twenty-five hundred, and so has a very large interest in the property of said Boston, Hartford and Erie Railroad Company, as well as under the contract of October 8, 1867, and of indorsements as aforesaid, and that if any organization of a new company under and in consequence of further acts to be done by said trustees as they purpose and declare, and as above alleged, it had, the results of such a course would be disastrous to every interest involved under the status of the property of said railroad company, and of the questions involved and declared in this bill, and so your orator declares that any such organization as is proposed as aforesaid would be contrary to law, and would destroy the rights of your orator in law and equity, as above disclosed, and thus such rights would be lost beyond remedy and recovery.

And your orator further shows that it has no remedy at law, and can have adequate relief in the premises only in a Court of Equity, where matters of the kind disclosed by this bill are cognizable and relievable.

The counsel for the complainants are Hon. B. R. Curtis, Barlow, Larocque and MacFarland of New York, Gen. Butler and Thomas E. Graves.

The Indiana and Illinois Central Railway Co.

Offers for sale its FIRST MORTGAGE 7 PER CENT. GOLD BONDS, 30 years to run, with ample Sinking Fund.

The Road runs due EAST and WEST from INDIANAPOLIS to DECATUR, 152 miles, through the richest settled country of the West. It crosses the BLOCK COAL FIELD of Indiana at its best point, and it cannot fail to have a LARGE LOCAL AND THROUGH BUSINESS, as it makes a great saving of distance and has low grades.

It is building for cash, by responsible stockholders, and is BONDED FOR MUCH LESS THAN ITS COST. Eighty five miles will be done and in profitable operation this Spring, the residue within the year. There is no better bond on the market. For pamphlets and information apply to

Walker, Andrews & Co.

No. 14 WALL-ST.

New Bedford Railroad.

The stockholders of the New Bedford and Taunton Railroad have unanimously ratified the action of the directors in transferring their franchises and property to the New Bedford Railroad. The *Mercury* comments upon this event as follows:

"This action virtually completes the sale of the New Bedford and Taunton road, and is an important step toward the formation of a railroad line, under the control of one corporation, from this city to Fitchburg. For the road between this point and Taunton will be leased to the Boston, Clinton and Fitchburg, which has already under lease the road from Mansfield to Framingham, leaving only eleven miles of road between Taunton and Mansfield to be secured. The Taunton Branch Company, we understand, decline to sell or lease their road. But a bill is now before the Legislature, which will undoubtedly pass, authorizing the Mansfield and Framingham Railroad Company to extend their road to Taunton.

The new corporation has the best wishes of our citizens for its success, and will have all the cooperation needful to secure it."

☞ The Wisconsin and Lake Superior Railroad Company has been organized by the election of a board of directors, and the following officers, viz: President, G. W. Washburn; Vice President, J. C. Hoxie, New London; Secretary, T. S. Allen, Oshkosh; Treasurer, G. W. Roe; Executive Committee, Gabe Bouck, Nelson Fletcher, G. W. Wakefield. Books of subscription will be opened immediately. Reports from Winneconne, New London and Shawano say the people are alive to the importance of the road, and surveys will be made at once from Oshkosh to New London.

☞ The coal tonnage of the Columbus and Hocking Valley Railroad Company for the two weeks ending February 15th, was 39,432 tons, or 1,064,664 bushels; total earnings of the road for the same time, $50,066 86.

American Railroad Journal.

Saturday, March 1, 1873.

Stock Exchange and Money Market.

The pressure in the Money line has been maintained, nearly all through the week. The speculative demand for aid has been decidedly active, while the banks as well as private lenders have been less liberal of help, the banks especially having been compelled, by the falling off in their reserves, to contract their line of loan and discounts. Rates on call have ruled high, running generally from the legal figure of 7 per cent in gold, to as high as ⅛th of one per cent of an added commission for the use of Money from day to day. The holiday on Saturday operated in favor of borrowers temporarily, but thus far in the currency week, the stringency has been very severely felt in nearly all branches of business. There has been quite an extensive transfer hither of funds from the cheap market of London, by cable; and foreign exchange has been borrowed freely and marketed here, by parties in need of accommodation. The discount movement has been less satisfactory, with the best grades of mercantile paper quoted at from 9@12 per cent. per annum. The city banks, last week, lost 1⅜ millions of their legal tender, and nearly 1⅛ millions of their specie reserves. Their deposits were cut down about 8⅞ millions, and their loan and discount averages reduced about 4⅝ millions. The banks continue below their reserve, the last statement showing that they lacked $1,859,850 of the 25 per cent reserve which the national banks are required by law to keep on hand. The deficiency in the reserve is traced mainly to the state banks in the Clearing House Association. Last week the per centage in the national banks of lawful money to liabilities was 24½, while the state banks held in lawful money only 20 per cent of their liabilities. The U. S. Sub-Treasury, last week, made slight additions to its cash (coin and currency) balances. Its currency reserves at the close of the week were $24,341,199; and its coin hoard, $36,229,707.

The city banks, in their latest return, show a falling off of $1,317,100 of legal tender notes, $1,414,100 of specie, and of $8,714,700 in their deposits, with a contraction of $4,650,600 in their loan and discount averages, and an addition of $33,800 to their item of circulation. The city bank exchanges, last week, averaged 125¼ millions. The banks now hold $1,859,850 of specie and legal tender notes less than the 25 per cent. of their liabilities required by the National Banking Act.

The clearances of the banks averaged through the week 125¼ millions a day, and amounted in the aggregate, for the whole week, to $626,395,902 as against $835,845,447 the preceding week. The U. S. Sub-Treasury at this point added its currency balance about ⅛th of a million, and its coin reserve about $\frac{2}{16}$ths of a million as the result of the week's business.

The specie reserve of the city banks according to the latest return is $15,046,900, against $17,890,600 same time last year. The city bank deposits are now $205,898,700 against $213,318,200, week ending Feb. 24, 1873. The legal tender reserve amounts to $41,461,200, against $45,042,900 same time last year. The circulation now stands at $27,573,100 against $28,143,700 same time last year. The loans are now $286,870,100 against $282,486,590 at this date last year.

The coin reserve of the city banks is now a trifle over 15 millions as against about 25¾ million on the 20th of last July; the legal tender reserve is under 41½ millions against about 55½ millions on the statement of June 15th; and the deposits are now about 205⅞ millions, against 247¼ millions on the 20th of July.

Government revenues yielded fairly in the line of customs, though quite moderately in that of excises. The excises yielded within the week about 1¾ millions, and thus far in the current fiscal year beginning with July 1, 1872, $76,425,221 millions. The customs at the port of New York, for the week, were $2,790,142, and at the outports, about $900,000 more, in coin or coin certificates.

The U. S. Sub-Treasury office last week received $3,911,803 of currency, and $3,473,802 of gold, the latter including $2,847,000 from customs; and disbursed $2,793,629 of currency and $3,298,552 of gold, the latter embracing $441,879 of coin interest.

The U. S. Treasury balances on Monday were: of coin, $66,132,072; currency, $2,826,816; legal tenders, special deposit for redemption of banking certificates, $29,950,000. Coin certificates are outstanding for $22,602,000.

Gold has been more uniform as to price, than usual of late, the fluctuations of the week having been within narrow limits. The speculative dealings have shown activity and confidence. The Customs drain has been fair and the export movement limited. The latest dealings indicated a stronger and buoyant market. The range of the price during the week has been from 114¼@115⅛ and the closing quotation on Wednesday was 115⅛ against 114⅝ on Wednesday of the preceding week. The specie outflow last week, was $733,182. The Gold Exchange Bank clearances have averaged about 63 millions per day during the week.

The customs demand for Gold last week, averaged $569 400 a day. The arrivals of specie from Europe, Havana and other foreign ports last week were $46,551 and thus far in 1873 have been $184,787 against $253,861 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $89,045,817 against $104,224,409 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $57,646,660, against $58,974,706 during the same time in 1871-2.

The export drain of specie was $733,183 last week, against $356,956 same week preceding year. The shipments since July 1, 1872, have been $45,382,202 against $24,487,948 during the same portion of 1871.

Foreign Exchange has been in liberal supply under free offerings of borrowered bills, designed to aid in raising means in the local market, to enable operators for higher values at the Stock Exchange to carry their investments through the prevalent stringency in Money. The price of sterling bills has been depressed, though the demand has been fair. Bankers' sixty day bills on London closed at 108¾@109; sight bills on London, at 109¼@109⅞. The week's exports of Domestic Produce have been to the currency value of $5,024,810.

Government securities have been in moderate demand and comparatively steady in price, notwithstanding the severe pressure in the Money line. Owing, however, to the dearness of Money and the stiff rate for Gold, the 5-20s, 6 per cents, including accumulated Interest since the last Dividends in November and January, have fallen below the par of Gold, and a large amount was so offered to the Sinking Fund last Wednesday.

Government bought in on Wednesday a million Five Twenties, from 113 55@113 87 net out of an aggregate offering of $2,482,250 at from 113 55@114 50.

U. S. sixes of 1881 closed on Wednesday of this week at 118⅝@118¾ U. S. Five-Twenties of 1862, 115⅝@115¾; U. S. Five-Twenties of 1864 at 115¾@115⅞; U. S. Five-Twenties of 1865, 116@116¼; U. S. Five-Twenties of 1865 consolidated 114⅝@114⅞; U. S. Five-Twenties of 1867, 116⅝@116⅞; U. S. Five-Twenties of 1868, 116¼@116½; U. S. Ten-forties at 114½@114⅝; U. S. Fives of 1881 (Funding Loan) 113¾@114; Six per cent. currency Sixes from 114¾@115.

A probable reduction is looked for of the call of the Treasury on the First of March for the

5-20s of 1862 for redemption at par in Gold on the First of June. The main object of the negotiation with the Anglo-American Syndicate is not to acquire Gold for the New 5 per cents but to redeem and cancel, by exchange, the 6 per cents, 5-20, without reference to date or class. The subscriptions to and by the Syndicate were made with reference to this purpose, and the option accordingly taken of paying in any class of the 5-20s, 6 per cent. bonds. When the call for $100,000,000 of 1862s was agitated early in February, none of the 5-20s could be had in the open market, in any considerable amount, for the ordinary Sinking Fund purchase of $1,000,000 a week, or otherwise, but the changed circumstances since, as now referred to, will probably reduce the proposed call on the 1st of March to $50,000,000.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 12.	Feb. 19.	Feb. 26
Consols	92¾	92⅝	92⅝
U. S. 5-20s, 1865....	92⅝	92¾	93⅛
" 1867	93½	93¼	93⅛
" 10-40s	91½	89½	89½
New Fives of 1881...	90½	90⅛	90⅛
Erie	52¼	51½	51½

State bonds have been in fair request on investment account at comparatively steady rates.

Railway Mortgages have been in good demand and have been quoted stronger in price, in the instances of the favorites of the older loans. Central Pacific Sixes have been selling readily at from 104@104¼, with few bonds available, in the open market. Chesapeake and Ohio Sixes have been more sought after, and quoted up to 87½ and interest. Western Pacific Sixes have been in fair demand closing firmly at 94¾@95. The Northern Pacific 7-30 Loan has been in good request at par and interest.

Railway and Miscellaneous share property has been quite variable as to price, influenced mainly by the Money stringency, which has been against the speculation for a rise. The dealings have been on an extensive scale; the features of the week having been Lake Shore, Pacific Mail, and Western Union Telegraph shares. The later dealings indicated much depression, in good part, from the stringent Money market.

The Metal trade has been comparatively tame. Copper has been quiet, but quoted firm; sales 100,000 lbs., early deliveries, at 34¾c. Iron generally dull, but held with confidence: offerings moderate, as a rule, and of Scotch Pig extremely light; sales 100 tons Coltness Pig, to arrive, at $58, (gold;) 75 tons Eglinton do., from dock, on private terms, quoted at $56; with Gartsherrie do. at $60; Glengarnock do. at $57@$58; No. 1 American do. $50; No. 2 do. at $48@$49; English Rails, $70, gold; American do., $80@$82 50, currenco; Wrought Scrap, $57 50@$60. Lead dull, but steady, at 6¼c.@6½c., gold, for ordinary foreign. Of Spelter, 100 tons sold at 7¼c.@7½c., gold Pig-tin quiet, with sales reported of 500 slabs Straits, at 31¼c.@32½c., closing at 32c., gold. Tin Plates strong in price and in fair request; sales 1,500 boxes Charcoal at $11 50@$11 75, gold; 3,000 boxes Charcoal Terne at $9 75@$10 50, gold; 500 boxes Coke, 14x20, at $10 87½, gold.

General business has been less satisfactory in the line of domestic produce. Prices of Breadstuffs, Cotton, Wool, Seed, Hops and Whisky have favored buyers. Provisions, Petroleum, Leather, Fish, Tallow, Tobacco, and Naval Stores firm, as a rule. Middling upland cotton, left off tamely on Wednesday at 20¾@21⅝ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,667,518 bales, against 2,204,478 bales same time in the preceding year; exports 1,552,868 bales against 1,227,980 bales in the previous year; stock at the ports at latest dates, 535,337 bales against 578,343 bales same date 1871.

Foreign goods have been moderataly sought after, and generally steady in price. Coffee advanced ⅛ct. Sugars yielded ⅛@¼ ct. per lb. The week's imports amounted to $9,983,515, including $5,281,755 of dry goods.

Ocean freights have been quite active, at however, variable rates. Vessels for the Petroleum trade have been in more request.

At the Live Stock Markets, Beeves have been in moderate request at from 8@14¼ cts.; Veals at 7½@12 cts.; Sheep at from 5@8¼ cts.; Swine at 5⅜@5¾ cts. per lb., all live weight. The week's receipts were 7,730 Beeves, 621 Veal Calves, 20,339 Sheep and Lambs, and 30,945 Swine.

At the auction sale of Scranton Coal on Wednesday, 90,000 tons were disposed of at from 3.85 @5.25, as against 3.87½@5.10 in Jannary.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Delaware, Lackawanna and Western 7s, conv., 100; Boston, Hartford and Erie 1st mort., 87½; do. guar., 59¾; Milwaukee and St. Paul 7s, Iowa div., 87; do. Canadian Pacific Railway.

The directors chosen to represent the interests of the several Provinces of the Dominion are as follows: For Ontario.—Major John Walker, London; Walter Shanly, Prescott; Col. Cumberland, Toronto; Donald McInnes, Hamilton; Sandford Fleming, Ottawa. For Quebec.—Sir Hugh Allan, Montreal; J. J. Beandry, Montreal; Hon. Dr. Beaubien, Crown Lands Commissioner, Quebec; Robt. J. Hall, Sherbrooke. For Nova Scotia.—Hon. Adams G. Archibald, Halifax. For New Brunswick.—Egerton R. Burpee, St. John. For Manitoba.—Andrew McDermott, Winnipeg. For British Columbia.—Hon. Dr. Helmcken, Victoria. The officers of the Board are: Sir Hugh Allan, president; Major Walker, vice-president; Hon. J. J. C. Abbott, counsel. It is announced that Sir Hugh Allan, Mayor Walker, the Hon. A. G. Archibald and the Hon. J. J. C. Abbott will proceed to England on the 1st of March to make the financial arrangements in connection with this work.

☞ The following gentlemen have been elected directors of the Cleveland, Mt. Vernon and Columbus Railroad Company: R. C. Hurd, Samuel Israel and Charles Cooper, Mt. Vernon; Thomas D. Messler, Pittsburg; Isaac Haxester, Millersburg, and William M. Orr, of Orrville. Hon. R. C. Hurd was re-elected President.

☞ The estimated earnings of the Kansas Pacific Railway for the second week of February are: freight, $25,701 26; passengers, $20,006 11—total, $45,707 47.

Atlantic and Gt. Western Railroad.

At a meeting of the stockholders of the Atlantic and Great Western Railroad Company in this city on the 20th ult., the leases of the Pithole Valley Railroad, of the Pennsylvania Petroleum Railroad, and the Chenango and Allegheny Railroad to the Atlantic and Great Western were ratified. In order to obtain funds to lease the lines, the Atlantic and Great Western Railroad Company, through their financial agents in London, have effected a loan of £900,000, or $4,500,000, on seven per cent rental trust bonds, being part of £1,272,000, or $6,360,000, specially secured by the rental of the roads named. Notice has been given that a further issue of $1,860,000 will soon be made for acquiring the remaining interest in the Chenango and Allegheny Railroad, and for the extension of the Pennsylvania Petroleum Railroad to Lake Erie.

Vincennes, Petersburg and Owensboro R. R.

An important railroad enterprise has been inaugurated at Vincennes, Ind., resulting in the organization of the Vincennes, Petersburg and Owensboro Railroad Company, for the construction of a road connecting with the Chicago, Danville and Vincennes Railroad, from Vincennes to Owensboro, and then connecting with the Air Line Road now building from Owensboro to Nashville, and filling up the link in the air line road, which will extend from Chicago to Nashville, establishing direct communication between Chicago and the middle and Southern States. It will penetrate the coal fields of Pike county, the richest and most extensive in the State, and furnish coal in endless quantities at very low prices. The officers of the company are L. L. Watson, President; C. M. Allen, Vice-President; L. Nible, Secretary, and H. A. Foulkes, Treasurer.

☞ The capital stock of the Pennsylvania Railroad Company at the time of the supplement doubling the same was passed was $75,000,000, consequently by the act just signed by the Governor the company is authorized to increase it to $150,000,000. The company has authority to create a debt in amount equal to its capital. Thus the capital and debt of the Pennsylvania Railroad Company may, without further legislation, be increased to three hundred millions. This is a large margin, and the *Ledger* thinks its limit will probably not be reached by that company for many years yet.

☞ The Philadelphia Scale Works are doing a very large and successful business in the manufacture of scale and testing machines. They have recently built one of the latter with a capacity of 75 tons, for E. B. Ward, of Detroit, Mich., which is spoken of in high terms by those who have seen it in operation. Their scales have some very valuable improvements.

☞ The engineer corps of the new Chicago and Northern Pacific Air Line Railway will start northward from Jefferson on the 1st of March, on the survey of the line to Portage. The branch from the town of York through Columbus and Beaver Dam to Burnett Junction will also be built.

☞ The last rail of the Canada Southern Railway was laid on the 20th ult. The road is laid throughout with steel rails, and is nearly a straight line between the Niagara and Detroit rivers.

BANKING-OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, Feb. 27, 1873.

☞ The **Chesapeake and Ohio, the Central Pacific and Western Pacific Bonds,** all of which have been negotiated by us, we believe to be among the best and most desirable investment securities in the market, which in time must become very scarce; especially as the Government will probably pay off, in gold, during the year, $300,000,000 FIVE-TWENTIES, and a large amount of money thus released from investment must be absorbed into this class of securities.

The **Chesapeake and Ohio Six Per Cent. Gold Bonds,** the total amount of which is only $15,000,000, are secured upon a property worth $35,000,000 to $40,000,000, and are fully equal in intrinsic value to the CENTRAL PACIFIC BONDS. They are issued in denominations of $100, $500, and $1,000, coupon or registered, and at their present market price, (**87½** and accrued interest,) are very desirable.

The **Central Pacific Six Per Cent. Gold Bonds** are too well known to require description or commendation. Their total amount is $25,885,000; they have for a long time ranged in market price near or above par. Their price to-day is 104@104¼.

The **Western Pacific Six Per Cent. Gold Bonds** amount to $2,735,000. This road is now consolidated with the CENTRAL PACIFIC, and the payment of its bonds, principal and interest, is assumed by the latter. As they have recently been introduced on the Stock Exchange, we expect to see them rapidly rise to the price of CENTRAL PACIFICS, being substantially the same in character and value. Coupon Bonds, $1,000 each. Their market price to-day is 94¼@95.

We buy and sell, as usual, Government Bonds, receive deposits, on which we allow interest, make collections, and conduct a general banking business in all its branches.

FISK & HATCH.

☞ In consequence of a blockade of the line leading south from Louisville, their being 700 loaded cars lodged at that point, and 400 cars at Chattanooga, the Cincinnati Chamber of Commerce have published a recommendation to shippers to use the river routes to southwestern cities and the Chesapeake and Ohio Railroad for the southern cities. Large quantities of breadstuffs and provisions are now passing from Huntington to Richmond, destined for Charleston and Savannah, and the indications are decided that as soon as the company shall have completed its arrangements for transhipment at its eastern seaboard terminus, the Chesapeake and Ohio will be a favorite route for freights destined to Eastern and Western ports.

☞ The Kingston and Rondout Railroad is three and one-half miles in length, has nine passenger cars, two sleighs and thirty-three horses. Capital stock $125,000, $75,000 of which has been paid in. From the 190,295 passengers carried during the fiscal year an income of $19,099 was derived. The total receipts were $22,883 and the expenses $18,249. A dividend of two per cent, amounting to $2,500, was paid on the capital stock during the year.

Journal of Railroad Law.

RAILROAD COMPANIES—INJURY TO ANIMALS—RULE OF DAMAGES.

The facts in the recent case of The Indianapolis, Pittsburg and Cleveland Railroad Company *vs.* Mustard, (34 Ind., 50,) are fully and clearly stated in the following opinion by

WORDEN, J.—This was an action by the appellee against the appellant for injuring and killing a cow belonging to the plaintiff, by the engine and cars of the appellant upon her railroad, where the same was not properly fenced. Trial by the court, finding and judgment for the plaintiff, a motion for a new trial being overruled.

It appears by the evidence that the plaintiff's cow, being upon the railroad track, was struck by the pilot of an engine, and carried or dragged some distance along the track, and then thrown off; that one of her legs was entirely off, except a small portion of the skin, and another leg broken; and that she was so badly injured that she could not recover. She lay in this condition a day or two, when the plaintiff killed her, but did nothing further with her; and she was afterwards buried by the employees of the defendant.

During the progress of the trial, the defendant for the purpose of "fixing the damages," offered to prove the value of the cow after she was thus hurt, but the testimony being objected to, it was excluded. Under the circumstances we cannot say that this was error. The plaintiff, out of motives of humanity, doubtless, and to end her misery, killed the cow, but derived no benefit whatever from her defunct carcass; and then she was taken charge of by an employee of the defendant who performed her final obsequies by consigning her to the earth, where she could be a source of profit to no one.

Had the plaintiff actually received some benefit from the cow after she was hurt or killed, the question would have been a different one. We take it to be quite clear on principle, that if a railroad company, or any private individual, kill the animal of another, under circumstances that render the company or the individual liable therefor, the rule of damages will be the value of the animal, unless the case calls for vindictive or punnitory damages; and these damages are not to be diminished by the value of the dead animal, unless the owner thereof in some way derives an actual benefit therefrom, or does some act evincing an election to appropriate the dead animal to himself. A man whose animal is wrongfully killed is not obliged to take the dead animal in part pay for the living one.

We regard the case before us as substantially one of killing. The cow must have died from her injuries, and the defendant is responsible for her full value.

We have examined the evidence in the cause, and are satisfied that the finding of the court, in respect to the damages assessed, and also in respect to the liability of the defendant, accords with the preponderance thereof.

The judgment of the court below is affirmed with costs and five per cent damages.

☞ A company has been formed to build a railroad from a point on the Ohio river opposite Owensboro, Ky., to connect with the Cincinnati and Terre Haute Railroad about twenty-five miles from Terre Haute.

Progress of the Iron Trade.

The Iron Trade has commenced taking rapid strides throughout the West and South, where they find abundance of coal and ore in proximity. In Missouri a few years ago they had but one furnace, now they have seven using coal as a fuel at St. Louis, and seven using charcoal in operation, as follows:

	No. in operation.	Yield 1871. Tons.	Yield 1872. Tons.
Vulcan Iron Works	2	28,000	30,000
South St. Louis Iron Co.	2	18,000	28,000
Missouri Furnace Co.	2	30,000	30,000
Carondelet Iron Works	1	6,000	7,000
		82,000	95,000

Increase for year 1872 13,000

The number and capacity of the charcoal blast furnaces throughout the State are as follows:

	No. in operation.	Annual yield, tons.
E. Harrison & Co. Irondale	1	7,000
Iron Mountain Co	2	14,000
Pilot Knob Iron Co	1	7,000
Scotia Iron Works	1	8,700
Maremec Iron Works	1	4,200
Mozelle Iron Works	1	6,300
Total		47,200

Then it will be seen that there will be 142,200 tons pig metal made in Missouri this year, and from the present indications that amount will be one-fourth of the production for the year.

Five other furnaces are in process of construction.

In the neighborhood of Chattanooga, Tennessee, several new furnaces are building, and others are proposed. The following will show the iron production of 1871, and the estimated production of 1872 and 1873 in Southern Tennessee, and those portions of Georgia and Alabama, immediately adjoining:

	Production. 1871.	Estimated. 1872.	Estimated. 1873.
Roane Iron Co., Rockwood, Tenn	2,883	7,800	20,900
Oakdale		.....	2,000
Shelby Iron Works, Ala.	6,000	6,000	15,000
Etna, Ala.	500	2,500	5,000
Red Mountain, Ala.		.....	9,000
Barto Furnace, Ga.		1,800	3,000
N. Y. and E. Tenn	1,000	1,500	2,000
Green Co. Iron Co., Tenn.	2,000	2,500	3,000
Oxford, Ga.		.....	3,000
Buschongs, Tenn		500	1,000
Clark, Quaif & Co., Tenn.		1,000	1,000
Stonewall Iron Works, Ala.		.....	3,000
Cornwall, Ga	2,000	2,500	3,000

In addition to the above the following notes will be found of interest: The Roane Iron Co. are building a new 40-ton furnace, to be put in blast about the 1st of March, and the old furnace is to be raised; the Shelby Iron Co. are building a new furnace of 9,000 tons capacity; at Red Mountain two new furnaces are building; the Barto furnace is being rebuilt, the furnace at Oxford, Ga., is rapidly approaching completion; the new stack of the Stonewall Iron Works will be ready for service early next year.

In Indiana the Vigo Iron Company are building a new furnace, to be run in connection with the one now in blast, at Terre Haute, which is expected to be at work about the last of February.

In Connecticut we hear of but one new furnace, that of Messrs. Barnum, Richardson & Co., at Lime Rock, capacity, 65 to 70 tons per week.

Coal Trade of the United States.

The whole supply of Anthracite and Bituminous Coal, produced in the United States in 1872, may be summed up as follows:

	Tons.
Anthracite sent to market, official	18,929,813
Consumed in the Coal Regions, est	3,110,000
Total Anthracite produced	22,039,313
Bituminous Coal moved towards seaboard—official	*4,451,822
Quantity Bituminous produced in other sections of the country, estimated	15,000,000
Total product in United States in 1872	41,491,135

	Tons.
We imported in 1872	400,631
And exported in 1872	400,878
Excess of importation	89,753

* One report not official, but will vary but little.

We stated before that the increase in 1872 was greater than any preceding year in the trade except in 1866, when the increase of all kinds was 4,325,326 tons, which exceeds the increase of 1872 by 547,577 tons—but it must be borne in mind that there was a decrease the previous year of 366,419 tons, in 1865, and it was followed by a decrease in 1867 of 594,071 tons.

Notwithstanding the increase in 1872, we are satisfied that the market will take 2,000,000 tons increase of anthracite, independent of bituminous, which is about all the increase the Anthracite Regions can produce in 1873; and the following year it will be very difficult to produce the increase of anthracite that will be required by the market in 1874. We now consider all the difficulties, which were caused principally by overproduction, removed so far as the anthracite trade is concerned; and after this year the producers of anthracite will not need to run after purchasers to sell their coal, but the purchasers will come to the producers and take all they can get.

We have stated before that we doubt very much whether the Anthracite Regions will produce on an average over 25,000,000 tons a year to send to market outside of the counties producing the coal. To do so will require a production of at least 30,000,000 tons a year. This will require an increase of 8,000,000 tons more annually, which is more than was sent to market from Schuylkill and Columbia counties, and from the Lehigh Region, in 1872. There is but little new territory to cover, and to produce an additional quantity of 8,000,000 tons annually will require very heavy expenditure in sinking deep slopes, shafts, &c., and while these slopes and shafts are preparing, many of the collieries in the more shallow basins will gradually become exhausted.—*Pottsville Miners' Journal.*

☞ The following is a copy of the Act passed by the New Jersey Legislature to validate the agreement of consolidation between the Central Railroad Company of New Jersey and the Delaware, Lackawanna and Western Railroad:

Be it enacted, etc., That the agreement made and executed by and between the Central Railroad Company of New Jersey and the Delaware, Lackawanna and Western Railroad Company, dated the 16th of March, 1872, and which on the 11th of October, 1872, was recorded in the office of the Secretary of State, be and the same is hereby confirmed and declared to be a valid agreement, any law to the contrary notwithstanding, and the said parties to said agreement may exercise all the powers necessary to give effect to the purposes, objects, and intention thereof.

☞ A Siberian Railway is talked of. Its proposed course is from Rybinsk to Viatka, via Yaroslavi and Kostroma—its further course being from Viatka to Perm (on the Kama,) and thence across the Ural to Exaterinburg.

American Locomotives in Russia.

The *Russian News* reports the experiments made between St. Petersburg and Lanbane, November 25, with a Baldwin locomotive made to burn anthracite coal. With a train of ten cars it passed over the heaviest grades at the rate of 60 versts (10 miles) an hour, and burned in running 130 versts (86 miles) 62 poods (2,232 pounds) of anthracite. These engines, it is believed, will be of great service in the south of Russia, where there are unworked mines of anthracite and very little wood, but where heretofore wood has been burned. *Bs Bourse*, of St. Petersburg, also reports the trial, and describes the construction as follows:

"The frame is solid instead of being of plates, the construction of the cylinders, the manner in which they are adapted to the machine, and the mechanism of all the details which enter into the construction of a locomotive excel anything of the kind ever seen. But the most striking feature is the immense fire box, about 9 feet long, which forms the essential part of the system of heating with anthracite. Grates formed of several ranges of tubes, one above the other, extend from front to rear in the furnaces. These tubes communicating with the water spaces, the water circulates in them constantly, so that the interior walls are protected against the consequences of the intense heat produced by the combustion of anthracite. * * The engine worked wonderfully well at the time, and it was noticed that there was no heating of the journals, such as is common in all new locomotives."

City Debt of Nashville.

Ninety-nine thousand dollars in city bonds, issued for the benefit of the Nashville and Chattanooga Railroad Company, will fall due on the 1st of next April. We understand that this debt will be funded with Kercheval bonds. On July 1, Morris bonds to the amount of $18,300 will become due, and will be paid, together with about $18,000 interest, which will have accrued on those and other Morris bonds. As very few of the Kercheval bonds have as yet been issued, there will only be about $600 interest on them to be paid. The administration has wisely determined to pay the interest on the Kercheval bonds, hereafter to be issued, next January, thereby saving to the city over a month of interest. When one of these bonds is given in exchange for other evidences of indebtedness, the interest is calculated up to January 1, 1874, and included with the bond. The Morris and Kercheval bonds, which have been issued exclusively for the funding of the city's indebtedness, are well received. On the market they stand deservedly high, in consequence of the city promptly meeting its interest when due, and in the redemption of all new bonds at their maturity.—*Nashville Banner.*

☞ The receipts of the Detroit and Milwaukee for the year 1872, excluding the Lake Michigan portion, were $1,381,602 84, of which $588,175 80 was derived from 438,074 passengers, and $989,447 78 from freights. Freight increased 35 per cent over 1871, though the gross receipts are $107,191 44 less than last year owing to the late opening of Lake Michigan and the drouth of 1871, which cut off a great supply of traffic by drying the streams connecting with lumber districts.

☞ We call attention to the advertisement of the Laflin & Rand Powder Company of New York, published in to-day's paper. This extensive company, with a capital of $20,000,000, is now furnishing its different qualities of powder to all parts of the United States and to Europe, having its agents in all important cities. The office of the company in this city is at No. 21 Park Row.

☞ At a meeting of the stockholders of the Delaware, Lackawanna and Western Railroad Company on the 25th ult., the following officers were elected: President, Samuel Sloan; Treasurer, Andrew J. Odell; Secretary, Frederick F. Chambers; Managers, William E. Dodge, George Bulkley, Moses Taylor, Henry A. Kent, Denning Duer, Wilson G. Hunt, John J. Blair, Rufus R. Graves, Simeon B. Chittenden, John Brisbin, George Bliss, Percy R. Pyne, William Walter Phelps, James Blair. The officers report that since the dividend of July, 1872, was declared the surplus earnings have been expended in improving the road and rolling stock.

SPENCERIAN
Double Elastic
STEEL PENS.

These celebrated Pens are increasing very rapidly in sale owing to their unexcelled manufacture. They are of superior English make, and are famous for their elasticity, durability, and evenness of point. *For sale everywhere.*

☞ *For the convenience of those who may wish to try them, we will send a Sample Card, containing all of the 15 numbers, by mail on receipt of 25 cents.*

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

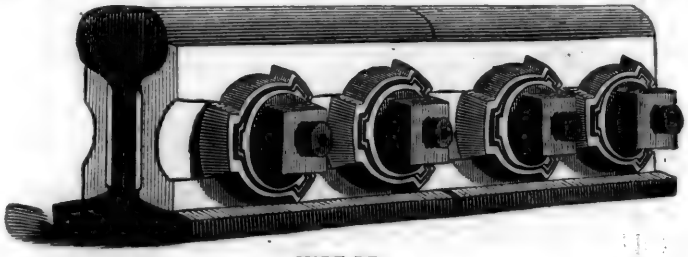
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Quicksilver Mining Company.

At the recent yearly meeting of the Quicksilver Mining Company the annual report was read, showing that the total product of the mine for the year ending December 31, 1872, amounted to 18,572 flasks, which was sold for $987,886 gold. The net profits, including rents, amounted to $451,759. The company has no floating debt; it has on hand $460,000 in cash and $115,000 worth of quicksilver and supplies. The quicksilver produced last year was sold under contract at $31 per flask for the first three months, and at $50 50 per flask during the remaining nine months. At the election for officers and directors the following board was chosen:—Daniel Drew, President; James S. Thayer, Vice-President; Eugene N. Robinson, Treasurer; David Mahany, Secretary; James H. Banker, A. B. Baylis, E. D. Stanton Eugene Kelly, Edwin Hoyt, George G. Pride, Ludlow Patten, James D. Smith.

☞ The Directors of the Athol and Enfield Railroad Company have accepted the act recently passed changing the name of the road to the Springfield, Athol and Northeastern road. The capital stock was increased to $850,000.

TO INVESTORS.

To those who wish to REINVEST COUPONS or DIVIDENDS, and those who wish to INCREASE THEIR INCOME from means already invested in other less profitable securities, we recommend the Seven-thirty Gold Bonds of the Northern Pacific Railroad Company as well secured and unusually productive.

The bonds are always convertible at Ten per cent. premium (1.10) into the Company's Lands at Market Prices. The rate of interest (seven and three-tenths per cent. gold) is equal now to about 8¼ currency, yielding an income more than one third greater than U. S. 5-20s. Gold Checks for the semi-annual interest on the Registered Bonds are mailed to the postoffice address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS.

JAY COOKE & CO.

New York, Philadelphia and Washington.

Ohio and Baltimore Railroad.

The Ohio and Baltimore Short Line Railroad Company was organized at Washington, Pa., on the 17th ult., for the purpose of constructing, maintaining and operating a railroad from a point west of Clokeyville, Washington county, to some point at or near Dawson's Station, on the Pittsburg and Connellsville Railroad. This road is to connect the Hempfield Railroad with the Connellsville Railroad and form part of the great through line of the Baltimore and Ohio Railroad Company to Chicago and the Northwest. Thus Washington will be thrown into direct communication with Chicago and the seaboard. C. M. Reed, of Washington, is President of the Company, and the following persons are directors: Thomas McKennan, W. W. Smith, Wm. Workman, S. B. Hays, all of Washington, and T. H. Garrett, Wm. Keyser and John K. Cowen, of Baltimore.

☞ The directors of the Connecticut Central Railroad Company have contracted with Willis Phelps & Co. of Springfield for building the road from East Hartford to the Massachusetts State line near Springfield—about 20 miles—for about $25,000 per mile.

Delaware and Hudson Canal Company.

To provide means for the completion of the line of railroad now under construction on the west shore of Lake Champlain and for other purposes connected with the extension of the business of the company, the board of managers of the Delaware and Hudson Canal Company have decided to issue the remaining fifty thousand shares of the capital stock, as authorized by the stockholders at the annual meeting held May 12, 1868. In making the formal announcement of this intention to the New York Stock Exchange on the 1st inst., the following details were given:

There will be apportioned to every person who shall be a stockholder on the 1st day of April next one share for every three then standing in the name of such person on the books of this company.

The stock will be issued at par, and must be paid in cash to the treasurer of this company in installments, as follows:

Twenty-five dollars per share on the 15th day of April next.

Twenty dollars per share on the 15th day of July.

Twenty dollars per share on the 15th day of October.

Twenty dollars per share on the 15th day of January, 1874; and

Fifteen dollars per share on the 15th day of July, 1874.

Interest will be allowed at the rate of 7 per cent per annum upon installments, and parties may take full paid stock and be allowed interest from date of payment to August 1st, and be thereafter entitled to a participation in dividends.

A failure to pay first installment will be regarded as a refusal on the part of the stockholders to avail of the privilege offered, and the non-payment of any subsequent installment will involve the forfeiture of the stock and of all that may have been previously paid on account thereof.

The transfer books of the company will be closed from the evening of March 31st to the morning of April 15th.

☞ From the annual report of the directors of the Pewabic Mining Company it appears that the total product of the mine in the year 1872 was 522,861 lbs. Ingot Copper, the company's share of which was 74,936 lbs., to which add 15,800 lbs. as their share from the Concord mine and we have a total of 90,736 lbs. The receipts of the year were $62,188 11; cash in bank or loans Jan. 1, 1873, $12,613 94.

The Virginia State Debt.

The bill for the purpose of providing for the payment of the interest on the Virginia State debt, the main points of which have been heretofore published, will be more fully understood by the following conference and agreement between the legislative committee and bondholders, lately in convention at Richmond. The agreement submitted by the committee is, according to the report of the Whig, to provide by proper bill for the payment of interest due 1st January and 1st July, 1873, as follows: Pay at rate as follows: Four per centum per annum on funded debt; four per centum per annum on two-thirds unfunded debt; and at the same rate on five per cent. bonds. For each coupon redeemed to issue a certificate for one-third to the following effect: "Due by the State of Virginia to the bearer (one-third amount of coupon redeemed) without interest."

One of the bondholders desired to know if the legislative committee had any explanations to add to the propositions tendered. He would like to know what was to be done with the matured coupons, which were the chief difficulty in the way of an amicable adjustment.

The committee said that the proposition relates to and embraces only the interest for this year, (1873,) beginning 1st of January. And while they would be glad to provide for the past due coupons and for the whole unpaid interest, the proposition only offers to do what they think the State can now do and no more. The gentleman representing the bondholders added that it will be found that these coupons of 1872, which the proposition submitted does not provide for at all, will not only prove of great embarrassment to the State treasury of themselves, but the fact that they are unprovided for will disincline many bondholders to come into any arrangement which may be agreed upon here as to the interests of 1873.

The committee stated that this scheme, which merely embraces the interest of 1873, is an experiment which they can undertake with some prospect of success. They do not make any proposition as to the past, leaving that to take care of itself, and only seeking to reach an accomodation of the present. They could not undertake anything which may entail an increase of taxes, which view was finally agreed to by the bondholders present.

Eastern Railroad.

The directors respectfully submit to the stockholders their annual report for the year ending November 30th, 1872.

The Eastern Railroad Company's line of railroad as defined in their charter extends from Boston to the boundary line of the State of New Hampshire, a distance of forty-one and one-third miles: but this company operates, besides its main line, the Lawrence, Saugus, South Reading, Gloucester, Amesbury, Marblehead and Essex Branch Railroads in Massachusetts, the Eastern Railroad of New Hampshire and the Portsmouth, Great Falls and Conway, and Wolfboro Branch Railroads, in that State, and the Portsmouth, Saco and Portland Railroad in Maine, making in all two hundred and sixty-five miles of railroad, in the whole working and pecuniary results of which the stockholders of this road are directly interested. It seems proper therefore that in their statement of the business of the year the directors should include all these railroads and branches, but as this has not been heretofore the practice it deprives us for this year of a standard of comparison.

In considering this statement it is to be borne in mind that the Conway Road was not completed and opened until the third day of June, 1872, the Wolfboro Branch only on the nineteenth day of August, and the Essex Branch on the first day of July, 1872, so that we have not had a full year's business on these roads for this year.

Statement of the receipts and expenditures of the Eastern Railroad, its branches and the connecting railroads operated by it for the year ending November 30th, 1872.

Receipts from—		
Passengers		$1,822,855 10
Freight		863,789 70
Expresses		65,875 31
Extra baggage		1,581 27
United States mail		24,936 40
Rentals		18,786 01
Miscellaneous		29,848 07
Total income		$2,827,641 86
Expenditures for—		
Fuel	$331,811 98	
Maintenance of way	434,175 10	
Locomotive power	315,233 80	
Train expenses	436,462 55	
Station expenses	286,090 47	
Office expenses	108,445 41	
Insurance and taxes	93,526 97	
		2,004,746 28
Balance		$822,895 58
Deduct interest paid	$354,593 93	
Dividends on P.S. and P. R. R. as per contract.	150,000 00	
		504,593 93
Balance		$318,301 65

Among the expenditures as stated above, there is included quite a large amount expended for labor in and about the construction of the double track and other extraordinary work, which, if it could be separated, would properly be charged to construction account. The cost of operating the roads including these expenditures has been 70 per cent of the gross receipts.

During the past year we have built a double track from Wenham to Ipswich, from Greenland to Portsmouth and from East Boston to Revere, making in all twelve and one-half miles of double track laid this year, and giving us thirty-three miles of double track between Boston and Portsmouth, and more than five miles at other points. We have also put in seven and one-half miles of sidings in addition to what we previously had; thus making twenty miles of new track laid within the year. In the construction of these tracks and in renewals and repairs we have laid this year on the Eastern Road and Branches 1,908 tons iron rails and 1,170 tons steel rails, and on our other roads 1,400 tons of iron rails. Of the fifty-six miles of our main line between Boston and Portsmouth, seventeen and one-half miles are now laid with steel rails.

New stations have been built at East Boston, at Somerville, Lynn and Greenland, and general repairs have been made at other stations on the road. The station at Lynn has been much improved by the enlargement of its grounds, and the building itself is believed to be a model of convenience, elegance and neatness. A new car house has also been built at Boston, a new waterhouse and tank at Lynn, the engine-house there enlarged, a new engine-house and turn-table at Wenham, and the new engine-house and coal-sheds at Portsmouth have been finished; and we have also built a new blacksmith and road carpenter's shop at Salem.

The bridge over Chelsea Creek on the East Boston branch and the bridge and draw over the Squam River at Gloucester have been rebuilt; and fifty-two miles of new fence have also been built during the year.

The Essex Branch Railroad, running from Wenham to the town of Essex, a distance of a little more than five miles, and which cost $115,000, has been purchased by this company, pursuant to the authority given by the Legislature, for $85,000; and the Newburyport City Railroad has been leased to us for six per cent on $100,000, a sum somewhat less than its actual cost. Both these roads promise well. We have also made an agreement for the lease of the Dover and Portsmouth Railroad, which is now in process of construction, and which will doubtless be running in the course of this year.

Our equipment has been very largely increased during the year, we have added fifteen new locomotives, forty-five new passenger cars, eight baggage, mail and express cars, one hundred and thirty-three box freight cars, and seventy-five new platform cars.

The large number of passengers carried over our road rendering the acquisition of additional station accommodations in Boston an imperative necessity, and the Legislature last winter granted to us for this purpose a strip of land twenty nine feet in front on Causeway Street, the property of the Boston and Maine Railroad, and used by that company as a depot for bricks and for some other purposes, and the value of the property taken was to be determined by a commission appointed for that purpose. The forcible resistance of that corporation prevented our availing ourselves of this grant as soon as we contemplated, but legal measures were immediately taken to enforce our rights, and we have now obtained possession of the premises and plans are being prepared for our building at once. The want of freight accommodations in the city proper is a serious detriment to our business, and one which has occupied the attention of the officers during the past year. A satisfactory solution of this difficulty has not heretofore been possible, but is now hoped for.

At their last session, the Legislature of Massachusetts passed a statute requiring cheap trains to be run at morning and evening to and from Boston, upon the application of two hundred passengers. In response to petitions presented to us, and at the request of the railroad commissioners we have begun the experiment of running cheap morning and evening trains, though not in the mode provided in the statute. It is too early to speak with certainty as to these trains. It would not be just to pronounce them a failure, nor true to call them a success. Whether there is a real public demand for them, such as exists in Great Britain, remains to be proved.

In pursuanec of the authority given by the stockholders at their last meeting the directors have issued bonds to the amount of fifteen hundred thousand dollars, one million in currency, at seven per cent interest, and five hundred thousand dollars in sterling bonds bearing six per cent interest. Substantially all the currency bonds have been sold. The sterling bonds are in the hands of Messrs. Baring Brothers & Co., under an agreement with them. The directors recommend that the stockholders authorize them to issue additional bonds to the amount allowed by law.

The Portsmouth, Great Falls and Conway Railroad has issued its bonds to this road to repay the sums advanced by us towards its construction; and these bonds we are negotiating.

The damages caused by the disastrous accident at Revere have been substantially settled. Only one case was tried before a jury, and one was heard by referees. The liability of the company could not be questioned, and as most of the injuries were accompanied by serious disfigurements, it was impossible to adjust them by the payment of any moderate sums. The total cost of this accident thus far has been $484,784 88. The directors have thought that this amount should not be charged at once to the expenses of this year, but that it should be, in part at least, funded and paid of gradually.

On the 22nd of October, 1872, there was a collision between the night Pullman train from Bangor and a freight train, at Seabrook, caused by the misplacing of a switch. Two persons were killed, and about twenty injured, most of them slightly. Two coroners' inquests, one at Portsmouth, and one at Newburyport, have found this company not responsible, or in any way to blame for this accident, and the directors do not question the correctness of these verdicts.

The value of the Miller platform was confirmed by an inspection of the effect of this collision on the cars constructed in this mode; and the directors are happy to say that substantially the whole pas-

senger equipment of the road is now supplied with this, and with the Westinghouse brake; we have also very largely increased our telegraphing facilities and the use of the telegraph in operating the road and in moving trains, and have introduced as a safety appliance upon our double track road, Hall's Automatic Electric signals, by which the intervals between following trains is to be fixed by distance and not by time.

After the last annual meeting, the directors in view of their length of road and increasing business, thought it wisest and safest to obtain the services of some one of the largest skill and experience as general manager, who should have the control of the entire operating department of the railroad; and they were fortunate enough to secure the services of Mr. Charles F. Hatch, the general superintendent of the Lake Shore and Michigan Southern Railroad. This gentleman was most highly recommended to them by several experienced railroad managers; and in his position here he has given entire satisfaction to the directors, and is believed to have won the confidence and respect of the stockholders and of the public.

BALANCE SHEET, NOVEMBER 30, 1872.

Cost of railroad	$7,089,220 36

Superintendent Conway Division.—A. A. PERKINS, Great Falls, N. H.

The Life of Rails.

It is hardly safe now to regard any estimate of iron rails. Not that iron rails cannot be made that will show good wearing results, but from the fact that, with very few exceptions, none are made. On the Boston and Albany Railroad some twelve thousand tons of iron rails were laid last year, and of this amount eight hundred tons have been removed as useless or unsafe. The managers of this road, in common with most others having roads of large traffic, have resolved to adopt the use of steel rails hereafter, and we learn that they have bought some nine thousand tons of steel rails in Europe, four thousand tons of which will arrive and be put on the track this season, and the balance during the next summer.

The duration of life of rails depends upon the quality of the iron of which they are made, and upon the amount and speed of the traffic passing over them. The rails first made in England were rolled from best No. 1 cold blast mine iron, run out in a finery fire, puddled, shingled, rolled into bars, and were cut, piled, heated, and hammered into blooms, and these were reheated and rolled into rails. The result was a material such as is rarely seen upon our railways at the present time. The old forty-five pounds reading rail bore an immense traffic for twenty years, and a like character of rail on the Boston and Providence Road lasted some thirty years, and many of these rails are now in use in the road, though not in exposed positions.

The iron at first used upon English roads in many cases withstood from fifteen to twenty years, of wear upon an enormous traffic. It was in 1849, upon the London and Norrhwestern Railway, that fifty trains a day for twenty years, or 313,000 trains, would wear out a seventy pound rail. With the material now put into railway tracks, however, no such service is obtained. Under favorable conditions good iron will last eight years under an average traffic; but with the material commonly employed, from three to six years is all that can be counted upon for roads doing a good amount of work, and the life of the iron upon the great routes is in many cases less than this.

With regard to the life of steel rails, everything here again depends upon the quality of the metal. A pair of twenty one feet Bessemer steel rails, upon the London and Northwestern Railway, outlasted sixteen faces of iron rail, being evenly worn to a depth a little over a quarter of an inch; having in about three years sustained the traffic of upward of 9,600,000 engines and cars, or about 95,000,000 tons. This particular pair of rails were finally destroyed by a locomotive running off the track, the wheels striking the rails transversely, and badly bending and breaking them.

It is estimated that they would have endured at least one-half as much more tonnage but for the accident. So, too, upon the Philadelphia, Wilmington and Baltimore Railroad, a good steel rail has outlasted sixteen iron rails, the use of both being the same; and on many other roads of large traffic the same successful results have been achieved. Railway managers have to exercise more care and discrimination in the quality of the rails they purchase, whether made of iron or steel. In fact, there is a good amount of pretty miserable stuff sold for steel rails, as some of the managers of the New England roads know to their cost.—*London Railway Times.*

Erie Railway.

The great financial event of the week has been the prompt subscription to the $10,000,000 seven per cent gold bonds of the Erie, issued at 82 per cent, and to which subscriptions had been invited, under instructions from the directors of the Erie by Messrs. Bischoffsheim and Goldschmidt. Confidence is proverbially a plant of slow growth, and it has required time to realise, by anticipation, the full effects which a radical reform in the administration of the line is calculated to exert upon its fortunes. With an indubitably able and influential directory, possessed of a programme as to future policy, which opinion, both here and New York has fully endorsed no conceivable impediment presents itself to interfere with the Erie becoming one of the most profitable lines on the American continent. New sources of traffic are being daily opened by the conciliatory and business like course adopted by the directors, who are intent on reinstating it in its true position as a great channel of commerce and trade. As announced by Messrs. Bischoffsheim and Goldsmidt, the proceeds of the issue of bonds they have so successfully negotiated will be devoted to doubling the track, narrowing the guage, or placing a third rail on the present broad guage, altering curves and grades, the erection of warehouses and elevators, the re-construction of stations, workshops, and engine-houses, the increase of rolling stock, and generally to the improvement of the property. Thus not only will the line be capacitated for the daily augmenting traffic, but, as is evident, the working expenses will be decreased. With this addition to the bonded debt of the company, the total is brought to $40,000,000 dollars (£8,000,000), involving an annual interest of but £560,000. After providing this interest the surplus revenue will be available for dividends on $8,536,910 seven per cent preference shares, and on $78,000,000 ordinary shares. The official statistics we published in last week's issue, showed that the total earnings of the line for the year ending December 31, 1872, amounted to £3,738,800, and that the earnings for the six months ending same date, and available for dividend on common stock, amounted to £285,800, which would have been still larger, but that the working expenses include $4,000,000 (£800,000) for bridges, rails, and general construction, of which $1,000,000 (£200,000) being for new works might have been properly carried to the surplus revenue. The fact that in six months a sufficient sum has been earned for a dividend of nearly two per cent on the common stock, whilst for dividend on the preference shares there is the full sum of $597,000 (£119,400). The time has not yet arrived to experience the full advantages of the construction improvements carried out; to these additional value will be given by those to which the proceeds of the bonds so successfully negotiated will be applied. The directors are manifestly less concerned to realize immediately large dividends than to see that good dividends shall be permanently maintained in the future by the line being placed in a position for working the traffic—traffic which this new capital will serve to increase. By an alteration of gauge the Erie will be brought into unison with the great system of lines of the Union of which it is an essential artery. The expenditure is in other words an improvement of the property. Railway traffic never fails to respond to increased facilities, such as the more expeditious manner in which the largely accumulating trains are run over the road. The changing of the broad to the narrow guage is a gigantic plan, but Mr. Peter H. Watson, soon after his assumption of office, declared that this change would secure to stockholders an ample dividend. It is not alone in the connections which the road will be enabled to make with other railroads that it will be benefited, but in actual reduction of cost of transportation and repairs. In looking to what has been done, and what is being done, the conviction is enforced that the Erie has reached a position of prosperity and credit. The preceding issue of $30,000,000 consolidated seven per cent mortgage bonds of the company comprised the whole of its mortgages, thus covering its entire indebtedness and providing for the floating debt. The present bonds are evidently a sound security, and having regard to their issue price are calculated to become a highly popular investment, increasing in value accordingly. It must be remembered that the traffic returns presented are satisfactory, and it appears a certainty that, under the new management, these will advance in an ever increasing ratio. It is unnecessary to point out in this connection the immense development taking place in the trade of the United States, which tells directly upon railway traffic, and of which the Erie must obtain its full share. —*Herapath Feb.* 15.

☞ The officers and directors of the Paducah and Memphis Railroad Company, recently elected, are: President, Ex. Norton; Vice President, L. S. Trimble; Directors. John Overton, Jr., A. T. Lacey, H. S. McComb, J. S. Rogers, Horace E. Garth, D. M. Henning, Jas. Elder; Treasurer, John L. Norton; Secretary, N. Monsarrat.

☞ The Romney (W. Va.) Intelligencer states upon "information considered reliable and accurate," that the South Branch Railway will be put under contract to Romney at once, and that "the interest of the Baltimore and Ohio Railroad," in the enterprise affords sufficient assurance of the prompt and substantial completion of the work.

☞ Mr. A. N. Chrystie, Vice President of the Ohio and Mississippi Railroad, has received the appointment of General Manager, in addition to his present office.

Philadelphia and Reading Railroad.

We gave in our issue of Jan. 25, an abstract of the "Transportation and Income Account" of this company for the fiscal year ending November 30, 1872, together with the Report of the Managers. Below will be found several important tables referring to the years 1871 and 1872, including the "General Account." We also append a statement of the Cost, Earnings, Dividends, etc., etc., since the completion of the road in 1842–'43:

	1871.	1872.	1871.	1872.	1871.	1872.

Imports of Dry Goods.

The imports of foreign dry goods at New York for the month of January, were:

ENTERED FOR CONSUMPTION.

	1872.	1873.
Manufactures of wool.....	$2,107,000	$1,948,812
" cotton...	2,076,074	2,064,227
" silk	1,968,935	1,829,281
" flax	1,068,963	1,038,681
Miscellaneous dry goods..	935,336	704,269
Total entered for consump.	$8,151,308	$7,584,770

WITHDRAWN FROM WAREHOUSE.

	1872.	1873.
Manufactures of wool	$1,238,098	$1,404,737
" cotton ...	766,367	920,396
" silk.....	845,237	664,579
" flax	731,566	677,603
Miscellaneous dry goods..	165,420	110,368
Total withdrawn from warehouse	$3,746,688	$3,777,683
Add entered for consump.	8,151,308	7,584,770
Tot. thrown on the market.	$11,897,996	$11,362,453

ENTERED FOR WAREHOUSING.

	1872.	1873.
Manufactures of wool	$1,480,721	$1,286,847
" cotton ...	1,209,260	1,467,283
" silk.....	1,258 896	1,525,761
" flax	646,237	710,299
Miscellaneous dry goods..	221,500	203,033
Total entered for wareh'g..	$4,816,614	$5,193,223
Add entered for consump.	8,151,308	7,584,770
Total entered at the port.	$12,967,922	$12,777,993

The imports of foreign dry goods at New York for seven months ending with January, were:

ENTERED FOR CONSUMPTION.

	1872.	1873.
Manufactures of wool..	$16,733,242	$12,553,159
" cotton	9,955,683	8,858,466
" silk ..	14,614,279	11,601.915
" flax ..	6,998,094	5,999,074
Miscellane's dry goods.	6,089,516	4,254,902
Total entered for cons'p.	$54,340,814	$43,267,516

WITHDRAWN FROM WAREHOUSE.

	1872.	1873.
Manufactures of wool ...	$8,010,049	$13,506,448
" cotton..	2,784,277	5,134,854
" silk	4,783,512	5,566,496
" flax	2,757,912	2,503,412
Miscellaneous dry goods.	803,460	1,123,494
Total withdrawn from warehouse	$19,139,210	$28,834,704
Add entered for consump.	54,340,814	43,267,516
Total thrown on the market...	$73,480,024	$72,102,220

ENTERED FOR WAREHOUSING.

	1872.	1873.
Manufactures of wool....	$9,314,833	$13,007,778
" cotton..	3,737,320	5,892,862
" silk	5,720,775	6,987,724
" flax	3,535,791	4,081,755
Miscellaneous dry goods.	1,002,788	1,152,467
Total entered warehouse.	$23,311,507	$31,122,586
Add entered for consump.	54,340,814	43,267,516
Total entered at the port..	$77,652,321	$74,390,102

The above figures represent only the foreign cost of the goods in gold, the freight and duty not included.

☞ The stockholders of the Tripartite Bridge Company, at a meeting held in Pittsburgh on the 28th ult., decided, by a vote of 6,650 shares in favor to 840 against it, to discontinue the enterprise and surrender the charter.

☞ The contract for building the Kentucky and Great Eastern Railroad, which is to extend from the city of Covington, or Newport, Kentucky, to a point on the boundary of Kentucky and Virginia, near the mouth of the Big Sandy River, 146 miles, has been awarded and the work will be begun this month. By the terms of the contract sixty miles of the road are to be completed in September, 1873, and the whole in 1874. By a short extension to unite with the Chesapeake and Ohio road at Huntington, a direct line will be opened from Cincinnati to Richmond and Norfolk, Va.

☞ An enterprise has been proposed, which meets with much encouragement, to build a railroad from Pomona, on the Camden and Atlantic road, to Tuckerton, a distance of fifteen miles.

Statement of the Public Debt of the United States March 1, 1873.

Western Pacific bonds, 1862-4	1,970,560 00	19,705 60
Sioux City and Pacific bonds, 1862-64.....	1,628,320 00	16,283 20
Totals.....	$64,623,512 00	$646,235 12

Interest paid by United States, $18,509,230 90; interest repaid by transportation of mails, &c., $4,185,353 52; balance of interest paid by United States, $14,323,927 38.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, Feb. 28, 1873.

GEO. S. BOUTWELL,
Secretary of the Treasury.

Texas and Pacific Railway.

Work on this great railway through Sherman is being pushed with vigor, and between here and Bonham is within a few days of completion. The work is also within two or three weeks of completion east, between Bonham and Honey Grove; and seven miles of grading has been finished west of Sherman towards Pilot Point. The bridging east of Sherman is being rapidly finished. The timber work at the bridge over Choctaw will be about two thousand feet long, and a Howe truss bridge of eighty-feet spans will be thrown across that stream. Several pile-drivers have been at work between here and Bonham for some time, some of them working day and night. We learn from our Paris exchanges that the telegraph will be finished to that place in about ten days; the poles last week had been set up one mile west of Honey Grove and are being put up rapidly towards Sherman, and in a short time we may expect to converse by lightning with the cities of Jefferson, Shreveport and New Orleans.

We learn that in a short time after the completion of the Texas Central to Sherman, which will be but a few days, that track-laying will begin on the Trans-Continental from Sherman east to Bonham and Paris.—*Sherman Patroit.*

☞ The last rail of the Port Royal Railroad was laid on the 28th ult., and trains traversed its entire length. This road connects the harbor of Port Royal, S. C., with Augusta, Ga., and the west.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained."
Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "‡."

Saturday, March 8, 1873.

Stock Exchange and Money Market.

The Money movement has been very steadily close and stringent, especially as against the borrowing interest, on speculative account, the wants of which have been unusually pressing. Call loan rates have been maintained at high figures, varying from the legal rate in gold, up to $\frac{1}{16}$@$\frac{3}{32}$@$\frac{1}{8}$ of one per cent per day in addition, with most of the advances on stock collaterals at a fractional commission over the legal price. Lenders have been availing themselves of the urgency of the demand, from day to day, to profit to the utmost by the necessities of the more needy of the operators in the Stock line. The city banks have not been able to afford much help, yet have been aiding their regular customers as far as possible, in view of their contracted resources. The discount market has been quiet, throughout the week, with rates more or less nominal, the best grades of business paper ranging from 9@12 per cent per annum. The city banks, last week, lost about ¾ths of a million of their legal tender reserve, and added about 1⅜ millions of their specie average. Their deposits were further cut down about 8⅞ millions, and their loan and discount averages reduced about 5½ millions. The banks continue below their reserve, the last statement showing that they lacked $312,350 of the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, made a moderate addition to its coin balance while losing two millions of currency. Its currency reserves at the close of the week were $22,389,160; and its coin board, $36,926,930.

The city banks, in their latest return, show a falling off of $737,200 of legal tender notes, with an increase of $1,323,600 of specie, and a reduction of $3,832,600 in their deposits, also a contraction of $5,525,200 in their loan and discount averages, and an addition of $28,200 to their item of circulation. The city bank exchanges, last week, averaged 136⅜ millions. The banks now hold $312,350 of specie and legal tender notes less than the 25 per cent. of their liabilities required by the National Banking Act.

The clearances of the banks averaged through the week 136⅜ millions a day, and amounted in the aggregate, for the whole week, to $818 260,203 as against $626,895,902 the preceding week. The U. S. Sub-Treasury at this point reduced its currency balance $1,951,140 and enlarged its coin reserve $697,223 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $16,370 500, against $18 333,600 same time last year. The city bank deposits are now $202,066,100 against $210,472,800, week ending March 2, 1872. The legal tender reserve amounts to $40,724,000, against $43,770,400 same time last year. The circulation now stands at $27,601,300 against $28,165 400 same time last year. The loans are now $281,344 900 against $280,280,100 at this date last year.

The coin reserve of the city banks is now about 16⅜ millions as against about 25¾ million on the 20th of last July; the legal tender reserve is under 40¾ millions against about 55½ millions on the statement of June 15th; and the deposits are now about 202½ millions, against 247½ millions on the 20th of July.

Government revenues have been moderate since our last. The excises yielded within the week about two millions, and thus far in the current fiscal year beginning with July 1, 1872, $78,301,141 millions. The customs at the port of New York, for the week, were $3,168,082, and at the outports, about a million more, in coin or coin certificates.

The U. S. Sub-Treasury office last week received $4 753,129 of currency, and $6,035,177 of gold, the latter including $3,242,000 from customs; and disbursed $6,704,169 of currency and $5,337,955 of gold, the latter embracing $110,562 of coin interest.

The Secretary of the Treasury has called in $390,000 of the three per cent certificates, being those of the denomination of $5,000, from numbers 5,652 to 5,765, inclusive, and those of $10,000, from 5,564 to 5,600, inclusive, dated from April 10, 1869, to January 3, 1870; interest will cease April 30, 1873. This call includes all the $10,000 certificates that are outstanding.

Gold has been generally strong and buoyant, considering the closeness in Money, on a fairly active and quite confident speculative demand. The Customs drain has been fair while the export movement has been light. The treasury programme for March provides for sales of $1,500,000 Gold each Thursday or $6,000,000 in all. The range of the price during the week has been from 114½@115¼ and the closing quotation on Wednesday was 115⅛ against 115⅛ on Wednesday of the preceding week. The specie outflow last week, was $625,487. The Gold Exchange Bank clearances have averaged about 51½ million per day during the week.

Under the Treasury programme for March, Government proposes to sell at least six millions of Gold as follows: Thursday, March 6, $1,500,000; Thursday, March 13, $1,500,000; Thursday March 20, $1,500,000; Thursday, March 27, $1,500,000. And to buy in at least three millions of Five-Twenties, as follows: Wednesday, March 5, $1,000,000; Wednesday, March 12, $500,000; Wednesday, March 19, $1,000,000; Wednesday, March 26, $500,000.

The customs demand for Gold last week, averaged $540 333 a day. The arrivals of specie from Europe, Havana and other foreign ports last week were $9,932 and thus far in 1873 have been $194,719 against $274,604 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $92,290,973 against $107,288,052 during the same time in 1871-2.

Government has disbursed through the U. S. Sub Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $59,356 780, against $60,789,903 during the same time in 1871-2.

The export drain of specie was $625,487 last week, against $678,388 same week preceding year. The shipments since July 1, 1872, have been $46,326,552 against $25,166,661 during the same portion of 1871.

Foreign Exchange has been quoted much lower, on liberal offerings, and a comparatively slow sale for even prime bills, in view of the protracted stringency in Money. Bankers' sixty day bills on London closed at 108@108¼; sight bills on London, at 109@109¼. The week's exports of Domestic Produce have been to the currency value of $5,259,906.

Government securities have been in comparatively fair request, for investment purposes, and despite the Money pressure, the offerings of bonds have been on a moderate scale. The last public debt statement, showing a liquidation of $5,277,881 in February, has tended to strengthen confidence in values.

Government bought in on Wednesday a million Five Twenties, from 11 53@118 65 net out of an aggregate offering of $3,097,250.

U. S. sixes of 1881 closed on Wednesday of this week at 118¼@118⅛ U. S. Five-Twenties of 1862, 115⅛@115¾; U. S. Five-Twenties of 1864 at 115½@115¾; U. S. Five-Twenties of 1865, 116⅛@116⅝, U. S. Five-Twenties of 1865 consolidated, 114⅝@114⅞; U. S. Five-Twenties of 1867, 116⅛@116⅝; U. S. Five-Twenties of 1868, 116¼@116½; U. S. Ten-forties at 111@111¼; U. S. Fives of 1881 (Funding Loan) 113¼@113¾; Six per cent. currency Sixes from 113¾@114.

The Sub Treasury receipts in February were $42,250,001, including $13,112,129 from customs;

payments $41,060,623, including $1,760,907 of coin interest.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 19.	Feb. 26.	March 5.
Consols	92⅝	92⅛	92¾
U. S. 5-20s, 1865	92¾	93⅛	93¾
" 1867	93¼	93½	93¾
" 10-40s	89½	89⅛	89¼
New Fives of 1881	90½	90⅛	90⅝
Erie	51½	51⅛	52⅜

State bonds have been moderately dealt in, mostly on investment account and prices have been pretty well supported.

Railway Mortgages have been quite firm, as a rule, and generally in good investment demand with small offerings noted of the favorites of the older loans. Central Pacific Sixes have been in fair request at from 104@104¼, with quite limited offerings of the bonds in the open market. Chesapeake and Ohio Sixes have been of ready sale, and quoted firm at 87½ and interest. Western Pacific Sixes have been more active at 94¾@95. The Northern Pacific 7-30 Loan continues in good request at par and interest.

Railway and Miscellaneous share property has been very active, with wide fluctuations in values, especially on the leading speculative favorites. Pacific Mail was most seriously depressed, falling on Monday as low as 49, but subsequently rallying rather sharply. The Money pressure was most severely felt at the Stock Board.

The Metal trade generally lacks animation. Copper has been in moderate request, and rather steadier in price; sales, 150,000 lbs. Lake at 34½c.@35c., and 50,000 lbs. do., April delivery, at 35c. Under favorable cable advices, Scotch Pig-iron has been held with firmness on a light offering, but has been quiet. American Pig-iron has been in moderate demand, with sales reported of 700 tons No. 2 and No. 1, on the basis of $48 and $50. Other kinds of Iron quiet. We quote: Glengarnock Pig at $56@$58; Eglinton do. at $56; Gartsherre at $60; Coltness at $64@$65; No. 1 American Pig at $50; No. 2 do. at $45@48; Wrought Scrap at $57 50@$60; English Rails at $70@$71, gold. Of foreign Lead, 50 tons Soft Spanish sold at $6 50, gold; market firm. Spelter sold to the extent of 50 tons Silesian at 7¼c., gold. Pig-iron has been quiet, with only 100 slabs Straits sold at 31¼c., gold. A fair demand has been noted for Tin Plates at firm prices; sales, 3,000 boxes Charcoal, for forward delivery, at $1 75@$1 87½; 1,000 boxes Coke, here, at $10 50, and 1,000 boxes Charcoal Terne at $10 75, gold. Charcoal Plates quoted here at $12@$12 25; Charcoal Terne, $10 50@$11; coke, $10 25 @$10 75, and Coke Terne, $8 75@$9 75, gold, per box.

General business has been on a moderate scale. Domestic produce has been generally dealt in with less freedom. Prices at the close were irregular. Middling upland cotton, left off heavily on Wednesday at 20¾@21½ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,761,000 bales, against 2,262,569 bales same time in the preceding year; exports 1,615,691 bales against 1,312,576 bales in the previous year; stock at the ports at latest dates, 562,000 bales against 525,775 bales same date 1871.

Foreign goods have been in rather more request with a fair show of steadiness as to values. The week's imports amounted to $9,394,736, including $3,922,248 of dry goods.

Ocean freights have been more active, and generally firm. Vessels for the Petroleum, Cotton, Grain, and Lumber trades in request.

At the Live Stock Markets, Beeves have been in less request at from 8@14¼ cts.; Veals at 7½@12 cts.; Sheep at from 5@8 cts.; Swine at 5¼@5¾ cts. per lb., all live weight. The week's receipts were 7,232 Beeves, 700 Veal Calves, 24,987 Sheep and Lambs, and 29,992 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

R., 22@23½; George's Creek Coal, 113@125.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending February 22d at 224,470 tons, and for the coal year 2,099,475 tons, against 2,118,128 tons to corresponding time last year, being a decrease of 18,475 tons. The bituminous tonnage for the week is 36,325 tons, and for the year 239,431 tons, giving a total of all kinds for the week of 222,795 tons, and for the year 2,338,906, being an increase as against production to same time last year of 56,556 tons.

☞ A certificate of incorporation of the Defiance and Indianapolis Railroad Company has been filed with the Secretary of State. The object is to build a road from some point on the Toledo, Wabash and Western Railroad in Defiance county, Ohio, to Decatur, Indiana. The corporators are Henry Kahls, Edwin Phelps, P. Buffington, Virgil Squires, Adam Wilhelm and A. S. Latty.

☞ The board of directors of the Pennsylvania Railroad Co. have elected Edmund Smith Esq., treasurer of the company, in place of Major Firth, resigned, and appointed Bayard Butler, the present cashier of the company, assistant treasurer—both to take effect March 1, 1873.

☞ The Penobscot Bay and River Railroad Company have been given two years longer to complete their road, while the St. Croix and Penobscot Railroad Company have been authorized to extend their road up the Schodiac river to Princeton and thence to Bangor.

☞ The engineer of the Chicago and Northwestern Railway has been ordered to survey at once a line from La Crosse to Onalaska, with a view to building a road between the two points.

☞ The estimated earnings of the Kansas Pacific Railway for the third week of February are: freight, $27,810 27; passengers, $22,825 51—total, $50,635 78.

BANKING OFFICE
OF
FISK & HATCH,
No. 5 Nassau Street.

NEW YORK, March 5, 1873.

The Chesapeake and Ohio, the Central Pacific and Western Pacific Bonds,

all of which have been negotiated by us, we believe to be among the best and most desirable Investment Securities in the market, which in time must become very scarce; especially as the Government will probably pay off during the year, in gold, $300,000,000 FIVE-TWENTIES, and a large amount of money thus released from investment must find its way into this class of securities.

The Chesapeake and Ohio Six Per Cent. Gold Bonds,

the total amount of which is only $15,000,000, are secured upon a property worth $35,000,000 to $40,000,000, and are fully equal in intrinsic value to the CENTRAL PACIFIC BONDS. They are issued in denominations of $100, $500, and $1,000 coupon or registered, and at their present market price, 87½ and accrued interest, are very desirable.

The Central Pacific Six Per Cent. Gold Bonds

are too well known to require description or commendation. Their total amount is $25,885,000; they have for a long time ranged in market price near or above par. Their price to-day is 104⅛@104¼.

The Western Pacific Six Per Cent. Gold Bonds

amount to $2,735,000. This road is now consolidated with the CENTRAL PACIFIC, and the payment of its bonds, principal and interest, is assumed by the latter. As they have recently been introduced on the Stock Exchange, we expect to see them rapidly rise to the price of CENTRAL PACIFICS, being substantially the same in character and value. Coupon Bonds, $1,000 each. Their market price to-day is 94¾@95.

We buy and sell, as usual, Government Bonds, receive deposits, on which we allow interest, make collections, and conduct a general banking business in all its branches.

FISK & HATCH.

☞ A company has been formed in New Jersey to build a railroad from some point on the Camden and Atlantic road, at or near Haddonfield, to Fellowship, in Burlington county. They have prepared a bill, which is now before the Legislature, asking for authority to construct said road. The capital is $400,000, with power to increase it to $600,000. The bill names as corporators, Charles Collins, Wm. R. Lippincott, Emmor Roberts, Joseph H. Cole, Joseph Evans, Joseph Lippincott, Geo. B. Borton.

☞ The receipts of the Dorchester and Delaware Railroad for the past year were $22,791 89, the operating expenses $15,616 64, and the net earnings $7,175 25.

The Indiana and Illinois Central Railway Co.

Offers for sale its FIRST MORTGAGE 7 PER CENT. GOLD BONDS, 30 years to run, with ample Sinking Fund.

The Road runs due EAST and WEST from INDIANAPOLIS to DECATUR, 152 miles, through the richest settled country of the West. It crosses the BLOCK COAL FIELD of Indiana at its best point, and it cannot fail to have a LARGE LOCAL AND THROUGH BUSINESS, as it makes a great saving of distance and has low grades.

It is building for cash, by responsible stockholders, and is BONDED FOR MUCH LESS THAN ITS COST. Eighty five miles will be done and in profitable operation this Spring, the residue within the year. There is no better bond on the market. For pamphlets and information apply to

Walker, Andrews & Co.
No. 14 WALL-ST.

Redemption of U. S. Bonds.

The Secretary of the Treasury issued his call on the 1st inst. for fifty millions of bonds, in accordance with law and his agreement with the syndicate, giving notice that principal and accrued interest of the coupon 5 20 six per cent U. S. bonds will be paid and interest cease on the 1st day of June, 1873:

That is to say, coupon bonds known as the second and third series, act of February 25, 1862, dated May 1, 1862, as follows: Coupon bonds, second series—$50. Nos. 10,776 to 27,798; $100, Nos. 25,936 to 66,646; $500, Nos. 16,180 to 41,378; $1000, Nos. 27,444 to 71,259. Third series—$50, Nos. 1 to 1,200; $100, Nos. 1 to 4,752; $500, Nos. 1 to 3,000; $1,000, Nos. 1 to 5,738. Total, $45 000,000.

Also, registered bonds—$50, Nos. 841 to 1,233; $100, Nos. 5,992 to 8,803; $500 Nos. 2,957, to 5,360; $1,000, Nos. 18,151 to 20,680; $5,000, Nos. 4,103 to 6,402; $15,000, Nos. 4,775 to 7,090; total, $5,000,000. Totals, $50,000,000.

Of amount outstanding, embraced in numbers as above, $45 000,000 are coupon bonds and $5,000,000 are registered bonds. Coupon bonds of the act of February 25, 1862, were issued in four distinct series.

Bonds of first series, all of which have been previously called for redemption, are printed in green tint and have no designation of series upon them.

Bonds of the second series (embracing balance of the series) are printed in yellow tint with blue numbering, and have the words "Second Series" on the bonds and on each coupon.

Bonds of the third series are printed in black with blue numbering, and have the words "Third Series" on the bonds, and "Third" on the bonds or on each coupon, or both.

Bonds of the fourth series are printed in black with red numbering, and have the words "Fourth series" or "Fourth" on them.

United States securities forwarded for redemption should be addressed to the Loan Division, Secretary's office, and all registered bonds should be assigned to the Secretary of the Treasury for redemption.

☞ The Fenelon Falls Railway Company have applied to the Ontario Legislature to have their name changed to that of the Victoria Railway Company; to have power to build branches to Whitby and Oshawa, and to issue bonds to the extent of $12,000 per mile.

Commerce of New York.

The foreign imports at New York for the month of January, 1872 and 1873, are officially stated as follows:

	1872.	1873.
Entered for consumpt'n.	$17,940,512	$17 270,231

Total exports.....	$162,406,580	$192,423,496
Do. exclusive of specie.	138,555,294	150,451,364

Journal of Railroad Law.

RAILROAD COMPANIES—SHIPPER MUST HAVE ACTUAL KNOWLEDGE OF CONDITIONS ATTACHED TO SPECIAL RATES.

The recent case of The Baltimore and Ohio Railroad Company *vs.* Brady, (32 Maryland, 333,) was an action brought by Brady *vs.* the Baltimore and Ohio Railroad Company, to recover damages for the loss and injury to certain cattle, received by the appellant at Brady's Mills to be transported over its road to Baltimore. A number of the cattle were killed on the route and others were injured.

The appellant offered in evidence a printed tariff of special rates, under which it assumed no responsibility for loss, damage, or delay to stock. This tariff contained the condition that the rates therein specified were to be charged only when the owner of the stock, or the party in charge of them, executed to the company a release of all liability for risks or damage to his stock or person. When no such release was executed, the charge would be made at local first class rates of the general tariff. The appellee was charged for the transportation of his cattle under the tariff of special rates, but executed no release.

The following is the opinion of the court delivered by—

BRENT, J.—There is no doubt that a common carrier, by an express contract with his employer, may limit his ordinary responsibilities. Where indemnity from loss is claimed by virtue of such a contract, the burden of proof to establish it is upon the carrier.

In this case, a special contract was attempted to be set up, by showing that the appellee paid for the transportation of his stock at a tariff of charges under which, by the printed table, the company assumed no responsibility for loss, damage or delay of stock. This alone was not sufficient. It was necessary to show that the owner of the cattle had notice or actual knowledge of these terms at the time or before the delivery of the stock by him to the company, to be transported, and that they were assented to on his part. 2 Redfield on Railways 80. This was the only question in the case. It was one of fact for the jury upon all the evidence, and was properly submitted to them.

There was no written contract offered which the court was called upon to construe, and although the appellee may have paid special rates, it does not follow, as a conclusion of law, that he had notice of the terms upon which they were charged or that he assented to the same. The weight of testimony is against any such conclusion. The evidence offered by the company shows that really no contract was entered into by the appellee to limit their responsibility as a common carrier. Where the special rates were accepted, releases were to be given. In this case, no release was given by the owner of the cattle, and according to the company's own terms, a contract was never consummated between the parties. Their own evidence also rebuts the presumption of any contract growing out of the charge of the special rates. The cattle were placed on the cars at Brady's Mills, and charges made for their transportation were fixed at the company's office in Baltimore city, after the accident and loss occurred, upon which this action is founded.

In looking at the whole case, the appellant has nothing to complain of in the instructions and prayers which were granted by the court below. The prayers of the appellee, which were granted, properly state the law of the case. And in the fourth prayer of the appellant the case is most favorably submitted to the jury upon the law, and the whole question of the existence of any special contract left to be passed upon by them on the whole evidence in the case.

Seeing no error in the rulings of the court below, the judgment will be affirmed.

Judgment affirmed.

☞ The Boston and Providence Railroad and the Stoughton branch road were consolidated on the 4th inst., and the initiatory steps were taken towards the purchase by the Boston and Providence, of the Providence, Warren and Bristol road. The Providence and Boston Company will soon have a line of railroad between Fall River and Providence.

☞ The Worcester and Nashua Railroad Company have made a contract with the Portland, Me., rolling mills for 2000 tons of iron rail, to be laid on the Rochester and Nashua line, now under construction.

The Gilbert Elevated Railroad.

The Gilbert Elevated Railroad, the charter for which has passed at Albany, is to include a main line on the eastern side of the city, passing from the Bowling Green eastward through Beaver street to its junction with Pearl street, crossing Wall street at the head of Hanover Square, and thence running through Pearl street to the Bowery, Second avenue and the Harlem river. We are assured that the company have negotiated $5,500,000 of their first mortgage bonds in London, at nearly par, and that the entire capital stock has been taken by prominent capitalists in this city. The contracts for ten miles of the road have been taken by three large iron manufacturing firms, who propose to complete their part of the work during the present year. At present the company feel assured that the iron for the first section of the road, say five miles, will be ready for use during next September, and the remainder of the first ten miles during December of this year. The engineers estimate that the road can be built at the rate of a fifth or a quarter of a mile per day, including the placing of station platforms and stairways. It is proposed to make stations at short intervals in the lower part of the city, on both the east and west sides of Broadway, to accommodate merchants. The first section constructed will be from the corner of West Broadway and Chambers street to the High Bridge and Harlem river. That route will be, when completed, from the Bowling Green, the grand depot, to the junction of West Broadway and Chambers street, thence through West Broadway and South Fifth avenue to Fourth street, where a station will be provided for passengers coming by the crosstown surface road. Thence through Fourth street to Sixth avenue, where another station will be made; up Sixth avenue to Fifty-third street, taking passengers to and from Central Park; through Fifty-third street to Ninth avenue, and then on a long stretch to 110th street. From that point the road will curve back to Eighth avenue, and then follow the high ground to High Bridge. Crossing Harlem River, it will connect by a station with all of the Hudson River Railroad trains.

During 1874 the eastern line will be commenced through Beaver street, passing the Cotton Exchange, Maritime Exchange, office of the *Journal of Commerce*, Importers' and Grocers' Board of Trade, Seamen's Bank for Savings and several principal printing houses along Pearl street and Franklin Square, passing the Harper building to the Bowery, and along that thoroughfare to Houston street. At the last point it branches to Second avenue, and follows that path to and across Harlem River, and along the north shore of the river to High Bridge.

The plan of construction seems to meet with general approval. Iron columns, combining strength with beauty, will rise from firm foundations laid just inside of the curbstones on each side of the street. On the tops of the columns will rest the beams or stretchers, binding the columns and making a floor for the tracks, which will be laid over the middle of the street. The bottom of the tracks will be twenty-five feet above the street surface. Then, from the junction of the floor with the tops of the columns an arch of iron will sweep above the tops of the cars, and on the crown of the arch there is to be a fret work of iron to support the telegraph wires. The arch serves, also, to support the hanging frames or lattice girders of the tracks, averting the dangers of spreading of the rails and of too much lateral vibration. The pillars will be placed fifty feet apart. The plan, if carried out, will not darken the streets or offices on the line; the engines will consume their own smoke, and the cars are to be heated and lighted with gas.—*Journal of Commerce.*

☞ Already more than half the stock in the New Bedford Railroad Company, to which the stockholders of the New Bedford and Taunton Railroad are entitled, has been subscribed.

Labor Saving Machinery.

At the recent meeting of the American Pig Iron Manufacturers' Association, in this city, the President, Mr. A. B. Stone, said:

The smelting of iron ores is one of the most important industries of the nation, second only to agriculture, which is greatly indebted to the iron master for the primary material of the cheap labor-saving agricultural implements that have enabled our farmers to make so many and varied improvements in the cultivation of the soil. Twenty-five years ago the planting of corn was performed by the slow operation of counting a certain number of seeds, which were dropped into the ground from the hand, and when the plant grew up it had to be cultivated by the tedious, back-breaking labor of hoeing. This has all been changed. Corn is now planted by the seed drill, and brought to maturity by the aid of the cultivator. A quarter of a century ago, grain was cut by the hand cradle, and grass by the scythe; now the reaper has replaced the cradle, and the mower the scythe. It is obvious that this progress is due, in a great measure to the iron master, whose persistent labors have cheapened the metals of which labor-saving machines are made, and who has imparted an impulse to agriculture by employing a vast army of workmen in the mining of coal and ores, and the conversion of the latter into metals, thus creating an active, permanent home demand for the products of the soil.

The Union Railroad—The Tunnel Nearly Completed.

The Union Railroad tunnel, 3,410 feet long, 26 feet wide, from facade to facade, beginning at the east side of Bond street and running west, under the bed of Hofman street, to the west side of Greenmount avenue, is upon the verge of completion. There remains to be finished but 200 feet, 100 of which is immediately east of Hartford avenue, and 100 at Eden street, and by the first of May this will be done, thus completing the whole tunnel. The tunnel was begun January 1st, 1871. The greatest depth of cutting was 66 feet; 460 feet were bored—that is excavated by regular tunnelling work; the rest was open cut, with arch built in, and material replaced. The western half of the tunnel is built on rock foundation, which required considerable rock blasting. It is known that the Union Railroad will run from the east portal of the Baltimore and Potomac tunnel, and end at tide-water at Canton, where extensive wharves will be built. It connects with the Philadelphia, Wilmington and Baltimore, Northern Central, Baltimore and Potomac, Western Maryland, and Maryland Central Railroads. By the construction of the Union Railroad freight will be carried by all these roads to tide-water, at Canton, without breaking bulk. The effect of this and other enterprises which must follow, upon the business and activity of the eastern section of the city and the adjacent country, as well as the whole city, will soon begin to be shown as the different parts of the work comprehended in the general scheme arrive at completion.—*Balt. Sun.*

☞ A bill regulating passenger and freight charges by railroads in Indiana has passed both houses of the Legislature of that State. Passenger fares are fixed at three cents a mile; for local freights within distances of twenty miles, not more than 100 per cent in excess of through freight rates shall be charged; within distances of fifty miles, not more than seventy-five per cent, and for greater distances not more than fifty per cent.

☞ The total exports of iron rails from Great Britain for the month of January were 50,233 tons, of which 27,838 tons were to this country, against a total in corresponding month last year of 59,848 tons, when the amount sent to the United States was 85,299 tons.

Notice to Contractors.

ENGINEER'S OFFICE
ATLANTIC AND LAKE ERIE RAILWAY,
New Lexington, Perry County, O.

SEALED PROPOSALS WILL BE RECEIVED at this office until noon of the 12TH DAY OF MARCH, 1873, for the completion of the graduation and masonry of sections 3, 4, 5, 6, 7, 8 and 9 (about nine miles) Mineral Division, south of New Lexington, Perry county. There are two tunnels, of total length 1,330 feet, some heavy rock excavations and other work worthy the attention of experienced contractors.

Profiles and specifications will be ready for inspection on Saturday, the 8th day of March.

ROBERT MACLEOD,
Chief Engineer.

SPENCERIAN
Double Elastic

STEEL PENS.

These celebrated Pens are increasing very rapidly in sale owing to their unexcelled manufacture. They are of superior English make, and are famous for their elasticity, durability, and evenness of point. *For sale everywhere.*

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

Manufactured and for Sale by **WILLIAM & HENRY HAND,**

THE WHARTON

Safety Railroad Switch.

BOTH RAILS of the main track absolutely immovable, continuous and unmutilated.

This Switch provides perfect safety for both the main track and the side track, besides removing all switches from the main track as effectually as if there were no sidings on the whole line.

They have been in use on various important Railroads for over two years, and have repeatedly saved passenger trains from destruction, when running at high speed, (from 30 to 45 miles per hour,) at places where by accident the Switch had been left set for the siding.

Address,

ABRAHAM BARKER, Pres't,
Or WM. WHARTON, Jr., Sup't,
Of the Wharton R. R. Switch Co.
28 South 3d St., Philada., Pa.
O. BOX, 2353, Phila.

YORK CAR WORKS.

ESTABLISHED IN 1852.

Billmeyer & Smalls,

YORK, PENN.

This old established firm continue to build all kinds of Freight Cars to order.

Narrow Gauge Cars

having received their special attention, they are prepared to receive orders and to deliver promptly.

They have furnished the following Roads with Narrow Gauge freight cars, viz: Denver and Rio Grande, Kansas Central, North and South R. R. of Ga., Iowa Eastern, Painesville and Youngstown, Ripley R. R. of Miss., Utah and Northern, Costa Rica R. R., C. A., and others.

Photographs of Narrow Gauge cars sent by mail.

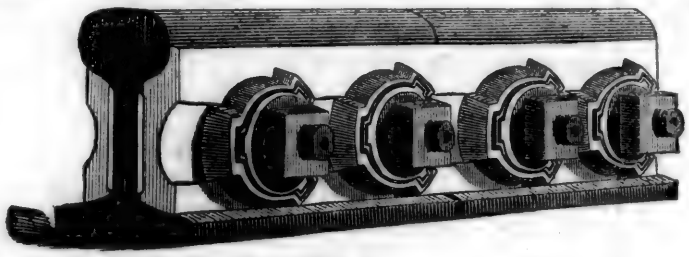
Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

New York, Saturday, March 15, 1873.

Cleveland, Columbus, Cincinnati and Indianapolis Railroad.

At the annual meeting of the stockholders of this company held in Cleveland, Ohio, on the 5th inst., the following directors were elected: P. H. Watson, General George B. McClellan, S. L. M. Barlow, J. J. Cisco, W. B. Duncan, F. Schuchardt, New York; H. E. Parsons, Ashtabula; R. R. Ranney, H. B. Hurlbut, L. M. Hubby, Stillman Witt, T. P. Handy, Cleveland; R. M. Shoemaker, Cincinnati.

The board of directors subsequently elected the following executive officers:—

President, H. B. Hurlbut; Vice President, H. E. Parsons; General Manager, Oscar Townsend; General Superintendent, E. S. Flint; Secretary and Treasurer, George H. Russell; Auditor, Alfred Ely; Chief Engineer, Frank Ford; General Freight Agent, Lucien Hills; General Ticket Agent, S. F. Pierson.

☞ The contract for grading the Anderson, Lebanan and St. Louis Railroad, between Anderson and Waverly, has been awarded to Messrs. Black & McCain of Louisville, Ky., and the work is to be commenced the 1st of May next.

TO INVESTORS.

To those who wish to REINVEST COUPONS or DIVIDENDS, and those who wish to INCREASE THEIR INCOME from means already invested in other less profitable securities, we recommend the Seven-thirty Gold Bonds of the Northern Pacific Railroad Company as well secured and unusually productive.

The bonds are always convertible at Ten per cent. premium (1.10) into the Company's Lands at Market Prices. The rate of interest (seven and three-tenths per cent. gold) is equal now to about 8¼ currency, yielding an income more than one third greater than U. S. 5-20s. Gold Checks for the semi-annual interest on the Registered Bonds are mailed to the postoffice address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS.

JAY COOKE & CO.

New York, Philadelphia and Washington.

Lehigh and Eastern Railway.

A direct railroad connection between Boston and the coal fields of Pennsylvania has long been a subject of discussion with capitalists and railroad men, and one of the prospective advantages of the Boston, Hartford and Erie Railroad was that it was the first step toward such an event. When that work was commenced, Homer Ramsdell, in connection with other capitalists of the Eastern States, New York, and Pennsylvania, obtained a charter from the State of Pennsylvania to construct a road from Hazelton, Luzerne County, Penn., to a point on the Erie Railway, the idea being to connect at Newburg with the Boston, Hartford and Erie. A company was formed under the title of the Lehigh and Eastern Railway Company. The misfortune that subsequently fell upon the Boston, Hartford and Erie Railway, and which, it is expected, will result in a new organization this Spring, put a stop to all further proceedings at the time, a partial survey of the route having been made. The proposed was from route Hazleton to Stroudsburg, near the Delaware Water Gap, a distance of forty miles, and thence up the Delaware Valley to Port Jervis, N. Y., the junction of the Eastern and Delaware divisions of the Erie Railway. The track of the latter completes the route to Newburg. Although this route passes over the Pocono range of mountains in Pennsylvania, the grade is in no place greater than thirty feet to the mile. That portion of it passing up the Delaware Valley, does not exceed ten feet to the mile. The road, when constructed, will bring Boston within twenty-four hours of the coal regions, and open up a rich and as yet isolated section of country. As this would greatly cheapen the price of coal delivered in the East, and facilitate shipments, the attention of capitalists of that section is naturally drawn favorably toward the enterprise.

Besides affording direct communication with the coal fields, the proposed Lehigh and Eastern Railway will complete a grand trunk railway connection between Boston and the West. The Boston, Hartford and Erie extends to Fishkill, on the Hudson, opposite Newburg, connecting with the Erie Railway. Leaving the Erie at Port Jervis, the route, as stated, passes down the Delaware Valley to Stroudsburg, thence to Hazleton, where connection is made with the Danville, Hazleton and Wilkesbarre Railway to Sunbury, thence by Lewistown and Sunbury Railway to Lewistown, Mifflin County, where connection is made with the Pennsylvania Railroad for all points west.

It only remains for the completion of the Boston, Hartford and Erie to be assured to render this enterprise a fixed fact. There is no finer unoccupied field for a railroad in the country than this, and so important is the proposed route considered by the leading railroad companies of Pennsylvania, that strenuous efforts are being made to have a more northerly route adopted from Sunbury to connect with the low grade railway, now nearly completed, and thence, via the Allegheny Valley Railroad to Pittsburg, where it will join the Philadelphia and Erie, for Erie City.

If the low grade should be adopted, reciprocal business arrangements will be made with the Baltimore and Ohio, over their proposed new road to Chicago, or with the Pennsylvania Railroad for the same point, via the Pittsburg, Fort Wayne and Chicago Railway to the same point.

Other important railroad enterprises will be consummated by the completion of the Lehigh and Eastern Railroad. The extension of the Belvidere Railroad from Manunkachunk through the Delaware Water Gap, and the continuation of the Lehigh and Lackawanna Railroad from Bath, Northampton County, through the Wind Gap, both to connect with the Lehigh and Eastern at Stroudsburg, are a part of the programme.

This will make a new and direct route from the East to Philadelphia and Southern points, giving the shortest route between Boston and Washington, D. C., and will open up the inexhaustible and valuable products of the slate quarries of Pennsylvania to eastern markets.

The Hudson River will be crossed at Newburg either by bridge or by iron ferry-boats, carrying trains across without transferring cargoes.

Northern Central Railway.

The annual meeting of the stockholders of this company was held in Baltimore on the 27th ult., for the purpose of receiving the annual report of the president and directors, and to elect a new board for the ensuing year. The meeting was largely attended by capitalists and business men interested, both of Baltimore and Pennsylvania, an unusual interest being excited by the project of a contemplated lease of the Northern Central to the Pennsylvania Railroad Company. On motion of Mr. Samuel M. Shoemaker, of Baltimore, Samuel Small, one of the oldest and largest stockholders, from York, Pa., was called to preside, with Robert S. Hollins, secretary of the company, as secretary of the meeting. After the reading of the minutes of the last meeting by the secretary, J. D. Cameron, Esq., president of the company, read the annual report for the year 1872, as follows:

To the Stockholders of the Northern Central Railway Company:

GENTLEMEN—The Directors submit the following report of the operations of your road for the year ending December 31, 1872, together with the Treasurer's statement of the financial condition of the company, and the detailed report of the General Superintendent. The earnings were as follows:

From transportation of freight		$3,322,144 16
From transportation of passengers		895,164 66
From transportation of express		110,463 33
From transportation of mails		39,682 50
From miscellaneous sources		231,365 54
Total earnings for the year		$4,598,820 19

The operating expenses were:

For conducting transportation	$987,030 49	
For motive power	1,153,213 98	
For maintenance of way	796,795 99	
For maintenance of cars	485,626 21	
For general expenses	74,384 30	
		3,437,050 97
Net revenue		$1,161,769 22

The earnings as compared with the preceding year were as follows:

Increase from freights	$280,817 98
Increase from passengers	55,401 72
Increase from express	7,252 05
Total increase	$343,471 75
Decrease from miscellaneous sources	11,550 41
Increase of earnings over previous yr.	$331,921 34

The expenses of this year exceeded those of the preceding year $467,313 11, showing a decrease of net earnings, as compared with the previous year, of $125,391 77.

The price received for moving one ton of freight one mile in 1871 was 1-67 100 cents, being 6-100 of a cent less than in 1871.

The operating expenses were 74 73-100 per cent of the earnings, being 4 67-100 per cent more than for the previous year.

There has been added during the year $60,000 to the sinking fund, making the total now invested in that fund $927,397 91.

The coal trade of the upper division has increased largely, the tonnage of the Elmira division having increased 19,438 tons over the last year. That of the main line shows but a small increase, owing to the want of facilities for taking care of it after reaching Baltimore. Repeatedly during the year, and particularly since September last, we have been compelled to suspend shipments to this city because of our inability to haul the cars through the streets and to deliver them to the consignees. We have heretofore referred to the importance to this road of the completion of the line to tide-water. That connection, we are gratified to say, will be made within the next three months. Another line of almost, if not altogether, equal importance to our trade, the connection with Washington city, will also be finished at about the same time. From both these connections we know that this company will derive great benefits.

In the last annual report we referred to the unsatisfactory character of the contracts and leases for that portion of our lines between Elmira and Canandaigua, and stated that the entire and permanent control of that portion of the line was essential to the success of the road between Williamsport and Elmira, as well as important to the main line, as it is from that section of the country that we derive a large amount of trade of a profitable kind for Baltimore. During the past year we became the purchasers of almost the entire stock of the Chemung Railroad, and the Elmira, Canandaigua and Jefferson Railroad Companies, comprising sixty-nine miles of road; for which we issued the income bonds of this company, payable in fifty years, with 7 per cent interest for $2,750,000. The result this year of the operation of these roads has been entirely satisfactory, the net profits being almost sufficient to meet the interest on the cost, in addition to what we have secured permanently, a traffic which has heretofore been, and undoubtedly will continue to be, profitable to the company.

The operations of the leased lines for the year have been profitable, with the exception of the Elmira and Williamsport Division, which shows a loss, after paying the rental, of $67,330 59. This loss is not, however, attributable to a lack of trade, but to the condition of the road and motive power, both of which are unsuited to the character of the road and the trade now seeking a market over that line. Heretofore its business was chiefly box car freight, paying a reasonably high rate of freight, and requiring a light rail and light motive power to handle it. But lately the discovery of bituminous coal upon its line, and an increased demand for anthracite coal from the Shamokin region for the north, has augmented the tonnage vastly, and although transported at low rates, can be made profitable if the necessary changes are made in the road and its power. The road should be thoroughly ballasted, a heavy rail substituted for the light rail now in use, and engines capable of hauling sixty cars employed instead of those now on the line, which can only take from twenty-five to thirty. To put the line north of Williamsport in condition to handle the trade now offered at a profit, and to make it self-sustaining, will require an expenditure of not less than one million of dollars. If this amount of money is expedient in thoroughly ballasting the track, substituting a heavier rail, and placing sufficient sidings upon the road and at terminal points, so as to facilitate the movement of cars, we feel confident that it will not only pay the rental but will produce a surplus, in addition to adding largely to the trade of the main line.

For the first time since the management of your property has been placed in the hands of the present Directors and officers of the company they are compelled to give you an unsatisfactory report of the business of the main line of your road. We are glad, however, to be able to say that the diminution of profits was caused partly by circumstances over which we could not have any control. We allude to the horse epidemic, which was particularly severe upon our line—more so, we think, than upon any other road in the country, this being a north and south line. Our trade was interrupted for a period of six weeks (while other lines, differently situated, were interrupted for ten or fourteen days only) and that too at the season of the year when we have always heretofore enjoyed the most profitable trade. This, however, could have been more than made up but for the want of terminal facilities. After the cause to which we refer had been removed, there came a pressure of trade upon us that we were perfectly able to take care of at all points, being fully provided with equipment, except that we lacked the ability to provide for it when it reached this city, and consequently we were placed in the anomalous position of losing money from an excess of business. The lack of storehouses compelled us for months to lose more money in shifting loaded cars from point to point, and in providing for the freight after it reached Baltimore than the profit amounted to for bringing it here.

This has not been an entirely new experience to us; but the trade was so much heavier during the past year than it had ever been that we were unable, with the means at our disposal to handle it with profit. We have now reached the point in the history of this road when the question of a sufficient amount of trade has ceased to be debatable. The only question for the stockholders now to determine is how to raise the money to provide means for handling it efficiently and economically at the city of Baltimore. To do this it will require in our judgment, the immediate expenditure of $2,000,000. The heaviest items of this will be for the erection of a first-class elevator, the building of wharves, warehouses, and coal tressels, with sufficient side tracks and sidings at Canton: additional coal tressels at various points in the city which can be reached by steam, and thus avoid the dragging of cars through the city by horse power at a large expense, and the building of additional warehouses near the present depot to enable us to discharge freight immediately on its arrival, and by doing so relieve the cars from doing duty as storehouses, and thus increasing the equipment by keeping the cars more constantly in motion.

Feeling the absolute necessity of making the large expenditure just referred to, and knowing that it could be done only by an increase of the common stock of the company, which must be done by its sale at par, (or by a large issue of preferred stock at a high rate of interest—which we do not deem it advisable to recommend,) and knowing from the price of the stock in the market that such a course is impracticable, we have had it in contemplation to approach the officers of the Pennsylvania Railroad—which corporation, as you are doubtless aware, owns a majority of the stock of this company—with reference to a permanent lease of this road, based upon the payment of a fixed per centage on the stock of the company and the assumption of the payment of the interest and the principal of the debt as it matures. We therefore appointed a committee to meet the authorities of the Pennsylvania Railroad Company, and that committee has had an informal meeting. Nothing definite has been agreed upon, nor has any effort been made to bring about any agreement; the object being merely to consult with that company so as to be able to bring the subject to your attention at this meeting, and to get from you such instructions as you may be pleased to give in reference to the matter.

The position of this road is such, both as to the main line and leased roads, that we are in a measure, if not wholly, dependent on the favorable co-operation of the Pennsylvania Railroad Company for the greater part of the business we enjoy. We fully appreciate our importance to the Pennsylvania Railroad for it is evident that the outlet which we give them from Baltimore is of great value to that road. But without a perfect understanding as to the interchange of business, we should be the first sufferers. Therefore, in our judgment, under all the circumstances attending our present position, we do most earnestly recommend to the stockholders the propriety of permitting this road to be leased to, or absorbed by the Pennsylvania Railroad Company, if it can be done on a fair and equitable basis. And, with that object in view, respectfully submit the following resolutions for your consideration and adoption, if they meet your approval:

Resolved, That a committee be appointed to negotiate with the Pennsylvania Railroad Com-

pany for the permanent lease of the Northern Central Railway and its branch roads to that company, the same to be based on an annual rental on its capital stock and the payment of the interest on all of its obligations growing out of such leases and indebtedness of every description, and the payment of the same as it matures; or in lieu thereof, an interchange of stock so as to merge this company into the Pennsylvania Rail road Company upon an equitable basis; any agreement to be subject to the confirmation of the stockholders at an adjourned meeting, to be called on ten days' public notice.

Resolved, That when we adjourn, we adjourn to meet at the call of the foregoing committee.

By order of the board of directors.

J. D. CAMERON, President.

On motion of Mr. Newcomer the report of the directors was accepted.

The resolution attached to the report, providing for the appointment of a committee to open negotiations with the Pennsylvania Railroad Company, and to report the result to a future meeting, was adopted, the agreement being that twenty days' notice should be given stockholders before being called on to vote.

The following gentlemen were then elected directors for the ensuing year: J. D. Cameron, Wm. Calder, A. E. Kapp, E. A. Biddle. J. M. Kennedy, B. F. Newcomer, Henry Welsh, J. P. Jones, Wistar Morris, S. M. Shoemaker, Strickland Kneass, and Geo. Small.

The new board organized after the stockholders' meeting had adjourned and the following officers elected: President, J. D. Cameron; vice-president, J. N. Du Barry; secretary, Robert S. Hollins; treasurer, John S. Leib; auditor, Stephen Little. Thomas A. Scott was substituted as a director in place of J. D. Cameron, elected president. The meeting then adjourned.

Union Pacific Railroad.

At the annual meeting of the stockholders of this company in Boston on the 5th inst., the following gentlemen were elected directors for the ensuing year:

Horace F. Clark, of New York; John Duff, of Boston; Augustus Schell, of New York; Oakes Ames, of Easton; Oliver Ames, of Easton; Sidney Dillon, of Council Bluffs; C. S. Bushnell, of New York; Elisha Atkins, of Boston; Royal E. Robbins, of Waltham; F. Gordon Dexter, of Boston; E. H. Baker of Boston; Joseph Richardson, of New York; George S. Bowdoin, of New York; Frederick Nickerson, of Boston, and O. S. Chapman, of Canton, Mass.

At a meeting of the directors on the 6th inst., the following officers were chosen:

President—Horace F. Clark.

Vice President—John Duff.

Secretary and Treasurer—E. H. Rollins.

Executive Committee—Horace F. Clark, John Duff, Augustus Schell, Sidney Dillon, Oakes Ames, Royal F. Robbins; Government Director—James F. Wilson.

Finance Committee—Oliver Ames, Augustus Schell, F. Gordon Dexter, George S. Bowdoin, Joseph Richardson, Elisha Atkins; Government Director, J. S. C. Harrison.

Land Grants—John Duff, Oakes Ames, F. Gordon Dexter, E. H. Baker, C. S. Bushnell, Frederick Nickerson; Government Director—Hiram Price.

Bridge over Missouri River—C. S. Bushnell, O. S. Chapman, John Duff, Sidney Dillon; Government Director—D. S. Ruddock.

Connecting Roads—Horace F. Clark, C. S. Bushnell, Oliver Ames, J. N. Millard.

The directors, after the transaction of business, adjourned to meet in Boston on the first Wednesday in June next. The next annual meeting of the stockholders will be held in Boston on the Wednesday next succeeding the 4th of March 1874.

Quincy Mining Company.

At the annual meeting of this company, held in Boston on the 5th inst., the following gentlemen were elected directors for the ensuing year: Horatio Bigelow, J. Pritchard, R. M. Clark, Cyrus Arnold, and A. J. Corey of Michigan. At a subsequent meeting of the directors Horatio Bigelow was chosen president, and William Rogers Todd secretary and treasurer. The annual report was submitted, from which we make the following extracts:

The shipment of the season was 2,795,949 pounds of mineral, which has been smelted at Detroit and on Portage Lake, and yielded 81 12-100 per cent, or 2,269,134 pounds of ingot copper.

The product of the mine for the year, as prepared for shipment, was 2,804,954 pounds, or 1,402 954-2000 tons of mineral, of the following descriptions, namely:

Stamp copper	2,602,245 lbs.	
Mass "	202,709 "	
	2,804,954 lbs.	
For which, estimating only the product of Dec., left over at the mine, at 27 cents per lb., has been realized the gross sum of		$724,561 16
Realized from sales of silver		535 56
Making gross earnings		$725,096 72
The expenses of the year are:		
Running expenses at mine	$393,920 18	
Building and construction account	67,227 65	
Other expenses	60,959 17	
		522,107 00
Which, deducted from gross earnings, leaves as profits		$202,989 72
There has been realized during the year, from interest on loans	10,422 69	
Sales of lot, town of Hancock	131 26	
Giving as net results of year's business		$213,543 67
The statement of assets and liabilities in our last report showed a balance of assets on hand, as of date January 1, 1872, of		$397,741 61
Add endowment, &c., not included	103,818 46	
Earnings of 1872	213,543 67	
		$715,103 74
Deduct—		
Dividend of Feb. 15, 1872	$200,000	
" August 1, 1872	150,000	
		350,000 00
Making balance of assets on Jan. 1, 1873		$365,103 74

Since the office of the company has been removed to Boston, dividends to the amount of $250,000 have been paid; these exceed the earnings of the past year $36,456 53. But after paying dividends, the company has a reserve over all liabilities of $151,821 75, which, with copper and surplus at the mine, makes a total surplus of $365,103 74.

This is a very satisfactory exhibit, especially as $67,227 18 have been expended for permanent improvements, and there has been a large increase in the cost of production.

CHARLES M. HIBBARD, Actuary.

☞ The annual meeting of the Kingston and Pembroke Railway Company was held in Kingston, Ca., on the 12th of February. The directors' report was adopted, as well as the auditor's report. Over $73,000 has already been expended on the road. 30 miles are to be completed this year; 34 more in 1874; 32 more in 1875, and the balance in 1876. It was reported that the Bedford mines are being largely worked and will be a large feeder to the road. The following directors were elected:—Messrs. C. F. Gildersten, J. Fraser, Wm. Murray, J. O'Reilly, D. D. Calvin, M. Doran, S. Shibley, Hon. A. Campbell, and John Breden. Mr. Gilderstein, at general request, consented to act another year as president.

Naugatuck Railroad.

The receipts, expenses, etc., of this road for the nine months ending September 30, 1872, are as follows:

Receipts:

From transportation of freight		$231,846 15

President.—E. F. BISHOP, Bridgeport, Conn.

Directors.—W. D. Bishop, R. Tomlinson, E F. Bishop, Bridgeport, Conn.; Green Kendrick, Waterbury; A. L. Dennis, Newark, N. J.; N. A. Baldwin, Milford, Ct.; J. B. Robertson, New Haven, Ct.; J. G. Wetmore, Winsted, Ct.; R. M. Bassett, Derby, Ct.

Secretary and Treasurer.—HORACE NICHOLS, Bridgeport, Conn.

Superintendent.—GEO. W. BEACH, Waterbury, Conn.

Marietta and Cincinnati Railroad.

At the annual meeting of the stockholders of this company in Cincinnati on the 19th ult., the President, Mr. John King, Jr., presented the twelfth annual report which shows that the ratio of working expenses is 79¼ per cent, a decrease as compared with 1871 of 7¼ per cent. The net earnings, being $410,451, have increased $200,396 as compared with the year ending December 31, 1871. The total earnings for 1871 were $1,690,976; for 1872, $2,029,164—increase $338,196. The local freight increase was $58,996; through freight increase $215,795; through passenger increase $28,112; local passenger decrease $17,410, showing that there is a marked increase in every description of traffic except local passengers.

The local passenger tariff was reduced in June, 1872, to a basis of about 3½ cents per mile for distances of thirty miles, with reductions in still greater proportion for shorter distances. Liberal arrangements were also extended to political and other conventions, and to the Cincinnati exposition, and by commutation tickets for 1,000 miles of travel. The result has been to increase largely the number of passengers, whilst the revenue has been less. It is believed, however, that the wisdom of this liberal policy will be demonstrated, and a largely increased revenue developed in 1873 and in future years from this valuable branch of business. As the mileage of passenger trains in 1872 increased—in comparison with 1871—only about 3 per cent, it may be assumed that very little additional expense was incurred by the increased number of passengers transported.

During the year 35,328 through passengers were carried, being an increase of 10,497 as compared with 1871, of 19,921 as compared with 1870, of 26,471 as compared with 1869, and of 28,598 as compared with 1868; the number for 1872 being more than five times that of 1868. Few railroads can show, in this respect, a more regular or satisfactory growth. No personal injury was received by any passenger upon the road during the year.

An increase in through freight has marked the interchange of business with all the lines with which this company connects. The White Continental Line, of 1,207 freight cars, furnished in about equal proportions, according to mileage, by the Ohio and Mississippi, Illinois and Southeastern, Marietta and Cincinnati, and Baltimore and Ohio roads, and covering the territory between St. Louis and Springfield, Illinois, and the Atlantic cities, has been very successful, and the necessity has been demonstrated for additional equipment to accommodate the large amount of business offering.

The Red Continental Line, composed of 832 cars, and covering the route between Baltimore and Burlington, Iowa, via Cincinnati, Indianapolis and Peoria, was inaugurated in the Spring of 1872, and as it is now evident that the line can be increased to advantage, arrangements have been perfected by the Baltimore and Ohio, Marietta and Cincinnati, Indianapolis, Cincinnati and Lafayette, Indianapolis, Bloomington and Western, Chicago, Burlington and Quincy and Cincinnati, Lafayette and Chicago roads, to double the number during 1873.

The cars composing the White and Red Continental lines are furnished by the roads in interest, and the gross earnings received by them, without drawbacks, such as are frequently allowed by railroad companies to fast freight lines.

The improved facilities provided at Baltimore by a first-class elevator, to which another of 1,000,000 bushels capacity will be added next year by the Baltimore and Ohio Railroad Company, has created in that city a great market for cereals, which will grow in magnitude and importance as the means of transportation are increased.

The following statement is presented, in order to furnish particulars of the revenue and working expenses in comparison with the two preceding years:

	1870.	1871.	1872.
Earnings	$1,420,345 55	$1,690,967 66	$2,029,164 65
Expenses	1,342,156 27	1,480,912 80	1,618,713 06
Earnings more than expenses	$78,189 28	$210,054 86	$410,451 59
Working expenses	94½ per ct.	87½ per ct.	79¾ per ct.

In addition to ordinary expenses, a large outlay has been made during the year for construction, reconstruction and extraordinary renewals. The work of arching all of Herrold's Moonsville, and Number One tunnels, and such portions of Vanderwurker's as required it, was commenced, and prosecuted with vigor during the year, and all are now in a safe condition, but as the work progressed it was developed that if longer postponed the road would have been closed for through business, perhaps for a month or six weeks, and an immense loss of revenue and reputation for regular and rapid transportation been incurred, after all which it would have been necessary to have undertaken the work which has been completed.

The report then goes into details of expenditures of the year for ballasting, cross-ties, regrading and other construction and repairs. Some 3,830 tons of new rails, equivalent to forty miles of new track, were laid.

In addition to the subscription of $142,900 to the stock of the Cincinnati and Baltimore road during 1872, there have been advanced to this date $230,741 09 in cash; and in the stock of the Baltimore and Short Line Railroad $50,000 have been invested and $37,495 59 advanced in cash.

CINCINNATI AND BALTIMORE RAILROAD.

This line was completed on the first day of June, 1872, as a single-track road. In consequenc of the largely increased business of the Marietta and Cincinnati road and the traffic of the Cincinnati and Springfield road, it was determined, as indicated in the report for 1871, to commence at once a double track, and the capital stock was increased to $800,000. This work has progressed satisfactorily, and the double track will be completed in July, 1873, when the rent of the Cincinnati and Springfield Company will be increased to $40,000 per annum. Of the Cincinnati and Baltimore Company's bonds, $314,000 have been sold, leaving $186,000 to be disposed of; but the Marietta and Cincinnati Company has advanced, in addition to its subscriptions of $396,300, cash amounting to $280,741 09, which will be repaid by the Cincinnati and Baltimore Company as the bonds and stocks are sold.

FINANCES.

Four hundred and sixty thousand dollars of third mortgage bonds were sold during the year, a considerable amount of real estate belonging to the company has been disposed of, but property, valued at nearly $200,000, not needed for railroad purposes, is still in the hands of the company the

sale of which will aid in reduction of the liabilities of the company.

BALTIMORE SHORT LINE.

The survey of this road having been completed and the line located, contracts were made in September, 1872, and the work has been vigorously pressed. The Marietta and Cincinnati Company, in addition to $50,000 subscription to the stock, has advanced the Baltimore Short Line in cash $37,495 59. It is expected that this road will be finished early in 1874, thus lessening the distance between Cincinnati and Parkersburg more than 10 miles, and perfecting the line.

It is proper at this time to exhibit the condition of the company when the present administration took charge, in February, 1868, and a brief statement of its affairs since that date in the following

REVIEW.

In February, 1868, them aterial state of the road caused the greatest alarm. For years its operations had been conducted upon the policy of meeting the most important requirements by temporary and insufficient expedients, and the road was in a most dilapidated condition generally.

The finances of the company were in a deplorable state. The gross receipts were about twelve hundred thousand dollars per annum, all of which, under any fair system of accounts, were chargeable to working expenses, and no funds were in hand or could be earned for the interest on the mortgage bonds and floating debt, for increased equipment, or for the necessary construction. The second mortgage bonds had nearly all been sold, and the remainder were held at fifty per cent. The company was paying extravagrant rates for the small sums it was able to borrow, and its credit was almost destroyed.

In addition to these embarrassments the road was not completed into Cincinnati, and at the expiration of the contract with the Hamilton and Dayton Company, in February, 1871, the Marietta and Cincinnati Company would have been placed at the mercy of another and to some extent a rival corporation.

The building of the Cincinnati and Baltimore road, therefore, was a necessity, requiring very large advances, which the Marietta and Cincinnati Company would be obliged to incur until the securities of the Cincinnati and Baltimore Company could become known and be advantageously placed upon the market. A crisis in the company's affairs had been reached. Trains could have been run only a few months longer, and the question was simply should the interest on the bonded debt be in default, the property of the re-organized company sold, and the interest of the stockholders finally sacrificed, or should a vigorous effort be made to avert utter ruin? It required great faith in ultimate results to encounter, in a state of affairs so discouraging, the enormous outlay which the new management foresaw would be demanded in placing the road in a position to accommodate the wants of the community and to meet the interest on the bonded and floating debt. Fortunately its confidence was shared by the Baltimore and Ohio Company, which advanced liberally, from time to time, as required, its means and credit to the Marietta and Cincinnati road, without which it would have been impossible to continue to operate the line.

The liberal policy adopted in the spring of 1868 has been continued nearly five years, as shown by the following statement, embracing the principal items of extraordinary expenses and construction during that period. There were constructed nine iron bridges costing $175,042, seventeen miles of new side track costing $164,690, and there were expended for ballasting $199,894, for widening cuts, new embankments and retaining walls $171,460, for reducing Maderia grade $31,409, in arching Pilcher Vanderwurker and Moonville tunnels $187,749, and there were also constructed ten station houses, twenty-one water stations, sixty miles of new fencing, three coal stations, and two machine shops, the Mineral and Ferris branches were completed, and heavy expenditures were made for depot grounds, right of way, new telegraph line, and improved stationary machinery. For increased equipment, consisting of thirty-one locomotives, fourteen passenger cars, and one thousand and five freight cars, $1,072,282 were expended.

There were invested in the Cincinnati and Baltimore Company $400,000 for capital stock and $230,741 09 cash advanced, and in the stock of the Baltimore Short Line Company $50,000 were invested and $37,495 59 advanced in cash. About 674,000 new cross-ties and 20,928 tons of new and re rolled rails, more than sufficient to relay the entire line from Parkersburg to Cincinnati, were placed in the main track and branches, and charged to repairs.

A third mortgage for $3,000,000 was placed upon the property in 1870, the bonds realizing from 70 to 80 per cent, an average rate far above that obtained for those of the second mortgage.

The gross earnings steadily increased after 1868, but it was not until 1871 and 1872, when the increase attained the ratio of twenty per cent annually, the augmented revenue began to yield a return commensurate with the heavy outlay for construction and extraordinary expenses, which, while made at the very lowest cash rates for labor and material, have so largely enhanced the intrinsic worth of the property.

As was to be expected a very large floating debt has been incurred, now amounting, after deducting the available means on hand, including the stock and debt of the Cincinnati and Baltimore, and Baltimore Short Line Companies, to about two and a quarter millions, which it is proposed to fund by a fourth mortgage for four millions of dollars, using the surplus as may be required for additional equipment, reducing grades, straightening the line, side tracks, subscriptions to the Baltimore Short Line, building an iron bridge over the Scioto river, near Chillicothe, &c. The propriety and necessity of this action, in the judgment of the board, cannot be doubted.

The market value of such securities does not depend entirely upon the worth of the mortgaged property, in this case far exceeding the debt, but to a great degree upon its ability to earn interest. With the condition of the road so materially improved—with the valuable alliances which this improvement has enabled the company to form—the Cincinnati and Baltimore road completed with a double track—the plant so largely increased—the gross earnings, $2,400,000, which would be the amount for 1873, with the ratio of twenty per cent increase over 1872, maintained, as in 1872 and 1871 over the years preceding them, respectively—(and it is reasonable to anticipate as encouraging a result)—it is believed it will now be practicable for the company annually to earn sufficient to pay the interest on the entire mortgage debt. Should the earnings continue to increase, it is hoped in a few years the stock itself may be remunerative.

Equipment and Rolling Stock Company.

The annual meetings of the Equipment and Rolling Stock Companies took place to-day at the office of Sir Hugh Allen. On the Equipment Company there will be a dividend payable on paid up stock on the 30th April, at the rate of ten per cent per annum. On the Rolling Stock it was determined to reduce the dividend hitherto payable from ten to nine per cent. This change was made in anticipation of the possible action of the Grand Trunk Company, who, if they carry out the programme announced by the president at the last meeting, will purchase the cars leased by this company, at the earliest day allowed by the contract, and so shorten the time during which the sinking fund of the company will accumulate. In that case it appeared that the present sinking fund would be hardly sufficient to keep the capital intact, and one per cent is therefore to be deducted from dividends for that purpose. Should the purpose announced by the President of the Grand Trunk not be carried out for a year or two after the earliest possible date, the increased sinking fund will form a rest. Sir Hugh Allan was again elected president of both companies, with the same board of directors as those of last year.—*Montreal Herald Feb, 5.*

YOUR ONLY CHANCE

Secure Your Tickets Immediately to

THE

THIRD GRAND

GIFT CONCERT

Which will be given under authority of a special act of the Legislature at Library Hall, Louisville, Ky., positively on

Tuesday, April 8th, 1873,

the profits of which are for the benefit of the

PUBLIC LIBRARY OF KY.

The best musical talent that can be obtained will contribute to the pleasure of the entertainment, and to provide funds for the magnificent gifts **one hundred thousand whole tickets of admission only,** at $10 each, will be issued, and **ten thousand cash gifts,** amounting to

HALF A MILLION DOLLARS

Currency, will be distributed by lot to ticket-holders as follows:

One Grand Cash Gift		$100,000
One Grand Cash Gift		50,000
One Grand Cash Gift		25,000
One Grand Cash Gift		20,000
One Grand Cash Gift		10,000
One Grand Cash Gift		5,000
24 Cash Gifts of	$1,000 each	24,000
50 Cash Gifts of	500 "	25,000
80 Cash Gifts of	400 "	32,000
100 Cash Gifts of	300 "	30,000
150 Cash Gifts of	200 "	30,000
590 Cash Gifts of	100 "	59,000
9,000 Cash Gifts of	10 "	90,000
Total, 10,000 Gifts, all Cash		$500,000

Tickets, $10; Halves, $5; Quarters, $2.50.

Hon. Ex-Gov. Thomas E. Bramlette, of Ky., has charge of the business of the Concert, and he will give personal attention to all the details. Besides the original act authorizing the Concert for benefit of the Library, the Legislature of the State have twice passed votes of confidence in the management and approval of the expenditures of funds by the Trustees. Buyers are notified that all preparations are positive and complete for the Concert promptly on the day set, and orders must be sent in without delay. Lists of the drawing will be ready the next morning. Tickets, like greenbacks, are good to the holder, and buyers need not, therefore, be known, unless they so choose.

At the last Concert ticket No. **6,450** drew the capital gift of **$75,000,** which was paid the third day after the drawing, precisely as announced. The ticket was held by the following club of gentlemen, at **Columbus, Ind.,** viz.: T. C. Burgess, Wm. D. Summers, W. H. Webb, Albert Jones, Gideon Shultz, C. C. Crawford, Chas. McCalla, J. Frank Pancake, Lloyd Mortledge, Henry A. Rothrock. The money was paid to the Second National Bank of Louisville for account of First National Bank of Columbus, Ind., and by the latter Bank paid to the various gentlemen named above.

The Trustees also refer with pleasure to all who have drawn gifts in the first two Concerts as to the satisfactory manner in which they received the money without any discounts whatever having been deducted. Orders may be sent by mail, by P. O. order, draft, or registered letter, or by Express prepaid. All orders and enquiries must be made to the New York office.

THOS. H. HAYS & CO.,

General Depot of Supply,

609 Broadway, N. Y.

☞ The Northwestern (*N. C.*) Railroad has been completed to Keinersville, 18 miles west of Greensboro, and regular passenger and freight trains commenced running over the road on the 3d inst. This road opens up a magnificent mineral region, and is destined to be a valuable feeder to the system of roads comprising the Piedmont Air-line railway.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, March 15, 1873.

Stock Exchange and Money Market.

Though active all through the week, and extremely high as to price up nearly to the close, Money has been, as a whole, working some what less unfavorably for the borrowing interests, especially through the later half of the week. The offerings were increasing, and gaining perceptibly on the more urgent requirements of operators at the Stock Board. Yet, the market continues close and feverish, and in addition to the legal rate of 7 per cent in currency or coin, a commission of $\frac{1}{32}$@$\frac{1}{16}$@⅛ is exacted from the more ready dealers, to enable them to make up their bank accounts, in due season, each afternoon. The very extensive amounts of bonds and stocks, especially of the latter, which the brokers are carrying, with a view to higher prices, absorb unusually large sums of Money, testing to the utmost the ability of the banks and the disposition of private lenders to afford the necessary, and making the movement anything but comfortable or convenent. The mercantile call for help has been rather more pressing, yet the discount business has been comparatively slow, and the best grades of commercial paper have been rated at from 9@12 per cent per annum. The stringency in the discount line has been seriously felt in trade circles, checking the revival of the usual Spring demand for produce and merchandise. The demoralization in the foreign exchanges has been against the export movement in produce. Our produce shipments would profit, temporarily at least, by the higher price of Gold, if the Gold speculation had not demoralized the Exchanges and rendered it difficult to negotiate mercantile or banking bills on corresponding terms. The city banks, last week, lost about 1¼ millions of their legal tender reserve, ¾ths of a million to their specie average. Their deposits were further cut down about 2½ millions, and their loan and discount averages reduced nearly a million. The banks continue below their reserve, the last statement showing that they lacked $204,875 of the 25 per cent reserve which the national banks are required by law to keep on hand. It appears, however the deficiency in this respect is altogether with the State banks, which are not obliged to maintain the 25 per cent average of legal tender, and consequently have been more liberal of accommodation to their customers, during the Money pressure. The U. S. Sub-Treasury, last week, made an addition of nearly a half a million to its coin balance while losing 1⅜ millions of currency. Its currency reserves at the close of the week were $21,021,004; and its coin board, $37,344,131

The city banks, in their latest return, show a falling off of $1,251,000 of legal tender notes, with an increase of $779,100 of specie, and a reduction of $2,557,400 in their deposits, also a contraction of $993,600 in their loan and discount averages, and an addition of $199,900 to their item of circulation. The city bank exchanges, last week, averaged 139 millions.

The clearances of the banks averaged through the week 139 millions a day, and amounted in the aggregate, for the whole week, to $833,306,705 as against $818,260,203 the preceding week. The U. S. Sub-Treasury at this point reduced its currency balance $1,368,156 and enlarged its coin reserve $417,201 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $17,149,600, against $19,186,200 same time last year. The city bank deposits are now $199,508,700 against $210,393,000, week ending March 9, 1872. The legal tender reserve amounts to $39,475,000, against $44,560,900 same time last year. The circulation now stands at $27,801,200 against $28,122,000 same time last year. The loans are now $280,351,300 against $281,342,400 at this date last year.

The cash balances in the Treasury on Wednesday were as follows: Currency, $3,137,435; coin, including $24,133,500 in coin certificates, $64,955,537; special deposit of legal tenders for the redemption of certificates of deposit, $28,345,000.

There has been considerable talk about a reissue of greenbacks, to the amount of about ten millions, but nothing reliable has been elicited.

Government revenues have been rather more satisfactory in the way of excises, since our last The excises yielded within the week about 2½ millions, and thus far in the current fiscal year beginning with July 1, 1872, $80,358,582 millions. The customs at the port of New York, for the week, were $2,413,265, and at the outports, about $850,000 more, in coin or coin certificates.

The coin reserve of the city banks is now about 17⅛ millions as against about 25¾ million on the 20th of last July; the legal tender reserve is under 39¼ millions against about 55⅛ millions on the statement of June 15th; and the deposits are now about 199½ millions, against 47½ millions on the 20th of July.

The U. S. Sub-Treasury office last week received $3 499,589 of currency, and $1,077,933 of gold, the latter including $2,649 000 from customs; and disbursed $4,867,975 of currency and $3,660,733 of gold, the latter embracing $767,459 of coin interest.

The Gold speculation has been quite firm through the week, the operators for higher figures showing decided confidence, in anticipation the Money market, and the foreign exchanges working in favor of their interests, through the Spring. Apprehension has been felt that there can be little or no relief from the City Bank movement before the middle of April, and to this is added a dread on the part of the Stock Exchange and Railroad people, that the operation of borrowing sixty-day credits on London has been carried about as far as prudence, (on the part of the Bankers issuing their credits) will allow, and that even the renewal of existing engagements may be rendered difficult, unless improvement should be felt in the Exchange market. The export drain of specie, last week, was on an enlarged scale, and the customs call was up to a fair average. The later dealings showed rather less buoyancy in the general movement. The range of the price during the week has been from 114⅝@115¾ and the closing quotation on Wednesday was 115⅛ against 115⅛ on Wednesday of the preceding week. The specie outflow last week, was $904,288. The Gold Exchange Bank clearances have averaged about 75¼ millions per day during the week.

The specie exports on Wednesday embraced $248,118, all silver.

Under the Treasury programme for March, Government proposes to sell Gold as follows: Thursday March 20, $1,500,000; Thursday, March 27, $1,500,000. And to buy in Five-Twenties, as follows: Wednesday, March 19, $1,000,000; Wednesday, March 26, $500,000.

The customs demand for Gold last week, averaged $441 500 a day. The arrivals of specie from Europe, Havana and other foreign ports thus far in 1873 have been $194,719 against $274,604 in 1872. The total customs revenue of the Government, in coin, at this port since July 1, has been $94,745,933 against $110,010 286 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $60,124,239, against $61,455,934 during the same time in 1871-2.

The export drain of specie was $904,288 last week, against $396,763 same week preceding year. The shipments since July 1, 1872, have been $47,230,840 against $25,563,414 during the same portion of 1871.

Foreign Exchange was much depressed early in the week, by the very free offerings of prime bills, which were largely in excess of the more urgent requirements of buyers. Toward the close

there was a parital improvement in the demand, which led to a steadier range of price. Bankers' sixty day bills on London closed at 107⅞@108; sight bills on London, at 108¾@109. The week's exports of Domestic Produce have been to the currency value of $5,398,314.

Government securities have been offered quite moderately, but have been in less active request, and rather easier as to values, notwithstanding the firmness in Gold.

Government bought in on Wednesday $500,000 Five Twenties, at from 113 39@113 46 net out of an aggregate offering of $2,342,100.

U. S. sixes of 1881 closed on Wednesday of this week at 118½@118⅝ U. S. Five-Twenties of 1862, 115½@116; U. S. Five-Twenties of 1864 at 115⅝@116; U. S. Five-Twenties of 1865, 116½ @116¾, U. S. Five-Twenties of 1865 consolidated, 114⅝@114⅞; U. S. Five-Twenties of 1867, 116½ @116⅝; U. S. Five-Twenties of 1868, 116⅛@ 116⅜; U. S. Ten-forties at 110¾@111; U. S. Fives of 1881 (Funding Loan) 115⅝@113⅞; Six per cent. currency Sixes from 118¾@114.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	Feb. 26.	March 5.	March 12.
Consols	92½	92¾	92⅝
U. S. 5-20s, 1855....	93⅛	93¾	93⅝
" 1867	93½	93¾	93¾
" 10-40s	89½	89¼	89
New Fives of 1881...	90½	90⅝	90⅜
Erie	51½	52⅜	52⅝

State bonds have been quoted more variable, on a restricted business; offerings generally more liberal.

There has been a fair investment demand noted for the Railway Mortgages which have been generally quite firm, with very small offerings reported of the favorites of the older loans. Central Pacific Sixes have been selling as offered at steady prices closing at from 103¾@104. Chesapeake and Ohio Sixes have been in fair request at 87½ and interest. Western Pacific Sixes have been more inquired for at 94¾@95. The Northern Pacific 7-30 Loan have been selling to a fair extent at par and interest.

Railway and Miscellaneous share property has shown more animation, on a generally buoyant though rather sensitive market. The later dealings indicated considerably irregularity in values, with more or less of hesitancy in the speculative demand.

The movements in the Metal line have been on a moderate scale. Copper has been steady, but less active; sales, 100,000 lbs. Ingot at 34¾c.@ 35c., and 50 tons English at 30c. Iron has been generally slow of sale, on, however, a firm basis as to values; sales, 200 tons Scotch Pig, in lots, including Glengarnock at $58, Eglinton at $56, Gartsherrie at $60, and Coltness at $62 50@$65; 500 tons No. 2 American Pig, on private terms, quoted at $45@$48, and No. 1 at $49@$50; new American Rails at $80@$83; Old Rails at $57@ $58; new English at $70, gold; Wrought Scraps at $57 50@$60. Lead dull, with ordinary foreign quoted at $6 50, gold, per 100 lbs. Spelter quiet at 7¾c., gold, for Silesian. Pig-tin firm, but inactive, at 32c.@32¼c. gold, for Straits, and 31¾c. 32c., gold, for English. Tin Plates steady in price on a comparatively good demand; sales, 1,500 boxes Charcoal at $12; 500 boxes Charcoal Terne at $10 75; 1,000 boxes Coke at $10 50, gold per box. Charcoal Plates quoted here at $11 87½@12 25; Charcoal Terne, $10 50@$11; Coke, $10 25@$10 75, and Coke Terne, $8 75@$9 75 gold, per box. Nothing new in Zinc.

General business has been devoid of notable activity. Breadstuffs, Provisions, Petroleum, and Naval Stores have been in less request, and variable as to prices. Middling upland cotton, closed heavily on Wednesday at 20⅜@21⅛ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,829,644 bales, against 2,818,175 bales same time in the preceding year; exports 1,699,486 bales against 1,366,303 bales in the previous year; stock at the ports at latest dates, 356,500 bales against 505,202 bales same date 1871.

Foreign goods have been comparatively tame, on the basis of about previous quotations in the leading instances. The week's imports amounted to $9,404,893, including $4,083,514 of dry goods.

Ocean freights have been moderately active, since our last. Vessels have been in rather better supply, and have been in fair request, chiefly for the Petroleum, Cotton, Grain, and Lumber trades. Rates have been comparatively well supported.

At the Live Stock Markets, Beeves have been in reduced supply and request at from 8@14¼ cts.; Veals in moderate demand at 7¼@12 cts.; Sheep at from 4@7½ cts.; Swine at 5½@5⅞ cts. per lb., all live weight. The week's receipts were 6,445 Beeves, 1,100 Veal Calves, 16,621 Sheep and and Lambs, and 35,427 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

Chesapeake & Ohio Road and Connections.

The newly opened Chesapeake and Ohio Railroad line, connecting the navigation of the Atlantic with that of the Ohio River, is now in successful through operation. Freights are continually passing from Cincinnati to Richmond destined for the Southern seaboard ports. Connection is made at Richmond with the railroad lines leading to Southern ports, and with the Old Dominion line of steamships for New York. Freights at the West are accommodated by lines of steamboats plying to Louisville and Cincinnati. Within a year it is expected that rail lines also will connect with the latter points. The advantages of cheap water-line connections is so conspicuous that very low rates are practicable between the Ohio River cities and the seaboard, by this route. Low grades and cheap fuel will enable this road to enter directly into competition for the transportation of the super-abundant cotton, corn, provisions, cattle, flour, and breadstuffs of the mid-western States.

The coal deposits along the line of the road, in the Kanawha Valley are so superior that both Eastern and Western markets will draw fuel, gas coal, and iron from this source. New iron furnaces are in contemplation in both Eastern and Western Virginia. When the wharves and shipping facilities at Richmond are perfected it will inaugurate a new and important line of transit for freights to and from Europe and the West.

Union Pacific Railroad.

The return of the traffic department of the Union Pacific Railroad Company is as follows:

	Dec., 1872.	Dec., 1871.
Earnings	$757,850 92	$469,932 06
Expenses	315,829 23	317,414 30
Net earnings	$406,021 69	$152,517 76
Increase gross earning for December.		287,918 86
Increase net earning for December		253,503 93

	1872. Jan. 1 to Dec. 31.	1871. Jan. 1 to Dec. 31.
Earnings	$8,892,605 63	$7,521,682 17
Expenses	4,800,579 48	3,600,566 86
Net earnings	$4,092,026 15	$3,921 115 31
Increase gross earnings for year 1872 over 1871		$1,370,923 46
Increase net earnings for year 1872 over 1871		170,910 84

Vermont Central Railroad.

A dispatch from Ogdensburg, N. Y., says a decision has been rendered in the Supreme Court against the Trustees and managers of the Vermont Central and Vermont and Canada Roads. The suit was brought to recover about $1400—for supples furnished the Ogdensburg and Lake Champlain Road, leased by the defendant roads, and property on the road was attached. A motion was made to dissolve the attachment, which motion was granted on the ground that all the property was held under authority of the Court of Vermont, in trust, and for the purposes of the trust, and could not be attached on a suit brought against the trustees in their official capacity; but that John Gregory Smith, W. C. Smith, Joseph Clark, B. P. Cheney and Lawrence Barnes, trustees and managers, were personally liable for all debts and contracts made by them.

☞ The St. Paul *Pioneer* of March 9, says Mr. John P. Robson, with a party of twenty-nine persons, who have been engaged since June last in exploring for a line for the Canada Pacific Railroad from Neepigon to Fort Garry, arrived in that city the previous evening, having walked from Neepigon to Duluth, 280 miles. They have surveyed and located 420 miles of road, being the distance (by surveyed line) between Neepigon and Fort Garry. The line is an excellent one.

☞ The Public Library of Kentucky is one of the grandest philanthropies of this nineteenth century, and is financially the soundest institution of the kind in the whole United States. The Third Grand Gift Concert in aid of the Library will be given at Lonisville on the 8th of April next, and people who wish to share in the half-million dollars currency to be distributed must order tickets at once.

☞ The estimated earnings of the Kansas Pacific Railway for the fourth week of February are: freight, $38,843 44; passengers, $17,779 72—total, $56,622 16.

BANKING-OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK. Mar. 12, 1873.

☞ The **Chesapeake and Ohio, the Central Pacific and Western Pacific Bonds,** all of which have been negotiated by us, we believe to be among the best and most desirable Investment Securities in the market, which in time must become very scarce; especially as the Government will probably pay off during the year, in gold, $300,000,000 FIVE-TWENTIES and a large amount of money thus released from investment must find its way into this class of securities.

The **Chesapeake and Ohio Six Per Cent. Gold Bonds,** the total amount of which is only $15,000,000, are secured upon a property worth $35,000,000 to $40,000,000, and are fully equal in intrinsic value to the CENTRAL PACIFIC BONDS. They are issued in denominations of $100, $500, and $1,000, coupon or registered, and at their present market price, 87⅛ and accrued interest, are very desirable.

The **Central Pacific Six Per Cent. Gold Bonds** are too well known to require description or commendation. Their total amount is $25,885,000; they have for a long time ranged in market price near or above par. Their price to-day is 103¾@104.

The **Western Pacific Six Per Cent. Gold Bonds** amount to $2,735,000. This road is now consolidated with the CENTRAL PACIFIC, and the payment of its bonds, principal and interest, is assumed by the latter. As they have recently been introduced on the Stock Exchange, we expect to see them rapidly rise to the price of CENTRAL PACIFICS, being substantially the same in character and value. Coupon Bonds, $1,000 each. Their market price to-day is 94¾@95.

We buy and sell, as usual, Government Bonds, receive deposits, on which we allow interest, make collections, and conduct a general banking business in all its branches.

FISK & HATCH.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending March 1, at 231,678 tons, and for the coal year at 2,319,527 tons, against 2,381,668 tons to corresponding time last year, being a decrease of 62,141 tons. The bituminous tonnage for the week is 37,023 tons, and for the year 276,344 tons, giving a total of all kinds for the week of 268,701 tons, and for the year 2,598,871, being an increase as against production to same time last year of 24,114 tons.

☞ The Red River *Star* learns that Gen. Thos. L. Rosser, late chief engineer of the Dakota Division of the Northern Pacific Railroad, and John Ross have concluded a contract with the Directors of the Canadian Pacific Railroad for the construction of a goodly portion of their line, commencing at Fort Garry and running east. The bonds given by these gentlemen for the completion of the work in question amounts to the round sum of $7,000,000.

☞ The president has reappointed the present Government Directors of the Union Pacific Railroad company. They are Hiram Price and James F. Wilson, of Iowa; C. Harrison, of Indiana; J. H. Millard, of Nebraska, and D. S. Ruddock, of Connecticut.

Journal of Railroad Law.

RAILROAD COMPANIES—LIABILITY OF, FOR INJURIES TO ITS EMPLOYES SUSTAINED IN ITS SERVICE—WHO ARE FELLOW-SERVANTS.

The facts in the recent case of Wonder *vs.* The Baltimore and Ohio Railroad Company, (32 Maryland, 111,) are fully and clearly stated in the following opinion by—

ALVEY, J.—This is an action by an employee against his employer, to recover for an injury received while engaged in the work for which he was employed, by reason of defective machinery that he was required to operate.

The plaintiff was a brakeman in the employ of the defendant, on one of its burden trains, and, while engaged in his work, he received the injury complained of, which was occasioned by an alleged defect in the brake to one of the cars that he was using in the regular course of his duty. The supposed defect consisted in the use of a hook instead of an eye-bolt on the brake, and in having the point of the hook turned the wrong way. In attempting to use the brake, in consequence of the defect, the plaintiff was suddenly thrown from the car to the track, and was caught between the brake-shaft and the trucks of the car and dragged a considerable distance, and seriously injured. He alleges that there was negligence on the part of the defendant in regard to the use of this defective brake and that he is entitled to recover from the company the damages sustained by him as the consequence of such negligence.

It is now settled that there is no contract obligation imposed upon the master, from the mere relation that he bears to the servant, to provide machinery of any particular character or description, to be operated by the latter, nor is there any implied undertaking on the part of the former, resulting from the mere relation as employer, that the machinery shall be kept free from defects such as may expose the servant to danger. The servant is a free agent to select the employment into which he enters, and in contracting for the wages that he is to receive, must be supposed to take into account the risks to which the employment may expose him, and among those risks are the defects and accidents of the machinery, and the negligence and want of caution of fellow-servants in the common employment. To hold the master liable to the servant for all the injuries resulting to the latter from defects in machinery or materials upon which he may be employed, or from the negligence of fellow-servants, engaged in the common employment, would go far to impede, if not to make it impossible, to carry on many of the great works of the country. All that can be required of the master, and for the neglect of which he is responsible to the servant, is, that he shall use due and reasonable diligence in providing safe and sound machinery, and in the selection of fellow-servants of competent skill and prudence, so as to make it reasonably probable that injury will not occur in the exercise of the employment. He is required, also so far as he can by reasonable care, to avoid exposing his servant to extraordinary risks, which could not have been reasonably anticipated at the time of the contract of service, though, as to such extraordinary risks, it would seem the master does not guarantee against them.

From these general principles it follows that the master is not liable to his servant for any injury occasioned by a defect of machinery furnished to the latter to operate, unless he was negligent in providing such machinery, or, if he knew of the defect, in omitting to warn the servant of its existence. And, where the defect producing the injury complained of, was the consequence of the incompetency or neglect of a fellow-servant, or where the origin of the defect did not appear, it has been held that the master was not liable to his servant, it not appearing that he had been guilty of negligence, either in selecting the fellow-servant or in providing the machinery in which the defect occurred. Brown *vs.* Accrington Cotton Co. 3 Hurlstone & Co. 511.

Who is a fellow-servant, within the meaning of the rule has been a question of some diversity of decision, though the decided weight of authority is to the effect that all who serve the same master, work under the same control deriving authority and compensation from the same source, and are engaged in the same general business though it may be in different grades and departments of it, are fellow-servants, each taking the risk of the other's negligence. Or, to state the rule more generally, in the language of a decision that has been approved by this court. "All who are engaged in accomplishing the ultimate purpose in view—that is, the running of the road—must be regarded as engaged in the same general business, within the meaning of the rule." O'Connell *vs.* B. and O. R. R. Co. 20 Md. 212. It follows, therefore, that the brakeman on the train is in the same common employment with the mechanics in the shops to repair and keep in order the machinery, and with the inspector of the machinery and rolling stock of the road, and the superintendent of the movement of trains. Farwell *vs.* Boston and Worcester R. R. Co., 4 Metc. 49. If, therefore, the defect in the brake that caused the injury in the present instance existed by reason of the neglect or want of care on the part of such employes of the defendant, the latter cannot be held liable, unless there has been negligence in the selection of those servants, and the *onus* of proof of such negligence is on the plaintiff. 27 Md. 589.

The case of Searle *vs.* Linsday, well illustrates this. There the plaintiff was employed by the defendant as their third engineer on board their steam vessel. While turning a winch, one of the handles came off, in consequence of the want of a nut or pin to secure it, and the plaintiff was thereby seriously injured. He was, with others at work at the winch by the orders of the chief engineer, who knew that the instrument was out of order, but was, nevertheless, a competent person for the position he occupied. There was no evidence of personal negligence on the part of the defendants, and it was held that the chief engineer and the plaintiff were fellow-servants, and that, as the defect existed by reason of the negligence of the chief engineer, whose duty it was to see that the machinery was kept in proper condition, the plaintiff could not recover. And, in the concurring opinion of Mr. Justice Williams in that case, the law is briefly but clearly stated that governs cases like the present. He said: "I think there was no foundation for the argument that Simpson, the chief engineer of the vessel, and the plaintiff stood in any other relation towards each other than that of ordinary fellow-servants. Then, applying the rule of law which is now firmly established, the common employer is not liable to either for an injury sustained through the negligence of the other. In order to take this case out of the ordinary rule, it was contended that here there was negligence on the part of the employers themselves. In order to make that out, there must be reasonable evidence to show they were to blame, either in respect to their not having provided proper machinery and appliances, or not having retained competent workmen. I do not find any evidence at all of any default in either of these particulars. If the winch was out of order, it was owing to Simpson's negligence. There was no evidence, nor any suggestion, that Simpson was not a perfectly competent engineer." And such was the view of all the judges.

In the case before us, the question depending upon a diversity of opinion, as to whether the eye-bolt or the hook is the better mode of fastening the brake is immaterial, as both seem to be approved appliances, tested by trial and experience, and if it were conceded that the eye-bolt has superior merits, it by no means follows that the defendant was bound to discard the hook that had been used for a long time and on so many of its cars, without accident. A master is not bound to change his machinery, in order to apply every new invention or supposed improvement in appliances, and he may even have in use a machine, or an appliance for its operation, shown to be less safe than another in general use, without being liable to his servants for the consequences of the use of it. If the servant thinks proper to operate such a machine it is at his own risk; and all that he can require is, that he shall not be deceived as to the degree of danger that he incurs. 1 Redfield on Railways 521.

As to the defective attachment of the hook, it was shown to have been the duty of the employes, Fairbanks, Buckingham and Day, to see that the cars and their appliances were kept in proper and safe repair. Whatever negligence, therefore, may have existed in regard to the arrangement of the brake, and of the defective attachment of the hook thereto, was the negligence of those employes, the fellow-servants of the plaintiff; and there is an entire absence of evidence to show that there was the least negligence on the part of the defendant in the selection and employment of those servants; but, on the contrary, there is the most abundant evidence that such servants were of sufficient competency and skill; nor is there the slightest evidence in the case, that any superintendent or other agent, having control and general direction of the employes, and for whose negligent conduct the defendant would be responsible to the plaintiff, ever had knowledge of the defective condition of the brake before the occurence of the injury. The proof wholly failing in these important particulars, the court below could not have done otherwise than to instruct against the plaintiff. The essential proof of the gravaman of the action was wanting, and of course the plaintiff could not recover.

For these reasons the judgment will be affirmed.

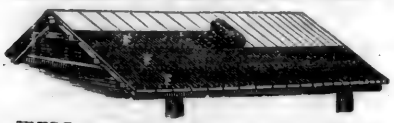
Judgment affirmed.

☞ Six new locomotives are to be put on the Cleveland, Columbus, Cincinnati and Indianapolis Railroad this month, and one thousand additional freight cars.

Vienna Universal Exhibition.

The following is a copy of the joint resolution passed by Congress to enable the people of the United States to participate in the advantages of the international exposition to be held at Vienna in eighteen hundred and seventy-three:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to enable the people of the United States to participate in the advantages of the international exhibition of the products of agriculture, manufactures, and the fine arts, to be held at Vienna in the year eighteen hundred and seventy-three, there be, and hereby is appropriated, out of any money in the treasury not otherwise appropriated, the sum of two hundred thousand dollars, or so much thereof as may be necessary for the purpose herein specified, which sum shall be expended under the direction of the Secretary of State: *Provided*, That the president be authorized to appoint a number of practical artisans, not exceeding eight, and of scientific men not exceeding seven, who shall attend said exhibition and report their doings and observations to him, and whose actual and reasonable expenses, not to exceed one thousand dollars each, shall be paid from such fund; and the president be further authorized to appoint a number of honorary commissioners, not to exceed one hundred, who shall receive no pay for their expenses or otherwise: *And provided further*, That no person so appointed shall be interested, directly or indirectly, in any article exhibited for competition: *And Provided*, That not more than fifty thousand dollars shall be expended for salaries and expenses of all persons receiving appointments to places authorized in this resolution, and not more than five thousand dollars shall be paid for salary and expenses to any one person.



Section 2. That the governors of the several States be, and they are hereby requested to invite the patriotic people of their respective States to assist in the proper representation of the handiwork of our artisans, and the prolific sources of material wealth with which our land is blessed; and to take such further measures as may be necessary to diffuse a knowledge of the proposed exhibition, and to secure to their respective States the advantages which it promises.

Section 3. That it shall be the duty of the Secretary of State to transmit to Congress a detailed statement of the expenditures which may have been incurred under the provisions of this resolution.

Approved February 14, 1873.

☞ The President of the Washington, Cincinnati and St. Louis narrow gauge railroad contemplates letting it to contract in April from Harrisonburg, Va., to Highland Court-house.

ASPHALTE ROOFING FELT.

A WELL tested article of good thickness and durability, suitable for steep or flat roofs; can be applied by an ordinary mechanic or handy laborer. Send for circular and samples to E. H. MARTIN, 70 Maiden Lane and 9 Liberty Street, New York.

Long Looked For Come at Last!

THE UNIVERSAL MICROSCOPE—The best Low Priced Microscope ever made, exceedingly useful for examining flowers, insects and Minute Objects, Detecting Counterfeit Money, and Disclosing the Wonders of the Microscopic World. It is adapted to the use of Physicians, Teachers, Students and the Family Circle. Requires no Focal adjustment, and can therefore be readily used by any person. Other Microscopes of no greater power cost $3 each and upwards, and are so difficult to understand that none but Scientific men can use them, the Universal always gives satisfaction. One single Microscope will be sent carefully packed, by mail, on receipt of $1. Agents wanted everywhere. Address

HAND'S IMPROVED DUMPING CART.

PATENTED APRIL 4th, 1871.

THE MOST PERFECT YET INVENTED.

Can be dumped by a single motion of one hand while you hold the horse with the other.

The tail-board being attached to the shafts, lifts of its own accord when the cart is dumped, as seen on the right of the engraving. As soon as the load is dumped all you have to do is to start the horse, and the cart will resume its proper position, as seen in the left of the engraving, hook itself and replace the tail-board, without any assistance of the driver whatever. The shafts are attached to the outside of the body, near the hubs, which gives the horse great control over the cart, and prevents the body from playing from side to side as they do when the shafts are pivoted underneath.

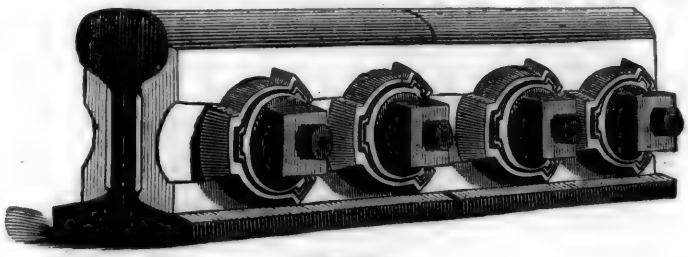
FISHER'S PATENT

Wrought Iron

RAIL JOINTS,



MADE BY

FISHER & NORRIS,

TRENTON, N. J.

The Superiority of these Joints has been proved by eight years' use on different Roads.

PRATT'S PATENT COMPENSATING FISH-JOINT,

MADE BY

VERREE & MITCHELL,

IRON AND STEEL MANUFACTURERS,

No. 939 North Delaware Avenue, Philadelphia, Penn.

COMBINES MORE ADVANTAGES THAN ANY FISH-JOINT HERETOFORE INTRODUCED.

This Joint is made of two heavy bars of wrought iron, or cast steel, sixteen inches in length, or any other desired length, fitted to the side of the rail and secured by four three-quarter inch bolts, with four malleable cast-iron cups and washers, and a gum ring two inches in diameter and half an inch thick, in each cup.

The value of gum to absorb jarring motion is well known; but when the pressure is as great as that required to secure the ends of railroad rails, some device, or method by which to prevent the gum from being forced out from under the washer, when subjected to increased pressure, is indispensable. The PATENT COMPENSATING FISH-JOINT secures that effect and enables Railroad Managers to apply all the force and pressure desired.

Where this Joint is securely fastened by screwing the nut upon the washer and gum in the cups with a lever three feet in length, it makes a perfectly tight joint, and thus secures what Railroad Managers have long desired—*a continuous rail*, with sufficient elasticity in the gum to relieve from and compensate for the sudden jar and at the same time allow for expansion and contraction by heat or cold.

We confidently claim for the PATENT COMPENSATING FISH-JOINT:

That it makes the best and cheapest form of fastening, requiring no plate or chair underneath the foot of the rail.

That it is safe and secure, and prevents the numerous accidents resulting from loose or broken rails.

That this Joint absorbs the vibratory shock given by the wheels in passing over the ends of rails, and thereby preventing fracture; and we have yet to hear of the first rail having been broken with our Joint on it.

That it can be applied in repairing and relaying with the least trouble and delay.

That the materials are indestructible, and make A PERFECT AND CONTINUOUS RAIL, thus securing what has long been desired, and what all previous experiments have failed to attain.

The Manufacturers can supply these Joints, complete in all their parts, ready to be fastened to the rails with dispatch.

Refer to all the Leading Railroads in the Country.

New York, Saturday, March 22, 1873.

Connecticut and Passumpsic Rivers R. R.

A special meeting of the stockholders of this company was held at White River Junction on the 14th inst., to take into consideration the plan proposed by the president, Mr. Emmonds Raymond, to consolidate the funded debt and a small floating debt into one class of securities. The excellent financial condition of the road was stated and the necessary votes were passed to take up all of the various classes of notes and bonds now in existence and issue $1,500,000 seven per cent first mortgage bonds on the road, rolling stock and franchise, to bear date April, 1873, payable in 1896. The road thus mortgaged is 110 miles in length, is thoroughly equipped, and its net earnings last year $308,000, the stock paying a semi-annual dividend of three per cent. The million and a half mortgage not only covers the main line, but a connecting road, mortgaged to the Passumpsic for money advanced, is included.

☞ The Pennsylvania Railroad Company give notice to the stockholders that they will have the privilege of subscribing at par to the stock of the company in the proportion of thirty-three and one-third per cent of the number of shares registered in their names April 1, 1873. Those entitled to a fraction of a share can subscribe for a full share. All subscriptions must be made between May 1 and 24, 1873, and no subscription will be received after the latter date. The following are the dates of payment: First installment of fifty per cent between May 1 and 24, 1873, and the remainder (fifty per cent) to be called for on sixty days' notice, in installments not exceeding twenty-five per cent at any one time. The privilege of taking new stock may be sold by any shareholder. The new stock can be paid for in full at time of subscription, if desired.

TO INVESTORS.

To those who wish to REINVEST COUPONS or DIVIDENDS, and those who wish to INCREASE THEIR INCOME from means already invested in other less profitable securities, we recommend the Seven-thirty Gold Bonds of the Northern Pacific Railroad Company as well secured and unusually productive.

The bonds are always convertible at Ten per cent. premium (1.10) into the Company's Lands at Market Prices. The rate of interest (seven and three-tenths per cent. gold) is equal now to about 8¼ currency, yielding an income more than one third greater than U. S. 5-20s. Gold Checks for the semi-annual interest on the Registered Bonds are mailed to the postoffice address of the owner. All marketable stocks and bonds are received in exchange for Northern Pacifics ON MOST FAVORABLE TERMS.

JAY COOKE & CO.

New York, Philadelphia and Washington.

Winter along the Northern Pacific Railroad.

Mr. W. Milnor Roberts, Chief Engineer of the Northern Pacific Railroad, in a letter dated February 27, 1873, makes the following authentic statement:

On the finished line across Minnesota, from Duluth to Fargo, the road has been run all winter with remarkable regularity and freedom from snow difficulties. There has been less necessary delay on the Northern Pacific Road this winter than upon the roads east of it to Chicago and New York. Considerable snow has fallen in eastern Minnesota this winter, but there has not been an unusual amount in the western part of the State and across Dakota. The occasional snow fences opposite the excavations have served their purpose well.

In common with the rest of the country and with Europe, Minnesota, Wisconsin, Iowa and the entire Northwest have had a most unusual winter season. There have been some days of very severe weather, but it was quite as cold about the same period in most of the Eastern States.

In January, at Duluth, the thermometer ranged as follows during the middle of the day; average, 12 deg. above zero; lowest on the 9th when it was 8 deg. below zero; the highest, 22 deg. above, on the 20th. Absolute lowest, early in the morning of the 28th, 25 deg. below zero. At Duluth, in February, to the 15th, average, 20 deg. above; lowest, 1 deg. below; highest, 31 deg. above zero; absolute lowest, early in the morning of 2d, 17 deg. below.

At Fargo, on the western border of Minnesota, in the open prairie of Red River Valley, the range of the thermometer in January was as follows; average, 6 deg. above; lowest, 16 deg. below; highest, 31 deg. above zero; absolute lowest, early in the morning of the 9th, 30 deg. below zero. At Fargo, in February, to the 15th, the average was 11 deg. above; lowest, 10 deg. below; highest, 33 deg. above; absolute lowest, on the 1st, 10 deg. below zero.

In the Rocky Mountains, east of the main divide, at Bozeman, near the highest elevation of the Northern Pacific route, from the 5th to the 25th of January inclusive, the average temperture was 35 deg. above zero; lowest, 22 deg. above; highest, 44 deg. above; absolute lowest, early in the morning of the 23d, 16 deg. above zero. It is noticeable how much milder the weather has been at Bozeman, near Fort Ellis, and about 5,000 feet above the sea, than in Minnesota and Wisconsin, near the level of the lakes. The farmers of western Montana began their spring ploughing in the latter part of January, the winter in that section being considered over, and the roads were dry and dusty.

On the western slope of the Rocky Mountains, in eastern Washington Territory, the local papers state that the farmers of Walla Walla valley were ploughing their fields on the 26th of January, though the early part of the winter had been, as elsewhere, unusually cold for the region.

The winter climate along the Pacific division of our road, between the Columbia River and Puget Sound, which is in regular daily operation, may be inferred from the fact that at Portland, Oregon, the average temperature for January was 45 deg. above zero; the highest was 58 deg. and the lowest 34 deg. above. Snow fell on one day, the 2nd, to a depth of two and a half inches. Grass has been green throughout the winter about Puget Sound, and several varieties of flowers were in bloom out of doors in January and February.

Our experience on the finished line, and authentic reports from the remainder of the route, satisfy me that the Northern Pacific Road, if completed from Lake Superior to Puget Sound, would have been kept in regular operation the entire distance the last winter without difficulty.

Chicago and Alton Railroad.

The earnings of this road for the years ending December 31, 1871 and 1872, were as follows:

	1871.	1872.
From passengers	$1,278,793 44	$1,329,714 83

Total to be accounted for		$2,326,103 25
Disbursed as follows:		
Interest on bonds		$299,224 78
Interest on script, convertible September 1, 1875		9,431 37
Payments to sinking funds		82,000 00
Rent paid Joliet & Chicago R. R. Co.		133,736 65
Rent paid St. Louis, Jacksonville and Chicago R. R. Co.		240,000 00
Rent paid Louisiana and Missouri River R. R. Co.		112,454 17
Dividends, March and September, 1872, five per cent each		1,135,080 00
Government tax on dividends, etc.		10,403 13
Balance December 31, 1872		303,773 15
Total, as above		$2,326,103 25

The gross receipts from traffic were $122,581 52, or about 2.3 per cent less than those of the preceding year. The net receipts were $318,938 02, or about 14¼ per cent less than those of the preceding year.

The operating expenses (exclusive of taxes) amount to 61 per cent of gross receipts; including taxes 63.6 per cent. During 1871 the operating expenses were 56.13 and 58.36 per cent respectively. The president in his report says:

The causes that have produced this unsatisfactory result, may be mainly traced to the "Chicago Fire," and are, therefore, exceptional. During the greater part of the year, owing to the destruction of warehouses, it was impossible to obtain storage for grain arriving at Chicago on your line, without resorting to very expensive expedients, the cost of which is charged in the account of operating expenses. For a considerable portion of the year storage could not be had at any cost. Traffic in grain to Chicago ceased, and was forced by different channel to other markets.

The transportation of grain and lumber comprise the most important part of the traffic on your lines, and the measure of the latter is determined by the amount of the former to a very great degree; for the reason that the farmer generally makes his purchases of lumber with the proceeds of, and at the place where he finds a market for his grain. With a much larger amount of grain in the country than during the preceding year, the amount shipped to Chicago over your line was reduced one and one-half millions of bushels, and the return freights in lumber were reduced nearly eighty millions of feet.

At nearly every important station on your line we have competition by other railways for eastern bound traffic, and the through rates are thereby very much reduced. Under ordinary circumstances the comparatively low cost of lake and canal transportation, of which we take advantage during the season of navigation in forwarding freight to the Atlantic cities, enables us to obtain fair rates upon our part of the through route; but during the past year the capacity of the lake vessels was found to be quite inadequate to meet, in addition to the ordinary demands, the very extraordinary one for transporting materials for the rebuilding of Chicago. The result was an advance of from 200 to 300 per cent in lake freights, which compelled us to accept very much less than our usual proportion of the through rate.

There has been expended during the year $83,284 54 in replacing or in paying for property destroyed at the Chicago Fire, and not covered by insurance. That sum has also been charged in the accounts of operating expenses.

On lines like yours where very few persons travel except on business, a reduction of freight traffic from any cause, reduces the passenger traffic also in some degree. Other causes, however, such as the general increase of population and business of the country have resulted in more than balancing the reduction, and the receipts for the year show an increase of $55,921 39, or 4.4 per cent. The number of passengers transported during the year was 772,506, an increase of about 8 per cent over the preceding year. Of the whole number 5.5 per cent were through passengers, and 94.5 per cent way passengers.

The average sum paid by each passenger, including through and local, was one dollar and seventy-two cents.

As already indicated, the reduction in traffic receipts is due wholly to the reduced rates received for the transportation of freight, the total amount being $132,560 17, or 3.5 per cent less than the preceding year. While the tonnage transported shows an increase of 6.88 per cent. The aggregate, transported during the year is 3,203,597,161 pounds, including 959,162,420 pounds, or 480,000 tons of coal.

The coal traffic shows an increase 25.5 per cent during the past year.

The proportion between through and local freights being 11.26 per cent of the former to 88.74 of the latter.

The condition of your property has been, in all departments fully maintained, and is fully equal to that of the best roads in the West.

Two thousand five hundred tons of steel rails; four thousand eight hundred and twenty-three tons of new and re-rolled iron rails; one hundred and eight tons of track spikes; two hundred tons of splices and bolts, and one hundred and sixty-two cross ties have been used in repairs and replacement of materials in tracks.

Ten and one-quarter miles of new side-tracks have been constructed during the year.

A building for the general offices of the company at Chicago; fifteen new station houses; two new engine houses, eleven new water stations, and many other additions to the buildings of the company have been constructed during the year.

The number of locomotives owned by your company at the close of the year, was one hundred and forty-four, of which nineteen were purchased during the year, of the Schenectady Locomotive Works. One hundred and thirty one are "coal burners," and thirteen are "wood burners."

The whole number of miles run by locomotives during the year was 3,902,102, an increase of 16 per cent over the mileage of the preceding year.

The cost of motive power per mile run, compared with 1871, is as follows:

1871.		1872.	
Repairs	7.04 cents.	Repairs	6.12 cents.
Wages	6.54 cents.	Wages	6.59 cents.
Fuel	8.00 cents.	Fuel	7.84 cents.
Oil & waste	0.85 cents.	Oil & waste	0.86 cents.
Cleaning etc.	1.26 cents.	Cleaning etc.	1.20 cents.
Total	23.69 cents.	Total	22.11 cents.

Showing a reduction of 1.58 cents per mile.

The amount of coal consumed was 89,084 tons; the amount of wood, 14,968 cords. The distance run per ton of coal was 40 miles; the distance per cord of wood, 42 miles.

Six first-class passenger coaches, two baggage cars, two hundred house freight cars, one hundred stock cars, one hundred platform cars, forty-six combination cars, four drovers' cars, one tool car and one wrecking car, have been constructed at the shops of the company, and added to the car equipment. One paymaster's car, twenty house cars and twenty platform cars have been constructed to replace cars burned at the Chicago Fire.

The number and description of cars upon your line at the close of the year, may be stated as follows:

Pullman Palace Sleeping Cars	12
Pullman Dining Cars	5
Passenger Coaches	57
Baggage Cars	4
Baggage and Mail Cars	9
Baggage and Express Cars	3
Express Cars	8
House Freight Cars	1,614
Combination (house and stock) Cars	151
Stock Cars	397
Platform Cars	739
Drover's Cars	11
Paymaster's Car	1
Tool and Wrecking Cars	7
Total	3,018

The lines operated by your company at the close of the year, are as follows:

Chicago to Joliet (under perpetual lease	38
Joliet to East St. Louis (owned by your Co.)	242
Dwight to Washington, with branch to Lacon (owned by your company)	79.8
Bloomington to Godfrey—St. Louis, Jacksonville, & Chicago R. R. (perpetual lease)	150.6
Roodhouse to Louisiana (owned by your company)	37.6
Louisiana to Jefferson City—Louisiana and Missouri River R. R. (under perpetual lease	101.1
Total miles	649.1

On the "Main Line" between Chicago and East St. Louis there are 30½ miles of double main track, and 61 3 5 miles of side tracks. On the several other lines the aggregate length of side tracks is 26.65 miles, making a total on all the lines of 88¼ miles of side tracks. That part of the Louisiana and Missouri Road between Louisiana and Mexico (on the line of the St. Louis, Kansas City and Northern Railway) was open for traffic at the commencement of the year. The line from Mexico to Fulton, 24½ miles, was opened for traffic March 6th, and the line from Fulton to Jefferson City, 25½ miles, July 16th, 1872.

Our experience in operating the leased lines, has in all cases demonstrated the advantages claimed for them when the leases were made. The Joliet and Chicago Railway forms the trunk line of the system, and is indispensable to it.

The St. Louis, Jacksonville and Chicago Railway is developing increased traffic each year, and is a very valuable line to your company. In addition to the traffic upon its line, it contributed traffic to the amount of $495,414 70 to the Chicago and Alton line during the past year. By reason of the ice blockade at the ferry over the Mississippi River, at Louisiana, during the months of January, February and December, very little traffic could be done in connection with the Louisiana and Missouri River Road.

During the period of nine months when the river was unobstructed, the aggregate number of cars (passenger and freight) passing the ferry connecting that line with yours, was nineteen thousand six hundred and ninety-nine being an average of about eighty-four cars per day, a very satisfactory result under the circumstances. While this brief experience demonstrates the importance of the traffic for which we are seeking in that direction, and leads us to believe that our anticipa-

tions as to the value of that line will be ultimately realized, it also demonstrates the importance of a bridge over the Mississippi River to take the place of the ferry. Competing lines in that direction are provided with bridges, and if such was not the case, a railway traffic which is liable to absolute blockade, for one fourth of the year cannot be conducted profitably or to the satisfaction of those upon whom its success depends.

Careful examinations and estimates are now being made to ascertain the cost of the bridge. From approximate estimates it is believed that a permanent structure of stone and iron can be built at a cost which will fall considerably below one million of dollars.

The cost of maintaining and operating the ferry, including switching engines, &c., connected with it during the past year was $75,299 97. The revenue on a bridge computed at the rates charged on the Quincy Bridge—taking the actual traffic during the nine months already referred to as a basis—would be at the rate of $82,360 60 per annum; which without any increase of traffic, would probably be sufficient to meet the interest on the cost of a bridge, leaving the company to reap all the advantages to be derived from the increase of traffic without increased cost of transferring.

The traffic of your line between Chicago and Wilmington, (50 miles), has reached the utmost amount that can be safely conducted on a single track, and the constantly increasing volume renders it imperative do lay an additional track during the present year. On this part of the line almost the entire coal traffic passes from the Wilmington mines to Chicago. The cost of this additional track, including steel rails will be about $950,000. We have reason to believe that increase of traffic on this part of the line, and the economy of maintaining and operating it, will very much more than compensate for the increased capital which will be required.

GENERAL BALANCE, December 31, 1872.

Cost of road and equipment		$14,437,600 65
Machinery and tools		190,119 63

IMPROVEMENT ACCOUNT.

In pursuance of the terms proposed in a circular addressed to the stockholders of the company, under date of April 15th, 1872, 9,956 shares of the common stock of the company were sold at par to stockholders of record, on the 6th day of May ensuing, in the proportion of one share to each ten shares held on that day. Payment for the same was made by installments June 1st, August 1st, and September 2d. At the date last named, scrip was issued, bearing interest at 7 per cent. per annum, payable semi-annually, and convertible into common stock September 1st, 1875.

The amount received for this special account (interest having been adjusted at 7 per cent per annum), was	$995,630 41
There has been expended during the year for locomotives, cars, buildings and additions to the property of the company	962,534 62
Balance	$33,095 79

President.—T. B. BLACKSTONE.

General Superintendent.—J. C. MCMULLEN.

Report of the Chief Engineer of the Texas and Pacific Railroad.

FEBRUARY, 5, 1873.—Message and report read, and three hundred copies ordered to be printed.

EXECUTIVE OFFICE,
AUSTIN Feb. 2, 1873.

HON. E. D. PICKETT,
President of the Senate:

SIR:—In compliance with the resolution adopted by the Senate on the thirty-first ult., I enclose a copy of a report made to me by the Engineer-in Chief of the South Pacific and Trans-continental Railways. This is the only written communication made to me touching the affairs and progress of those railways.

From this report, as well as verbal information, I am led to believe that the managers of these railways are making a vigorous effort to comply with their charter, and that the construction of the road is proceeding with great celerity. Also, that from the operation of causes beyond their control a loss of time for construction of perhaps several months has occurred.

Very respectfully,
EDMUND J. DAVIS,
Governor.

TEXAS AND PACIFIC RAILWAY CO.,
MARSHALL, TEXAS,
Office Chief Engineer.

To His Excellency, E. J. DAVIS,
Governor of the State of Texas:

It is due the State of Texas and the interests I represent as Chief Engineer, that I should make a statement to you of the progress of the work on the Texas and Pacific Railroad.

In June the President of the company, Thos. A. Scott, with a party of the directors, visited the State for the purpose of examining the work they had to undertake; as they then informed you in Austin, they decided to prepare the work for construction, and push it forward as rapidly as possible to completion, in hopes to be able to complete to Fort Worth by January 1, 1874.

The President of the company after a careful inspection of the route as far as Fort Worth, instructed me to place engineering parties upon the entire line from Marshall to San Diego; and to prepare 500 miles in Texas, including the Southern Division from Marshall to Fort Worth, 181 miles, the Jefferson Division from Marshall via Jefferson to Texarcana, sixty-nine miles, the Transcontinental Division from Texarcana to Fort Worth, 235 miles, for work, and to place upon it all the forces I could obtain.

In pursuance of these instructions the line from Longview to Fort Worth, from Marshall to Texarcana, and from Texarcana to Fort Worth was covered with engineering parties with the instructions to prepare the road for letting by October 1, 1872.

Two parties of engineers were also placed upon the route between the Brazos and the one-hundredth meridian, three parties between the one-hundredth meridian and El Paso, three parties between El Paso and the Colorado of the West and Fort Yuma, and three parties on the California Division between Fort Yuma and San Diego, with the view to definitely fix the entire route across the continent.

The surveys of the road are so well advanced that within the next sixty days we will have a connected practicable line across the continent.

These surveys determine that the country is remarkably adapted to the building of a transcontinental road with rapidity at a fair cost.

We also immediately organized the department for construction, with a view of building our road from Marshall, north; Longview, west, Dallas, east, and Sherman east; at the same time, and from each of these points, I am to day ready to lay track.

The grading completed and ready for the superstructure, is from thirty to fifty miles north, east and west from the points mentioned.

Considerable progress has also been made towards bridging the Trinity, at Dallas and Sher-

man. Our arrangements are such that as soon as the railroad lines connecting with us are completed, and navigation on Red River opens, I can deliver material from Pittsburg, New Orleans and Galveston, at those points.

The work upon all the divisions between Marshall and Fort Worth was advised to be let in accordance with the enclosed notice, on the first day of October, and between that day and the fifteenth day of October, the grading ties and bridging upon the entire three divisions were contracted, and between the first day of October and the first of November, most of the contractors moved upon the work and have now been upon the road about two working months. In that time there has been graded and completed, ready for the track over one hundred and fifty miles of road-bed, and upon nearly every mile of the uncompleted road east from Dallas and Sherman, large forces are at work.

Three hundred thousand ties have been delivered on the line, and the bridging is progressing in all its parts.

Large amounts of the company's material is on Red River, in St. Louis, New Orleans and Galveston, consisting of engines, cars, iron, tools, and supplies of all descriptions.

Unexpectedly to us, Red River has remained low, and supplies shipped by us in July and August still remain on the river.

We have now on Red River some $500,000 worth of supplies and material, without which, and until the railroads connecting with us are completed it is impossible to proceed with the track laying.

The want of navigation has added immensely to the cost of our work. That portion of Northeast Texas contiguous to our work being almost destitute of provisions and forage, has forced us to overcome the difficulty and supply our contractors by placing wagon trains between Monroe and Shreveport, and a large class of the provisions consumed here, conveyed by this route has cost us from four to seven and a half cents per pound freight. We have been obliged to take out of Red River, chartering steamboats for that purpose, and bring round by New Orleans, Galveston and the International road, a large part of our tools and heavy supplies destined for Shreveport, besides all provisions of a perishable character which had been shipped by this route were brought round by the routes specified to the terminus of the International Railroad, and then hauled by wagon train to Longview, at a cost of more than double the first cost of the articles so transported. We are delayed at Sherman on account of the non-completion of the Houston and Texas Central Railway, and the Missouri Kansas and Texas Railroad to that point, which we were confident would be completed by December the fifteenth.

This delay has necessitated the company's placing upon the road, large wagon trains from the end of the Missouri, Kansas and Texas Railroad to Sherman.

We had also counted upon the completion of the International and Great Northern roads to Longview, but their delay has obliged us to haul our freight from the end of their roads to Longview, and for reasons beyond the control of those companies, their roads still remain without a connection with us.

These delays in the forwarding of supplies and material have put the company back at least six months with the track. They were unavoidable, and could not by any foresight, expenditures, or energy on the part of the company have been prevented or avoided.

I think I can safely say that there never has been in any State more work done in the same length of time upon railroads than the Texas and Pacific Railway has performed in the last two months, notwithstanding the difficulties encountered.

The force upon both lines of the railroad to-day shows 3,500 teams and 5,500 men, sufficient to complete the grading, bridging, and tieing of all that portion now under contract in ninety working days.

At this time the entire force is temporarily laid up by the horse disease, so epidemic over the United States. This delay alone will retard the completion of work over sixty days.

The unusual difficulties and delays in navigation, and the non-completion of roads to a connection with us, holds all our iron, spikes, bridges and material for the superstructure, en route, at Galveston, New Orleans and St. Louis, which we expected to have at Dallas, Sherman, Longview and Shreveport to day.

Even after Red River gets in good boating order, and railway connections are completed to us, it will take at least ninety days to bring over these roads and up the river, and place in store material sufficient to justify us pushing rapidly with our track.

Our ships loaded with iron have commenced arriving at New Orleans and Galveston. Several of them encountered the great gale on the coast of England, and were forced to port for repairs and reshipment.

The iron in Pennsylvania, that is to come via St. Louis and the Missouri, Kansas and Texas Railroad to Sherman, is ready and waiting shipment and as soon as these railroad connections are made the material will be thrown in upon the line at the different points by all the means of transportation that we can command.

All these delays have added immensely to the cost of the road, and if we are forced to complete both lines to Fort Worth by January 1, 1874, we shall be obliged to make extraordinary efforts and add to the cost of the work at least thirty-three and one-third per cent above what true economy and the interests of the company dictate, and more it is believed, than the interests of the State will demand.

This extraordinary expenditure the company desire to avoid, and to use the money thus saved in the rapid extension of the road from Fort Worth westward.

Notwithstanding these past delays, preparations are made to push the work of completion to Fort Worth as fast as men and material can do it.

We ask from the State time to overcome the difficulties that the elements have placed in our way and which were beyond the power of man to foresee or control, and that we may be placed by the State upon the same footing, as to time, with the company that preceded us.

An extension of the time within which this company is required to complete the two lines of road to the point of junction at Fort Worth to the first day of January, 1875, would enable the company to do the work without incurring the extraordinary expense which would not be unavoidable if we are required to finish the work by the first of January, 1874. There will be no relaxation of work or withdrawal of any of the forces now engaged, and this extension of time is asked only for the purpose of avoiding the extraordinary expense incident to a too rapid construction.

We have already expended upon work in the State, over two millions of dollars, and for material and supplies bought outside of the State, and now en route to the line of road, over $3,500,000.

We are taking measures for the proper organization of our land department, and shall present to our own and foreign countries the great advantages Texas possesses for emigration, that cannot fail to pour into the State a large immigration of the class that make an industrious, thrifty and honest population.

Our land department will be organized upon the system of the land departments of the great roads of this country that have been so successful, such as the Illinois Central, Union Pacific, Burlington and Missouri River Railroad, and others. We already see the effects of our operations in this section.

Information by the emigrating population is already being sought at our offices, not only in this country, but from all parts of Europe, and we are endeavoring to complete our organization so as to give information that shall not only be favorable to the locality through which our lines run, but to the entire State.

Our arrangements will extend to the obtaining low rates from all parts of Europe to all parts of Texas, and contracting for bringing all emigrations to any portion of the State who desire to settle and become citizens thereof. The principal office of the company in this State has been erected at Marshall, and arrangements have been made at this place for the erection of the principal shops of the company, which now are under process of construction.

The right of way has been obtained over the greater portion of the entire lines from the eastern part of the State to Fort Worth, and in most of the towns through which our lines run we have made satisfactory arrangements for depots for the accommodation of traffic and travel of such places and adjacent counties.

I refer confidently to the Representatives of the State who live along our line for a full corroboration of the facts I have given you, and I bespeak from you and the authorities of the State that aid and assistance that your duties and position can consistently give us, and that your well known interest in the development of the internal improvement of Texas justify us in expecting.

I am respectfully,

G. M. Dodge,
Chief Engineer.

Dresden and Oil Springs Railway.

The profiles, estimates, &c., have been made by Mr. E. C. Kenny, of the Canada Southern, and the necessary notices have been given for obtaining a charter. The line is 16½ miles long, and is to run from Dresden to Dawn Centre (Rutherford P. O.), thence due north along the centre of the 8th concession of Dawn, to Oil Springs in Enniskillen. From Oil Springs it will continue north 2½ miles to the point of junction with the Canada Southern. The municipalities of Dresden, Dawn and Oil Springs, are each expected to vote bonuses of $10,000, besides which the road will be entitled to $2,000 per mile from the Government. This amount Mr. Kenny states will be amply sufficient to guarantee the speedy construction of the work. The grading can be completed for about $50,000, and the only bridge on the line will be a trestle structure of one hundred feet at Oil Springs.—*St. Clair Republican.*

☞ Freight is now received on the New Haven, Middletown and Willimantic Railroad and forwarded as far east as East Hampton, and at Willimantic freight is received and forwarded to Turnerville, near Colchester. Only six miles of track need to be laid before New Haven and Willmantic will be connected with iron bands, and the distance is being shortened about half a mile each day.

☞ The Memphis and Little Rock Railroad was sold at Hopefield on the 18th inst., by Mr. Vaile, the trustee of the second mortgage bondholders, Mr. Witt of Cleveland being the purchaser at $15,000 over and above the first mortgage bonds, and all liens previous to the issuance of second mortgage bonds, amounting in the aggregate to $3,181,000.

☞ The directors of the Springfield, Athol and Northeastern Railroad have unanimously voted to bond the extension from Barrett's Station to Springfield, and the real estate owned by the road in Springfield, which will amount to $200,000, for $300,000.

☞ The Northern Colonization Railway Company ask for tenders for building 128 miles of the main line and 14 miles of branch line. The 128 miles is the distance from Montreal to Aylmer, and 14 miles is a branch from St. Therese to St. Jerome.

Railroads of Massachusetts.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, March 29, 1873.

Stock Exchange and Money Market.

Money has been quite active, and extreme rates have been exacted for call loan accommodation, the figures quoted having been from 7 per cent currency in a few instances to the more prominent Government houses, to the same rate in gold, with the addition of a commission of ⅛@⅛ of one per cent per day for the use of funds to the more needy of the Stock Exchange firms. The available supply has been seemingly less liberal, as well with private lenders as at bank. The discount market has been moderately active and the best grades of business paper have been rated at from 9@12 per cent per annum. The city banks, last week, lost about ¾ths of a million of their legal tender reserve, about ¼th of a million of their specie average. Their deposits were further cut down nearly 3½ millions, and their loan and discount averages reduced about 2⅜ millions. The banks continue below their reserve, the last statement showing that they lacked $264,250 of the 25 per cent reserve which the national banks are required by law to keep on hand. The U. S. Sub-Treasury, last week, made an addition of nearly a million to its coin balance while losing one half a million of currency. Its currency reserves at the close of the week were $20,461,430; and its coin board, $38,388,907.

The city banks, in their latest return, show a falling off of $757,500 of legal tender notes, with a decrease of $202,900 of specie, and a reduction of $3,413,300 in their deposits, also a contraction of $2,322,700 in their loan and discount averages, and of $190,800 in their item of circulation. The city bank exchanges, last week, averaged 130¼ millions.

The clearances of the banks averaged through the week 130¼ millions a day, and amounted in the aggregate, for the whole week, to $781,569,065 as against $833,306,705 the preceding week. The U. S. Sub-Treasury at this point reduced its currency balance $559,574 and enlarged its coin reserve $974,776 as the result of the week's business.

The specie reserve of the city banks according to the latest return is $16,946,700, against $19,604,400 same time last year. The city bank deposits are now $196,095,400 against $206,049,900, week ending March 16, 1872. The legal tender reserve amounts to $38,715,500, against $43,187,800 same time last year. The circulation now stands at $27,610,400 against $28,098 500 same time last year. The loans are now $278,028,600 against $279,868,900 at this date last year.

The coin reserve of the city banks is now about 16⅞ millions as against about 25¾ million on the 20th of last July; the legal tender reserve is under 38¾ millions against about 55½ millions on the statement of June 15th; and the deposits are now about 196 millions, against 47½ millions on the 20th of July.

The U. S. Sub-Treasury office last week received $3,652,095 of currency, and $1,491,593 of gold, the latter including $2,617,000 from customs; and disbursed $4,211,668 of currency and $3,516,726 of gold, the latter embracing $355,914 of coin interest.

Government revenues have been up to about the usual average of late. The excises yielded within the week about two millions, and thus far in the current fiscal year beginning with July 1, 1872, $82,274,030 millions. The customs at the port of New York, for the week, were $2,581,502, and at the outports, about $870,000 more, in coin or coin certificates.

There has been a more active speculative movement noted in Gold, with a firmer range of prices, the latter dealings indicating most buoyancy. The changes in the administration of the Treasury Department were said to have stimulated the speculation. The export and customs drain was moderate. The range of the price during the week has been from 114¾@115⅝ and the closing quotation on Wednesday was 115⅛ against 115⅛ on Wednesday of the preceding week. The specie outflow last week, was $825,968. The Gold Exchange Bank clearances have averaged about 64⅛ millions per day during the week.

Under the Treasury programme for March, Government proposes to sell Gold as follows: Thursday, March 27, $1,500,000. And to buy in Five-Twenties, as follows: Wednesday, March 26, $500,000.

The customs demand for Gold last week, averaged $436,167 a day. The arrivals of specie from Europe, Havana and other foreign ports thus far in 1873, have been $194,719 against $274,604 in 1872. The total customs revenue of the Government, in coin, at this port, since July 1, has been $97,864,645 against $113,676,206 during the same time in 1871-2.

Government has disbursed through the U. S. Sub-Treasury here, on account of the coin interest on the public debt, since July 1, 1872, $60,460,153, against $61,858,664 during the same time in 1871-2.

The export drain of specie was $825,968 last week, against $730,640 same week preceding year. The shipments since July 1, 1872, have been $48,056,807 against $26,294,054 during the same portion of 1871.

Foreign Exchange has been much firmer, on less urgent offerings of prime bills, and better inquiry. Bankers' sixty day bills on London closed at 108@108¼; sight bills on London, at 108¾@109. The week's exports of Domestic Produce have been to thecurrency value of $4,068,273.

Government securities have been offered with reserve in the open market and have shown firmness, on a moderate demand, mainly on investment account, closing buoyantly.

Government bought in on Wednesday $1,000,000 Five Twenties, at from 113 38@113 49 net out of an aggregate offering of $4,193,400.

U. S. sixes of 1881 closed on Wednesday of this week at 118⅞@119 U. S. Five-Twenties of 1862, 115⅞@116⅛; U. S. Five-Twenties of 1864 at 115⅝@116⅛; U. S. Five-Twenties of 1865, 116⅝@116⅞, U. S. Five-Twenties of 1865 consolidated 114⅞@115⅛; U. S. Five Twenties of 1867, 116⅞@117; U. S. Five-Twenties of 1868, 116¼@116½; U. S. Ten-forties at 110¾@111; U. S. Fives of 1881 (Funding Loan) 113@113½; Six per cent. currency Sixes from 113⅝@113¾.

The latest quotations at the London Stock Exchange compare as follows with former returns:

	March 5.	March 12.	March 19.
Consols	92¾	92⅝	92⅞
U. S. 5-20s, 1865	93¾	93⅝	93½
" 1867	93¾	93¾	93½
" 10-40s	89¼	89	89
New Fives of 1881	90⅝	90⅜	90⅛
Erie	52⅜	52⅝	52¼

State bonds have been moderately sought after and quoted somewhat stronger. Virginia and Tennessees have advanced.

There has been a better demand noted for the Railway Mortgages which have been quoted firm. The favorites of the older loans have been offered sparingly. Central Pacific Sixes have been in fair request at steady prices closing at from 103½@103¾. The earnings of the Central Pacific R. R. in February reached $694,015, as against $571,836 in February last year; and thus far in 1873, $1,546,875, against $1,164,059 same time in 1872. Chesapeake and Ohio Sixes have been more sought after at 87½ and interest. Western Pacific Sixes have been salable and firm at 94¾@95. The Northern Pacific 7-30 Loan have been in good demand at par and interest.

Railway and Miscellaneous share property has been less active and generally less buoyant as to prices toward the close.

The Metal trade has been generally on a moderate scale. Ingot Copper has been quoted easier for prompt delivery, on a restricted business; sales, 50,000 lbs. at 34c.@34½c., and 150 tons English at 29½c.@30c. For forward delivery a

good demand has been noted at rather firmer rates, with sales reported of 600,000 lbs. Lake at 31½c.@32c. Scotch Pig-iron has been held pretty firmly, but has been without notable activity; 200 tons Eglinton and Glengarnock sold in lots at $55 and $57. American Pig has been in light demand at former figures. In Iron Rails there has been a brisk business reported in American, for early delivery, sales reaching 14 000 tons within a range of from $80@$85. English product quiet but held firmly. Other kinds of Iron stock quiet. We quote: Glengarnock Pig at $57; Eglington do. at $55; Gartsherrie at $60; Coltness at $65; No. 1 American Pig at $50; No. 2 do. at $45@$48; Wrought Scrap at $57 50@$60; English rails at $70@$71, gold. Pig lead quiet, but quoted strong in price on the basis of 6¾c., gold, for ordinary foreign. Of Spelter, further sales of 50 tons were reported at $7 80@$8 gold, showing an improvement. Pig-tin closed quite briskly, under reports of a loss of a vessel, with a considerable quantity of Straits in cargo, and prices show an advance, the demand having been chiefly speculative; sales 2,500 slabs Straits at 33c.@33¼c., now quoted at 33½c., gold; 10 tons English, to arrive, at 33c., closing at 33¼c. gold. Tin Plates have been quoted strong in price, on a fair inquiry, with sales reported of 1,000 boxes Charcoal at $12 37½; 1,500 boxes Charcoal Terne, part to arrive, at $10 75@$10 87½, and 500 boxes Coke, 10 by 14, at $10 75, gold; Charcoal Plates quoted here at $12@$12 37½; Charcoal Terne, $10 75@$11; Coke, $10 50@$10 87½, and Coke Terne, $9@10, gold, per box. Zinc dull at unchanged figures.

A freer movement has been noted in general business. Breadstuffs and Provisions has been in rather more demand. Cotton has been unusually brisk, especially for forward delivery, but at much lower prices, closing rather more steady. Middling upland cotton, closed on Wednesday at 19⅛@19⅞ cts. per lb. The receipts at all the ports, since Sept. 1, have been 2,912,021 bales, against 2,356,374 bales same time in the preceding year; exports 1,744,419 bales against 1,428,292 bales in the previous year; stock at the ports at latest dates, 553,700 bales against 482,000 bales same date 1871.

Foreign goods have been in rather more request and generally steady in price, Sugars and Coffee quoted cheaper. The week's imports amounted to $5,974,593, including $2,279,948 of dry goods.

Ocean freights have been quite active, since our last, in the line of charters, considering the scant supply of tonnage available, and rates have been very well supported. Vessels for the Petroleum, Grain, Lumber, Sugar, and Cotton trades have been in most request. The business in the way of [illegible] freights have been limited, with rates, however, generally quoted steady, as a rule.

At the Live Stock Markets, Beeves have been in fair request at from 8½@14½ cts. Veals in moderate demand at 7@11 cts.; Sheep at from 5@7¾ cts.; Swine at 5½@5⅞ cts. per lb., all live weight. The week's receipts were 6,968 Beeves, 1,024 Veal Calves, 21,110 Sheep andand Lambs, and 39,614 Swine.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ Messrs. Harris Brothers & Co., of Brattleboro', Vt., have contracted to build the New York, Westchester and Boston Railroad from the Harlem River to the Connecticut State line at Portchester, a distance of about 21 miles. It is to be a first-class, double-track road, with iron bridges and steel rails, and is to be completed within twelve or eighteen months, as the company may elect. The work and materials covered by this contract—superstructure not included—exceed $1,000,000. At Portchester this road will have a northern connection with the Ridgefield, Danbury and Housatonic Roads, and with the Boston airline by a new road to New Haven, which will be located far enough from Long Island Sound to avoid all draw-bridges.

☞ At the triennial meeting of the stockholders of the Northern Pacific Railroad Company, held in Boston on the 12th inst., the following directors were chosen for three years:—George W. Cass, William B. Ogden, R. D. Rice, William G. Moorhead, J. Gregory Smith, Frederick Billings, Charles W. Wright, William G. Fargo, B. P. Cheney, A. H. Barney, William Windom, James Stinson and A. L. Catlin. The directors elected the following officers:—George W. Cass, President; C. B. Wright, Vice President; R. D. Rice, resident Vice President on the Pacific Coast; A. L. Pritchard, Treasurer, and Samuel Wilkinson, Secretary.

☞ The Elkton and Massey's Railroad Company, of Maryland, was fully organized, at a meeting of the stockholders, held at Elkton, on the 26th ult. Jacob Tome, of Cecil county, was elected President. This road, twenty-two miles long, is to extend from Elkton to Massey's Station, on the Queen Anne's and Kent County Railroad, Md. The State has made an appropriation to the road of $58,000, which has now become available, in consequence of subscriptions by private individuals, amounting to $60,000.

☞ The following gentlemen have been elected directors of the New Orleans, Mobile and Texas Railroad Company: Oakes Ames, George Innes, Samuel S. Post, Jr., Charles J. Osborne, John J. Hammell, Erastus Young and S. Foster Dewey. The officers are: George Dennis, President; Samuel S. Post, Jr., Vice President; John J. Howell, Treasurer.

☞ The value of imports from foreign countries to Philadelphia, during February, was $1,002,784, and of goods brought in bond from New York was $443,713, making a total of $1,446,497.

Another Achievement.

THE MARKET STREET "PALACE" CAR.

Mr. John S. Morton, the enterprising president of the West Philadelphia Passenger Railway Company, has placed on the road a handsome car, known as the "palace car." The new car is really a model, both as to adaptability and beauty. It is of the same size as the "New York cars" that have been in use on this road for some time, and which are noted for their width, lightness, and ease in riding. This car, however, is a sample of the workmanship of J. G. Brill & Co., of West Philadelphia, who have recently greatly increased their manufacturing capacity.

The exterior is neatly finished, the prevailing color being canary. In the centre is a painting representing a skirmish between some "trackmen" on the Union Pacific Railroad and a number of Indians. The running gear is of the latest approved pattern, with "the Anti-friction Journal bearing" attached.

This bearing is formed by three interlapping rollers, made of chilled iron or steel, and resting on the top of the journal. These rollers have their centre bearings in the cast-iron journal casing or housing on which the car body rests. The rollers having a diameter many times that of the journal, revolve in a corresponding degree more slowly than the journals: and as the journals and rollers revolve in opposite directions, the friction is reduced to its minimum. The superiority of this over the old style of bearing, in the amount of power required to start a car from rest and in the easy motion, recommends it highly.

The interior of the car reminds one of the Pullman palace car, being finished after said model. The ceiling, or roof, is high, and the ventilation perfect. The woodwork is bird'seye maple, buttonwood (set in panels), and walnut. The mountings are all in silver plate. At each end is a handsome mirror, and the upholstering has been done in red plush.

In truth, the vehicle looks more like a miniature steam railroad "palace coach" than one intended for a street railway. For several years our railway officials have been obliged to send to New York, Wilmington, or elsewhere for their cars, and thus send their money away from Philadelphia, but now a change has taken place. Messrs. J. G. Brill & Co., who were formerly with Messrs. Murphy & Allison, have embarked in the business of manufacturing street railway cars, and Mr. John S. Morton is one of the first of our officials to patronize them, and thus encourage and sustain Philadelphia mechanics.

☞ A special meeting of the stockholders of Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company will be held in Cleveland, Ohio, on the 16th of April, for the purpose of approving or rejecting a lease of the railroad, together with its branches and leased lines, to the Atlantic and Great Western Railroad Company, and also to act upon a proposal to authorize the directors to increase the capital stock of the company not exceeding $5,000,000.

☞ The lease of the Pennsylvania Petroleum Railroad to the Atlantic and Great Western Railroad, was perfected, on the 17th inst. Work on the railroad wil be commenced at once and pushed to a speedy completion.

☞ The Auditor of Virginia states that he will be ready on the 1st of April to commence paying the January, 1873, interest on the public debt of that State.

OFFICE OF FISK & HATCH,
No. 5 NASSAU-ST., NEW YORK, Mar. 19, 1873.

The SIX PER CENT GOLD BONDS of the CHESAPEAKE AND OHIO RAILROAD COMPANY, being secured by a First Mortgage on a completed Road—which is one of the great East and West Trunk Lines, commanding a large through business, and which, from the immense Mineral, Agricultural, and other valuable resources of the country it traverses, is assured of a very remunerative local traffic—are among the most substantial and satisfactory investment securities in the market; and, at the present price, 87½ and accrued interest, yield a liberal rate of interest on their cost.

They are in denominations of $100, $500, and $1,000, coupon and registered; interest payable May and November; principal and interest in gold coin in New York.

We also buy and sell at current market rates, the WESTERN PACIFIC SIX PER CENT GOLD BONDS originally negotiated by us, and now quoted at the Stock Exchange, and widely known as favorite securities in the principal money markets. Coupon bonds of $1,000; interest payable January and July; principal and interest payable in gold in New York. Price to-day is 94¾@95.

We buy and sell GOVERNMENT and CENTRAL PACIFIC BONDS, receive deposits, on which we allow interest, make collections, and do a general banking business.

FISK & HATCH.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending March 8, at 263,177 tons, and for the coal year at 2,493,261 tons, against 2,569,853 tons to corresponding time last year, being a decrease of 76,592 tons. The bituminous tonnage for the week is 41,420 tons, and for the year 327,328 tons, giving a total of all kinds for the week of 304,597 tons, and for the year 2,810,589, being an increase as against production to same time last year of 26,761 tons.

☞ The Chicago *Post* says that the Chicago, Pittsburg and Baltimore Road, is approaching its western terminus with great rapidity. The organization in Illinois is now complete, and as soon as the line is constructed in Indiana its continuation in Illinois will be proceeded with. The route through Ohio and Indiana has not only been determined by actual survey, but the grading and tracklaying have been prosecuted with the vigor and success characteristic of the great corporation which originated the enterprise.

☞ Articles of incorporation of the Cincinnati and Portsmouth Railway Company have been filed with the Secretary of State of Ohio. Capital $500,000, in shares of $50. Corporators, Henry Kemble, Chilton A. White, John Carliste, Benneville Kline, Thos. Ronaldson, Josiah Kirby, Paul Morh, H. H. Wellman, Z. D. Kile and Jos. Clare. The road is to pass through Clermont, Brown and Adams counties, to Portsmouth, in Scioto county.

☞ Messrs. John and M. Conway, of Clarke County, Va., have been awarded a contract for grading two miles of the Valley Railroad, now in course of construction between Harrisonburg and Staunton.

United States Supreme Court.

STATE TAXATION OF RAILROAD BONDS.

Cleveland, Painesville and Ashtabula Railroad Company against the State of Pennsylvania—from the Supreme Court of that State. The question was upon the right of the State, under its act of 1868, to collect through the company a tax of five per cent upon the interest due to its bondholders. The State Court sustained the right and enforced the collection. This court say that the State may properly tax persons and property within its jurisdiction, but the power of taxation is limited to subjects within the jurisdiction. The bonds in this case are property in the hands of the holders and not the property of the obligors, and so far as they are held by non-residents of the State they are property beyond the jurisdiction of the State. The law requiring the treasurer of the company to retain five per cent of the interest due to non-resident bondholders is not therefore a legitimate exercise of the taxing power. It is a law which impairs the obligation of the contract entered into between the company and its bondholders, and is void for that reason. Judgment reversed.

Judge Davis dissents, holding that as the State courts have decided that the tax in question was authorized by the act of 1844, which was in force when the bonds were issued, no principle of the Federal Constitution is violated.

Mr. Justice Field delivered the opinion of the court.

The cases of the Pittsburg, Fort Wayne and Chicago road, and of the Delaware, Lackawanna and Western road are disposed of by the views expressed in the opinion in the foregoing case.

LEGAL TENDER DECISION.

Norwich and Worcester Railroad Company against Johnson—from the Supreme Court of Massachusetts. The railroad company was sued on certain coupons for interest attached to bonds issued in 1860. When the coupons fell due legal tenders were offered in payment and refused, and coin was demanded. The court below directed judgment to be entered for coin, in accordance with the decision of this court in Hepburn vs. Griswold, which was then the law of the land. That judgment is now reversed by this court, in accordance with the subsequent case of Parker vs. Davis. Mr. Justice Miller delivered the opinion.

The Chief Justice stated thathe felt it his duty to dissent, for reasons stated in the opinion of the court in Hepburn vs. Griswold, and in the dissenting opinion in Parker vs. Davis. Justices Clifford and Field concurred in the dissent.

UNTAXABLE CORPORATIONS.

Humphrey et al. against Tiques—from the Circuit Court for South Carolina. The court hold that the Cheraw and Darlington Railroad Company in South Carolina is, by the laws of the State, exempt from taxation, and that the law of 1868, enacted to repeal this exemption, is void. The court say that it is too late to raise the question whether a State has the power to bind itself against imposing taxes, for it has been held in this court that a State has the power to bind itself in relinquishing the taxing power, and such a provision of exemption is a contract which the State may not subsequently impair. Judgment affirmed.

Mr. Justice Hunt delivered the opinion.

Tomlinson and others against Branch and others—on appeal from the Circuit Court for South Carolina. Bills were filed by the appellees as stockholders of the South Carolina Railroad Company to restrain the State officers from collecting, and the company from paying, taxes imposed on the company by the act of 1868, on the ground that the company was by its charter exempt from taxation, but declined to adopt any measure to resist the tax. The court below sustained the tax and dismissed the bill. This court decides that the company is entitled to exemption, and that the Legislature cannot abrogate it or disregard the right. Decree reversed, with directions to enter a decree for appellants. Mr. Justice Hunt delivered the opinion.

The case of the City Council of Charleston and others against Branch and others, from the same court, is disposed of by the opinion in this case.

Journal of Railroad Law.

RAILROAD COMPANIES—DUTY TO REPAIR FENCE—WHAT DILIGENCE REQUIRED.

The facts in the recent case of Antisdel *vs.* The Chicago and Northwestern Railway Company (26 Wisconsin, 145,) are fully and clearly stated in the following opinion by—

PAINE, J.—This action was brought to recover for some colts and sheep of the plaintiff, which got on the defendant's track and were killed. There is nothing in the evidence contained in the bill of exceptions, tending to show any negligence in the management of the train at the time of the killing; but it all relates to the question whether the fence through which the animals escaped on to the track, was kept in proper repair by the company.

The defendant's counsel, on the trial, objected to any evidence, on the ground that the complaint did not state facts sufficient to constitute a cause of action. If it could be assumed that the only cause of action attempted to be stated was based upon negligence of the company in repairing the fence, this objection probably should have been sustained. The allegation is, that the animals having strayed upon the track without any fault of the plaintiff, the company "so carelessly and negligently ran and managed the said locomotive and cars, and the said railroad track, grounds and fences, that its said locomotive and cars ran against and over said horses and colts, &c." This is the only allegation imputing any negligence in respect to the fence. A fence is from its nature incapable of any management or mismanagement, at the very time of the injury, like a locomotive. It would be at least an inapt expression to say that the company so negligently "managed" its fence that by reason of such negligence the animals escaped upon the track. But, after averring that they got casually upon the track, without alleging any negligence of the company contributing to that result to then say that an averment that the company "so carelessly ran and managed its cars and fences" that they were run over and killed, was a sufficient statement that the company neglected to keep its fences in repair, whereby the animals escaped upon the track, would be an instance of liberality in construction inconsistent with that provision of the Code which requires the complaint to contain a plain and concise statement of the facts constituting the cause of action.

But the objection seems to have been properly overruled for the reason that the complaint sufficiently alleges negligence in the management of the cars at the time of the killing. They were capable of management at that time, in which negligence might occur. And the general allegation that they were so carelessly and negligently run and managed that by reason of such negligence the injury was caused, was sufficient.

But as we hold the complaint sufficient on that ground, and insufficient upon the other, the question arises whether the motion for a new trial should have been granted, upon the ground that the verdict was against the evidence. If the bill of exceptions purported to contain all the evidence we should be obliged to answer this question in the affirmative. As the complaint only states a cause of action for negligence in the management of the cars, there being no proof tending to show such negligence, the verdict should have been set aside. But the bill does not purport to contain all the evidence, and it is then always presumed that there was other evidence, justifying the rulings of the court below. The fact that this evidence appears to have been reported by a stenographer, makes no difference in this respect.

The only other questions relate to the instruction asked by the defendant, and refused. Most of those asked were given, and the charge, as a whole, was very fair, and all that the defendant could ask, unless there was error in the refusal of one or two.

The court refused to charge that "the defendants was required to exercise only ordinary care and diligence in maintaining the fence along its road." The question presented by this refusal is somewhat similar in principle to that discussed in the opinion of this court in Ward *vs.* The Town of Jefferson, 24 Wis., 342.

The duty imposed by statute upon railroad companies, to fence their roads and keep the fences in repair, and the liability for all injuries to animals arising from neglect to do this are as absolute as those imposed on towns in respect to highways. But in this case, the question, as to a part of the animals at least, arises upon a defect occurring in the fence after it had once been properly constructed.

Is the rule of ordinary care and diligence the one which the law applies to such a case? As already stated, the language of the statute is unqualified. It makes both the duty and the liability absolute. But notwithstanding this, the court have introduced a qualification, based upon the presumed intention of the Legislature not to require impossibilities or impose unreasonable burdens upon the companies. And it has been held, that where their fences get out of repair by some accident or event beyond the control of the company they are not responsible if the repair is made with reasonable diligence. Railroad Co. *vs.* Truitt 24 Ind. 162. The question then is: What is reasonable diligence? Ordinary diligence as usually defined, seems hardly adequate. It is defined as such diligence as the mass of mankind or as men in general, use in managing their own affairs.

If the instruction meant that the company was only bound to use such diligence in keeping its fences in repair, as men in general use in respect to theirs, it was clearly erroneous. Such a rule would be unsafe in the extreme. And yet without further explanation, this is what a jury would naturally understand it to mean. But even if it were explained to mean that it required of the company the same degree of care and diligence that men of ordinary prudence would exercise in fencing a railroad, provided they had one to fence, and were bound by law to fence it, still the necessity of such an explanation shows that the standard of ordinary care and diligence is really inapplicable to such a case.

It is a question of qualifying a liability imposed by statute, which in its terms is absolute. And it does not seem unreasonable to say, that in such

a case reasonable diligence is a high degree of diligence, exceeding that which men in general exercise in their own affairs. The case above cited from Illinois seems to lay down the true rule upon this subject. It says the company is not obliged to have "a patrol at all times night and day, passing along the road to see the condition of the fence. If this is done daily, and they shall at once, when informed of its insufficient condition, make the necessary repairs, they should not be held liable." And again it says: "And the road must be held to a high degree of diligence in the performance of this duty, but not to an impossible or unreasonable extent. I think, therefore, that the instruction requiring only ordinary care and diligence was properly refused."
